## ISO 16202-2:2019(E)

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 106, *Dentistry*, Subcommittee SC 03, *Terminology*.

A list of all parts in the ISO 16202 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).

## Introduction

Other documents and ontologies were used to elaborate this document. See References [1] to [8].

# Dentistry — Nomenclature of oral anomalies —

## Part 2: Developmental anomalies of teeth

### 1 Scope

This document provides a nomenclature of oral developmental disturbances of teeth and a code for their representation to facilitate data entry and support interoperability at the semantic level.

This nomenclature covers the various developmental disturbances of teeth.

### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 1942, *Dentistry — Vocabulary*

ISO 3950, *Dentistry — Designation system for teeth and areas of the oral cavity*

ISO 16202-1, *Dentistry — Classification and codification of oral anomalies Part I: Structure of the Classification*

### 3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 1942 apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <http://www.electropedia.org/>

### 4 Nomenclature and codification of developmental disturbances of teeth

The information on the localization of the anomaly shall be added through the use of other codes such as the one described in ISO 3950.

Nomenclature and codification shall be based on the principles enunciated in ISO 16202-1.

11.10. Designates developmental disturbances in number of teeth

11.11. By default (excludes tooth loss resulting from trauma or extraction)

11.11.10. Hypodontia

11.11.20. Oligodontia

11.11.30. Anodontia

11.11.40. Solitary median maxillary central incisor SMMCI

**ISO 16202-2:2019(E)**

## 11.12. By excess

11.12.10. Single supernumerary tooth

11.12.20. Multiple supernumerary teeth (in one location)

11.12.30. Multiple supernumerary teeth (in multiple locations)

## 11.20. Designates disturbances in morphology (size and shape)

## 11.21. Disturbances in size

11.21.10. Microdontia

11.21.20. Macrodontia

## 11.22. Disturbances in shape

11.22.10. Coronal disturbances

11.22.11. Incisors

11.22.11.10. Peg-shaped/conical

11.22.11.20. Talon-cusp

11.22.11.30. Shovel-shaped

11.22.11.40. Tapered

11.22.11.50. Double/fusion/gemination

11.22.11.60. Other

11.22.12. Canines

11.22.12.10. Premolarization

11.22.12.20. Other

11.22.13. Premolars

11.22.13.10. Tricuspidation

11.22.13.20. Dens evaginatus

11.22.13.30. Molarization

11.22.13.40. Other

11.22.14. Molars

11.22.14.10. Carabelli tubercle

11.22.14.20. Paramolar tubercle of bulk cusp

11.22.14.30. Supernumerary cusp(s)

11.22.14.40. Other

11.22.15. Non-tooth specific

11.22.15.10. Coronal dilaceration
