

Designation: ~~D2051–86(Reapproved1997)~~ Designation: D 2051 – 03(Reapproved 2009)

## Standard Test Method for Durability of Finish of Zippers to Laundering<sup>1</sup>

This standard is issued under the fixed designation D 2051; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon ( $\epsilon$ ) indicates an editorial change since the last revision or reapproval.

### 1. Scope

1.1 This test method covers the determination of the durability of the enamel or other decorative coating of a zipper when subjected to laundering.

1.2 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

#### 2.2 AATCC Method:

Method 61 Colorfastness to Washing, Domestic; and Laundering, Commercial: Accelerated<sup>3</sup>

### 3. Terminology

3.1 *Definitions*—For definitions of zipper terms used in this standard, refer to Terminology D 2050. For definitions of other textile terminology used in this standard, refer to Terminology D 123.

### 4. Summary of Test Method

4.1 Specimens are laundered in laboratory equipment at a low liquor-to-goods ratio under conditions of temperature, bleaching, and abrasive action that produce the effect of repeated launderings in a conveniently short time. The zipper coating is abraded by the throw, slide, and impact of an appropriate number of steel balls. The effects of the test on zipper coating are evaluated by noting the loss of coating on the zipper chain or components, or both.

### 5. Significance and Use

5.1 This test method is useful for testing to determine the effect of repeated laundering on the appearance of the decorative coating of a zipper.

5.2 This test method is considered satisfactory for acceptance testing of commercial shipments since the method has been used extensively in the trade for acceptance testing.

5.2.1 In case of a dispute arising from differences in reported test results when using Test Method D2051 for acceptance testing

<sup>1</sup> This test method is under the jurisdiction of ASTM Committee ~~D-13-D13~~ on Textiles, Textiles and is the direct responsibility of Subcommittee ~~D13.54~~ on Subassemblies. The method was developed in cooperation with the Slide Fastener Association, Inc.

Current edition approved March 27, 1986. Published May 1986. Originally published as D2051–61T. Last previous edition D2051–81.

Current edition approved July 1, 2009. Published August 2009. Originally approved in 1961. Last previous edition approved in 2003 as D 2051 – 03.
