**Inorganic fertilizers - Determination of specific parameters
in ammonium nitrate fertilizers of high nitrogen content**

Anorganische Düngemittel - Bestimmung spezifischer
Parameter bei Ammoniumnitratdüngemitteln mit
hohem Stickstoffgehalt

This draft Technical Specification is submitted to CEN members for Vote. It has been drawn up by the Technical Committee CEN/TC 260.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Warning : This document is not a Technical Specification. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a Technical Specification.

European foreword

This document (FprCEN/TS 17751:2021) has been prepared by Technical Committee CEN/TC 260 “Fertilizers and liming materials”, the secretariat of which is held by DIN.

This document is currently submitted to the Vote on TS.

This document has been prepared under a standardization request given to CEN by the European Commission and the European Free Trade Association.

iTeh STANDARD PREVIEW (standards.iteh.ai)

Introduction

Regulation (EU) 2019/1009 [1] lays down the rules on the making available on the market of EU fertilizing products and the specific safety and quality requirements for the defined product function categories (PFCs). Straight or compound solid inorganic macronutrient ammonium nitrate fertilizers of high nitrogen content have been classified into PFC 1(C)(I)(a)(i-ii)(A).

The specific safety and quality requirements in relation to the following specific parameters in these EU fertilizing products are defined in this document as well as normative references of the test methods to be used in order to measure the compliance with the related requirement in the Regulation (EU) 2019/1009 [1].

WARNING — The use of this document can involve hazardous materials, operations and equipment. This document does not purport to address all the safety problems associated with its use. It is the responsibility of the user of this document to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

iTeh STANDARD PREVIEW (standards.iteh.ai)

[kSIST-TS FprCEN/TS 17751:2021](https://standards.iteh.ai/catalog/standards/sist/0454cfl0-2550-4651-ab4b-42baa90b8686/ksist-ts-fprcen-ts-17751-2021)

<https://standards.iteh.ai/catalog/standards/sist/0454cfl0-2550-4651-ab4b-42baa90b8686/ksist-ts-fprcen-ts-17751-2021>

1 Scope

This document specifies references to methods for the determination of the following specific parameters in ammonium nitrate fertilizers of high nitrogen content:

- the nitrogen content as a result of ammonium nitrate;
- pH of a solution of ammonium nitrate fertilizers of high nitrogen content;
- the particle size of ammonium nitrate fertilizers of high nitrogen content;
- the chloride content;
- the copper content.

This document is applicable to EU fertilizing products classified as PFC 1(C)(I)(a)(i-ii)(A) and PFC 7 as long as the blend only consists of EU fertilizing products classified as PFC 1(C), PFC 2 and PFC 5 and still fulfils the requirements for PFC 1(C)(I)(a)(i-ii)(A) as specified in the Regulation (EU) 2019/1009 [1].

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
