ISO 23233

Second edition
2016-03-01

AMENDMENT 1
2017-03

Rubber, vulcanized or thermoplastic — Determination of resistance to abrasion using a driven, vertical abrasive disc

AMENDMENT 1

Caoutchouc, vulcanisé ou thermoplastique — Détermination de la résistance à l'abrasion au moyen d'un disque abrasif vertical, motorisé

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 2, *Testing and analysis*.

Rubber, vulcanized or thermoplastic — Determination of resistance to abrasion using a driven, vertical abrasive disc

AMENDMENT 1

Subclause 9.3, Table 3

Replace Table 3 with the following which includes modified powder feed rate values.

Table 3 — Test conditions for each abrasion run

Abrasion run	Load N	Slip angle °	Rotational speed km/h	Distance run m	Powder feed rate units
1	75	16	25	250	40
2	75	16	12	140	25
3	75	13	2,5	200	7
4	75	9	25	600	14
5	75	9	12	600	9
6	75	9	2,5	600	3
7	75	5,5	25	2 500	5
8	75	5,5	12	1 500	3
9	75	5,5	2,5	1 400	2
10	75	5,5	2,5	1 400	2
11	75	5,5	12	1 500	3
12	75	5,5	25	2 500	5
13	75	9	2,5	600	3
14	75	9	12	600	9
15	75	9	25	600	14
16	75	13	2,5	200	7
17	75	16	12	140	25
18	75	16	25	250	40
