Safety of toys - Part 3: Migration of certain elements

Sécurité des jouets - Partie 3 : Migration de certains éléments

Sicherheit von Spielzeug - Teil 3: Migration bestimmter Elemente

This draft amendment is submitted to CEN members for enquiry. It has been drawn up by the Technical Committee CEN/TC 52.

This draft amendment A2, if approved, will modify the European Standard EN 71-3:2019+A1:2021. If this draft becomes an amendment, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for inclusion of this amendment into the relevant national standard without any alteration.

This draft amendment was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Warning : This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

European foreword

This document (EN 71-3:2019+A1:2021/prA2:2024) has been prepared by Technical Committee CEN/TC 52 “Safety of toys”, the secretariat of which is held by DS.

This document is currently submitted to the CEN Enquiry.

This document will amend EN 71-3:2019+A1:2021.

This document has been prepared under a standardization request addressed to CEN by the European Commission. The Standing Committee of the EFTA States subsequently approves these requests for its Member States.

For the relationship with EU Legislation, see informative Annex ZA, which is an integral part of this document.

EN 71-3:2019+A1:2021/prA2:2024 (E)**1 Modifications to the European foreword**

Remove the reference to Part 9 from the list of parts.

Add the following references in the list of parts: “

- Part 15: Formamide in foam toy materials*
- Part 16: Certain flame retardants in toy materials*
- Part 17: Isothiazolinones in aqueous toy materials*
- Part 18: Phenol in aqueous and polymeric toy materials*
- Part 19: Migration of bisphenol A from toy materials”.*

Add the following references to the list of guidance documents: “

- CEN/TS 17973: Safety of toys — Categorization of slime type materials;*
- CEN/TR 17695: Safety of toys — Mechanical and physical properties — Guidance on categorisation of projectile toys within EN 71-1”.*

2 Modifications of wording in whole document

Align the wording of "hydrochloric acid solution" in the whole document with subclause 6.1 by replacing "hydrochloric acid" by "hydrochloric acid solution", whenever relevant.

3 Modifications to Clause 4 "Requirements"

Add the following note after the first paragraph in 4.1 "Toy material categories (see H.4)":

NOTE CEN/TS 17973:2023, *Safety of toys — Categorization of slime type materials*, specifies a method for categorization of slime-type products to support users of EN 71-3 in the categorization of products with slime-like behaviour into material categories 1 (dry, brittle, powder-like or pliable toy material) or 2 (liquid or sticky toy material)."

4 Modifications to Clause 7 "Sampling and sample preparation"

Replace the 5th and 6th sentences of 7.1 "Selection of test portions" with the following:

"Test portions shall not be composed of more than one toy material unless discrete specimens cannot be separated physically, e. g. dot printing, patterned textiles, multi-coloured printed surfaces etc. Such test portions made of more than one toy material shall be representative of the whole material.

NOTE Although this document requires test portions are made up of one material, test portions made up of multiple materials can be a useful means of verification testing, provided care is taken with sample selection and analysis. See H.5. for further information."

Delete subclause 7.2.3, "Dewaxing (see H.11)" in its entirety including its subclauses 7.2.3.1 and 7.2.3.2 until Clause 8.
