Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 172, *Optics and photonics*, Subcommittee SC 7, *Ophthalmic optics and instruments*.

Ophthalmic optics — Spectacle lenses — Fundamental requirements for uncut finished lenses

AMENDMENT 1

Normative references

Delete ISO 21987, *Ophthalmic optics — Mounted spectacle lenses*

4.1

In the sentence “In addition to the requirements specified in this International Standard, uncut finished lenses shall comply with the relevant parts of ISO 8980, and mounted lenses shall comply with ISO 21987.”

Delete “, and mounted lenses shall comply with ISO 21987” to read:

“In addition to the requirements specified in this International Standard, uncut finished lenses shall comply with the relevant parts of ISO 8980.”

6.1.2

Replace “f) method for addition power measurement, if not the front surface method” with “f) method for addition power measurement, if not the segment side method”

6.1.3

Replace “d) method for addition power measurement, if not the front surface method.” with “d) method for addition power measurement, if not the method using the side on which the power variation is located.”
