Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 145, *Graphical symbols*, Subcommittee SC 2, *Safety identification, signs, shapes, symbols and colours*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

iTeh STANDARD PREVIEW
(standards.iteh.ai)

Full standard:

Graphical symbols — Safety colours and safety signs — Registered safety signs

AMENDMENT 1

IMPORTANT — The colours represented in the electronic file of this document can be neither viewed on screen nor printed as true representations. For the purposes of colour matching, see ISO 3864-4 which provides colorimetric and photometric properties together with, as a guideline, references from colour order systems.

Add the following safety signs:

- P045: No campfire,
- P071: Do not cross barrier,
- P072: No jumping down,
- W068: Warning; Falling into water when stepping on or off a floating surface,
- W069: Warning; Jellyfish,
- W070: Warning; Step down.

All safety signs are available on the Online Browsing Platform (www.iso.org/obp).

Safety sign P045: No campfire

	Reference No. ISO 7010-P045
	Referent No campfire
	Function To prohibit making campfire
	Image content Flame above four logs
Hazard Fire	
Human behaviour that is intended to be caused after understanding the safety sign's meaning Not making campfire	
Additional information Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.	

Safety sign P071: Do not cross barrier

	Reference No. <p style="text-align: center;">ISO 7010-P071</p>
	Referent <p style="text-align: center;">Do not cross barrier</p>
	Function <p>To prohibit crossing the barrier</p>
	Image content <p>Human figure (back view), seven vertical lines between two horizontal lines</p>
Hazard <p>Dangerous or unsafe areas for entry</p>	
Human behaviour that is intended to be caused after understanding the safety sign's meaning <p>Not crossing the fence, railings or other kind of barrier</p>	
Additional information <p>Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.</p>
