## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

Amendment 39 to ISO/IEC 14496-5:2001 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 29, *Coding of audio, picture, multimedia and hypermedia information*.

In this Amendment, additional reference software for the MFC Depth High profile in ITU-T Rec. H.264 | ISO/IEC 14496-10 is specified.

# Information technology — Coding of audio-visual objects —

## Part 5: Reference software

### AMENDMENT 39: Reference software for the Multi-resolution Frame Compatible Stereo Coding with Depth Maps of AVC

*Page 2, Clause 4*

At the end of Clause 4 “Visual reference software”, add the following lines:

video/natural/MFCD\_software      MFC Depth extension of AVC: visual decoder in C includes support of  
MFC Depth High profile

*Page 3, Clause A.2*

At the end of Clause A.2 “Visual encoding software”, add the following lines:

video/natural/MFCD\_software      MFC Depth extension of AVC: visual encoder in C includes support of  
MFC Depth High profile
