English Version

## Powertrack systems - Part 22: Particular requirements for powertrack systems intended for onfloor or underfloor installation

Systèmes de conducteurs préfabriqués - Partie 22:  
Exigences particulières pour les systèmes de conducteurs  
préfabriqués destinés au montage sur le sol ou sous le sol

To be completed

This draft amendment prAA, if approved, will modify the European Standard ; it is submitted to CENELEC members for enquiry.  
Deadline for CENELEC: 2020-11-13.

It has been drawn up by CLC/TC 213.

If this draft becomes an amendment, CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this amendment the status of a national standard without any alteration.

This draft amendment was established by CENELEC in three official versions (English, French, German).  
A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Warning : This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

EN IEC 61534-22:2014/prAA:2020 (E)

## European foreword

This document (EN IEC 61534-22:2014/prAA:2020) has been prepared by CLC/TC 213 "Cable management systems".

This document is currently submitted to the Enquiry.

The following dates are proposed:

- latest date by which the existence of this document has to be announced at national level (doa) dor + 6 months
- latest date by which this document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) dor + 12 months
- latest date by which the national standards conflicting with this document have to be withdrawn (dow) dor + 36 months (to be confirmed or modified when voting)

This document amends EN IEC 61534-22:2014/prA1:2020.

This document has been prepared under a mandate given to CENELEC by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

For the relationship with EU Directive(s) see informative Annex ZZ, which is an integral part of this document.

[SIST EN 61534-22:2014/oprAA:2020](https://standards.iteh.ai/catalog/standards/sist/966c5632-8d07-4447-a78b-eee432d525e8/sist-en-61534-22-2014-opraa-2020)  
<https://standards.iteh.ai/catalog/standards/sist/966c5632-8d07-4447-a78b-eee432d525e8/sist-en-61534-22-2014-opraa-2020>

## 1 Modification to Clause 1, “Scope”

*Add the following Note after the last dashed item under 1.2:*

“NOTE Particular attention needs to be paid to installations rules when elements are installed which include EMI suppression devices.”

## 2 Addition of new Annex H, “Routine Tests”

*Add the following Annex H:*

“

### Annex H (normative)

#### Routine tests

Routine tests are intended to detect faults in materials and/or in workmanship. They are carried out on every new assembly after it has been assembled.

As a minimum, the following routine tests shall be carried out on each new assembly:

- Inspection of the assembly and wiring if applicable,
- Where applicable the operation of electrical devices,
- A dielectric test (Power-frequency withstand voltage) in accordance with Table 7, for the duration of at least 1 s,
- Continuity tests of the live conductors and their correct phasing,
- Continuity tests of the protective circuits.

The tests may be carried out in any order.”

## 3 Addition of Annex ZA, “Normative references to international publications with their corresponding European publications “

*Add the following Annex ZA:*

“

### Annex ZA (normative)

#### Normative references to international publications with their corresponding European publications

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE 1 When an International Publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

NOTE 2 Up-to-date information on the latest versions of the European Standards listed in this annex is available here: [www.cenelec.eu](http://www.cenelec.eu).

## EN IEC 61534-22:2014/prAA:2020 (E)

Add the following reference:

<u>Publication</u>	<u>Year</u>	<u>Title</u>	<u>EN/HD</u>	<u>Year</u>
IEC 61534-1:2011/A2	2020	Powertrack systems - Part 1: General requirements	EN 61534-1:2011/A2	— <sup>1</sup>

“

#### 4 Addition of Annex ZZ, “Relationship between this European Standard and the safety objectives of Directive 2014/35/EU [2014 OJ L96] aimed to be covered”

Add the following Annex ZZ:

“

### Annex ZZ (informative)

#### Relationship between this European Standard and the safety objectives of Directive 2014/35/EU [2014 OJ L96] aimed to be covered

This European Standard has been prepared under a Commission’s standardization request relating to harmonized standards in the field of the Low Voltage Directive, M/511, to provide one voluntary means of conforming to safety objectives of Directive 2014/35/EU of the European Parliament and of the Council of 26 February 2014 on the harmonization of the laws of the Member States relating to the making available on the market of electrical equipment designed for use within certain voltage limits [2014 OJ L96].

Once this standard is cited in the Official Journal of the European Union under that Directive, compliance with the normative clauses of this standard given in Table ZZ.1 confers, within the limits of the scope of this standard, a presumption of conformity with the corresponding safety objectives of that Directive, and associated EFTA regulations.

**Table ZZ.1 — Correspondence between this European Standard and Annex I of Directive 2014/35/EU [2014 OJ L96]**

Safety objectives of Directive 2014/35/EU	Clause(s) / sub-clause(s) of this EN	Remarks / Notes

## EN IEC 61534-22:2014/prAA:2020 (E)

Safety objectives of Directive 2014/35/EU	Clause(s) / sub-clause(s) of this EN	Remarks / Notes
(3)(a)	Clause 4 General requirements Clause 5 General notes on tests Clause 7 Classification Clause 9 Construction Clause 14 Mechanical strength Clause 19 Resistance to Heat Clause 21.1 Resistance to corrosion	
(3)(b)	Clause 4 General requirements Clause 5 General notes on tests Clause 7 Classification Clause 19 Resistance to Heat Clause 20 Fire Hazard Clause 21 External influences Clause 22 Electromagnetic compatibility	
(3)(c)	Clause 18 Short-circuit protection and short-circuit withstand strength	

**WARNING 1** — Presumption of conformity stays valid only as long as a reference to this European Standard is maintained in the list published in the Official Journal of the European Union. Users of this standard should consult frequently the latest list published in the Official Journal of the European Union.

**WARNING 2** — Other Union legislation may be applicable to the product(s) falling within the scope of this standard.”
