

## Designation: D3892 – 93(Reapproved 2009)

# Standard Practice for Packaging/Packing of Plastics<sup>1</sup>

This standard is issued under the fixed designation D3892; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon ( $\epsilon$ ) indicates an editorial change since the last revision or reapproval.

*This standard has been approved for use by agencies of the Department of Defense.*

## 1. Scope

1.1 This practice covers the packaging and packing of all thermoset and thermoplastic resins and fabricated shapes.

1.2 *This standard does not purport to address all of the safety problems, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

NOTE 1—There is no similar or equivalent ISO standard.

## 2. Referenced Documents

2.1 *ASTM Standards:*<sup>2</sup>

D883 Terminology Relating to Plastics

2.2 *Federal Standards:*

## 4. Significance and Use

4.1 Packing and packaging provisions are outlined as needed for adequate transport of resins and finished products with a minimum of mishaps in shipment.

4.2 Commercial levels are included for all commercial and most federal and military shipments. Level A requirements are added for special military purchases only.

## 5. Procedure

5.1 *Examination of Preparation for Delivery*—Examine in accordance with Table 1 to determine that packaging, packing, and marking comply with requirements specified in the contract or order. The sample unit for this examination shall be one shipping container fully prepared for delivery.

5.2 *Packaging*—Packaging shall be commercial or Level A, as specified.

5.2.1 *Commercial*—The material shall be packaged in accordance with normal commercial practice. The complete package shall be designed to ensure the item against damage during shipment, handling, and storage.

5.2.2 *Level A—For Military Procurement Only:*

5.2.2.1 *Sheets, Rods, Tubes, Pipes, Fittings, and Other Shapes*—Unless otherwise specified in the contract or order, individual fabricated shapes shall be packaged in such a manner as to protect the material against physical and mechanical damage and contamination during transit. Only items comprised of a single National Stock number (NSN) or identifying number shall be placed in one package. Individual sheets shall be masked or interleaved.

5.2.2.2 *Rolls of Film or Sheeting*—These shall be supplied in rolls. Each roll shall be wrapped with at least one layer of polyethylene film or kraft paper, and tightly sealed with tape to prevent contamination.

5.3 *Packing*—Packing shall be commercial or Level A, as specified.

5.3.1 *Commercial*—The material shall be packed in accordance with normal commercial practice. The packaged material shall be packed to assure acceptance by common carrier and to provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping
