## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by ISO/IEC JTC 1, *Information technology*, SC 39, *Sustainability for and by Information Technology*.

A list of all the parts in the ISO 30134 series can be found on the ISO website.

# Information technology — Data centres — Key performance indicators —

## Part 1: Overview and general requirements

### AMENDMENT 1

Page 3, 3.1.13

Delete Note 1 to entry in definition 3.1.13 (as shown below):

#### 3.1.13

##### **resource usage efficiency**

ratio of output to the resource used by the device or system when the input and output unit are the same

~~Note 1 to entry: Resources in this context include, but are not limited to, electricity and water, and each will be defined within the same boundary conditions.~~

Page 5, 5.3.5

**iTeh STANDARD PREVIEW**  
(standards.iteh.ai)

Replace the text of **5.3.5 Definition of boundaries** with the following:

Each KPI shall define the elements of the data centre infrastructure to be included in any measurements or calculations (see Clause 6).

Each KPI shall define the treatment of resources at the interfaces to the system to which the KPI applies.

**iTeh STANDARD PREVIEW**
