ISO 10625:2018

<https://standards.itih.ai/catalog/standards/iso/3763f276-db31-456c-894d-13bfl0c9b9c0/iso-10625-2018>

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, Subcommittee SC 6, *Equipment for crop protection*.

This third edition cancels and replaces the second edition (ISO 10625:2005), which has been technically revised.

The main changes compared to the previous edition are as follows:

- updating of [Clause 5](#) for 11 new models (at 300 kPa):
 - 4,8 l/min 12 capacity;
 - 5,6 l/min 14 capacity;
 - 6,4 l/min 16 capacity;
 - 7,2 l/min 18 capacity;
 - 8,0 l/min 20 capacity;
 - 10 l/min 25 capacity;
 - 12 l/min 30 capacity;
 - 16 l/min 40 capacity;
 - 20 l/min 50 capacity;
 - 24 l/min 60 capacity;
 - 32 l/min 80 capacity;
- changing of colour for 1,4 l/min 035 capacity from brown red RAL 3011 to purple red 3004-P;

- separation of the table defining the colour code into 2 separate tables, one for high flow rate's nozzles (over 8 l/min) and one for low flow rate's nozzles (under 7,9 l/min).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
