## Information technology - Security techniques - Privacy framework (ISO/IEC 29100:2011, including Amd 1:2018)

Technologies de l'information - Techniques de sécurité  
- Cadre privé (ISO/IEC 29100:2011, y compris Amd  
1:2018)

Informationstechnik - Sicherheitsverfahren -  
Rahmenwerk für Datenschutz (ISO/IEC 29100:2011,  
einschließlich Amd 1:2018)

This European Standard was approved by CEN on 31 May 2020.

This European Standard was corrected and reissued by the CEN-CENELEC Management Centre on 1 July 2020.

CEN and CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN and CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN and CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN and CENELEC members are the national standards bodies and national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

## European foreword

The text of ISO/IEC 29100:2011, including Amd 1:2018 has been prepared by Technical Committee ISO/IEC JTC 1 "Information technology" of the International Organization for Standardization (ISO) and has been taken over as EN ISO/IEC 29100:2020 by Technical Committee CEN/CLC/JTC 13 "Cybersecurity and Data Protection" the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 2020, and conflicting national standards shall be withdrawn at the latest by December 2020.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## Endorsement notice

The text of ISO/IEC 29100:2011, including Amd 1:2018 has been approved by CEN as EN ISO/IEC 29100:2020 without any modification.

## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of the joint technical committee is to prepare International Standards. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 29100 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 27, *IT Security techniques*.

iTeh STANDARDS PREVIEW  
(standards.iteh.ai)  
Full standard:  
<https://standards.iteh.ai/catalog/standards/sist/en-iso-iec-29100-1202-4301-be1d-8cdf28b14673/sist-en-iso-iec-29100-12020>

## ISO/IEC 29100:2011(E)

### Introduction

This International Standard provides a high-level framework for the protection of personally identifiable information (PII) within information and communication technology (ICT) systems. It is general in nature and places organizational, technical, and procedural aspects in an overall privacy framework.

The privacy framework is intended to help organizations define their privacy safeguarding requirements related to PII within an ICT environment by:

- specifying a common privacy terminology;
- defining the actors and their roles in processing PII;
- describing privacy safeguarding requirements; and
- referencing known privacy principles.

In some jurisdictions, this International Standard's references to privacy safeguarding requirements might be understood as being complementary to legal requirements for the protection of PII. Due to the increasing number of information and communication technologies that process PII, it is important to have international information security standards that provide a common understanding for the protection of PII. This International Standard is intended to enhance existing security standards by adding a focus relevant to the processing of PII.

The increasing commercial use and value of PII, the sharing of PII across legal jurisdictions, and the growing complexity of ICT systems, can make it difficult for an organization to ensure privacy and to achieve compliance with the various applicable laws. Privacy stakeholders can prevent uncertainty and distrust from arising by handling privacy matters properly and avoiding cases of PII misuse.

Use of this International Standard will:

- aid in the design, implementation, operation, and maintenance of ICT systems that handle and protect PII;
- spur innovative solutions to enable the protection of PII within ICT systems; and
- improve organizations' privacy programs through the use of best practices.

The privacy framework provided within this International Standard can serve as a basis for additional privacy standardization initiatives, such as for:

- a technical reference architecture;
- the implementation and use of specific privacy technologies and overall privacy management;
- privacy controls for outsourced data processes;
- privacy risk assessments; or
- specific engineering specifications.

Some jurisdictions might require compliance with one or more of the documents referenced in ISO/IEC JTC 1/SC 27 WG 5 Standing Document 2 (WG 5 SD2) — *Official Privacy Documents References* [3] or with other applicable laws and regulations, but this International Standard is not intended to be a global model policy, nor a legislative framework.
