## Metal bellows expansion joints for pressure applications

Compensateurs de dilatation à soufflets métalliques  
pour appareils à pression

Kompensatoren mit metallischen Bälgen für  
Druckanwendungen

This draft European Standard is submitted to CEN members for enquiry. It has been drawn up by the Technical Committee CEN/TC 342.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

## iTeh STANDARD PREVIEW

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

**prEN 14917:2020 (E)****European foreword**

This document (prEN 14917:2020) has been prepared by Technical Committee CEN/TC 342 "Metal hoses, hose assemblies, bellows and expansion joints", the secretariat of which is held by SNV.

This document is currently submitted to the CEN Enquiry.

This document supersedes EN 14917:2009+A1:2012.

This document has been prepared under a standardization request given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

For relationship with EU Directive(s), see informative Annex ZA, which is an integral part of this document.

**iTeh STANDARD PREVIEW  
(standards.iteh.ai)**

## Introduction

Metal bellows expansion joints are used as components in piping or as parts of pressure vessels.

If an expansion joint is designed and manufactured according to this document, the risk analysis is already undertaken, see Annex I.

## iTeh STANDARD PREVIEW (standards.iteh.ai)

[kSIST FprEN 14917:2021](#)

## 1 Scope

This document specifies the requirements for design, manufacture and installation of metal bellows expansion joints with circular cross section for pressure applications, i.e. maximum allowable pressure greater than 0,5 bar.

## 2 Normative references

### 3 Terms and definitions

For the purposes of this document the following terms and definitions apply.

#### 3.1

##### **expansion joint**

metal equipment consisting of one or more bellows used to absorb movements such as caused by thermal or mechanical effects in piping or pressure vessels

**ITen STANDARD PREVIEW**

Note 1 to entry: See also Clause 4 Classification.

**(standards.iteh.ai)**

#### 3.2

##### **bellows**

[kSIST FprEN 14917:2021](#)

flexible element consisting of one or more corrugations and the end tangents

<https://standards.iteh.ai/catalog/standards/sist/0a9ed34d-5e56-46f4-9448-4818c72ede2/ksist-fpr-en-14917-2021>

#### 3.3

##### **corrugation (convolution)**

flexible unit of a bellows with a leakprof wall consisting of one or more plies

#### 3.4

##### **ply**

element of the bellows' wall usually made from sheet or strip material

#### 3.5

##### **end tangent**

straight un-corrugated portion at the ends of a bellows

#### 3.6

##### **reinforcing collar**

reinforcing sleeve or ring attached to the end tangent for reinforcement

#### 3.7

##### **assisting collar**

ring placed around the end tangents to facilitate welding
