

**Designation: B517-03 Designation: B 517 – 05 (Reapproved 2009)**

## Standard Specification for Welded Nickel-Chromium-Iron-Alloy (UNS N06600, UNS N06603, UNS N06025, and UNS N06045) Pipe<sup>1</sup>

This standard is issued under the fixed designation B 517; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon ( $\epsilon$ ) indicates an editorial change since the last revision or reapproval.

### 1. Scope\*

1.1 This specification<sup>2</sup> covers welded, cold-worked, and annealed nickel-chromium-iron alloy (UNS N06600,\* N06603, N06025, and N06045) pipe for general corrosive service and heat-resisting applications.

~~1.2 This specification covers outside diameter and nominal wall pipe shown in ANSI B36.19. Pipe having other dimensions may be furnished provided such pipe complies with all other requirements of this specification.~~

~~1.3 The values stated in inch-pound units are to be regarded as the standard.~~

1.2 This specification covers outside diameter and nominal wall pipe shown in ANSI B36.19. Pipe having other dimensions may be furnished provided such pipe complies with all other requirements of this specification.

1.3 The values stated in inch-pound units are to be regarded as standard. The values given in parentheses are mathematical conversions to SI units that are provided for information only and are not considered standard.

1.4 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to become familiar with all hazards including those identified in the appropriate Material Safety Data Sheet (MSDS) for this product/material as provided by the manufacturer, to establish appropriate safety and health practices, and determine the applicability of regulatory limitations prior to use.*

### 2. Referenced Documents

2.1 *ASTM Standards:*<sup>3</sup>

B 775 Specification for General Requirements for Nickel and Nickel Alloy Welded Pipe

B 899 Terminology Relating to Non-ferrous Metals and Alloys

2.2 *ANSI Standard:*

### 3. Terminology

3.1 Terms defined in Terminology B 899 shall apply unless defined otherwise in this standard.

### 4. General Requirement

4.1 Material furnished in accordance with this specification shall conform to the applicable requirements of the current edition of Specification B 775 unless otherwise provided herein.

### 5. Ordering Information

5.1 It is the responsibility of the purchaser to specify all requirements that are necessary for the safe and satisfactory performance of material ordered under this specification. Examples of such requirements include, but are not limited to, the following:

5.1.1 Alloy name or UNS number.

<sup>1</sup> This specification is under the jurisdiction of ASTM Committee B02 on Nonferrous Metals and Alloys and is the direct responsibility of Subcommittee B02.07 on Refined Nickel and Cobalt and Their Alloys.

~~Current edition approved July 10, 2003. Published August 2003. Originally approved in 1970. Last previous edition approved in 1998 as B517-98.~~

~~Current edition approved Oct. 1, 2009. Published October 2009. Originally approved in 1970. Last previous edition approved in 2005 as B 517 – 05.~~

<sup>2</sup> For ASME Boiler and Pressure Code applications see related Specification SB-517 in Section II of that Code.

\* New designation established in accordance with ASTM E 527 and SAE J1086, Practice for Numbering Metals and Alloys (UNS).
