This European Standard was approved by CEN on 13 March 2022.

CEN and CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN and CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN and CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN and CENELEC members are the national standards bodies and national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European Foreword

This document (EN 16603-50-21:2022) has been prepared by Technical Committee CEN-CENELEC/TC 5 “Space”, the secretariat of which is held by DIN.

This standard (EN 16603-50-21:2022) originates from ECSS-E-AS-50-21C.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 2023, and conflicting national standards shall be withdrawn at the latest by January 2023.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 16603-50-01:2014.

The main changes with respect to EN 16603-50-01:2014 are listed below:

- Replacement of the Standard by an Adoption Notice.

This document has been prepared under a standardization request given to CEN by the European Commission and the European Free Trade Association.

This document has been developed to cover specifically space systems and has therefore precedence over any EN covering the same scope but with a wider domain of applicability (e.g. : aerospace).

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

1 Scope

This document identifies the clauses and requirements modified with respect to the standard CCSDS 131.0-B-3, *TM Synchronization and Channel Coding*, Issue 3, September 2017 for application in ECSS.

iTeh STANDARD PREVIEW

SIST EN 16603-50-21:2022

<https://standards.iteh.ai/catalog/standards/sist/848b692c-1e15-45fd-9819-a894cbc6960b/sist-en-16603-50-21-2022>

Context information

The standard CCSDS 131.0-B-3, *TM Synchronization and Channel Coding*, has been developed by CCSDS for use in developing synchronization and channel coding systems.

With this Adoption Notice ECSS is adopting and applying CCSDS 131.0-B-3 with a minimum set of modifications, identified in the present document, to allow for reference and for a consistent integration in the ECSS system of standards.

CCSDS 131.0-B-3 is similar to the EN 16603-50-01 (based on ECSS-E-ST-50-01) *Space data links - Telemetry synchronization and channel codin.*

EN 16603-50-01 (based on ECSS-E-ST-50-01) is superseded by EN 16603-50-21 (based on ECSS-E-AS-50-21).

Differences between these standards that are not covered by the normative modifications in clause 4 are described in the informative Annex A.

- a. CCSDS 131.0-B-3, TM Synchronization and Channel Coding, Issue 3, September 2017 shall apply as written with the following modifications listed in Table 4-1.

Table 4-1: Applicability table for CCSDS 131.0-B-2

Clause or requirement number	Applicability	Applicable text (the new/added text is underlined)	Comments	Text as in the original document (deleted text with strikethrough)
3.2.4	Modified	Soft bit decisions with at least three-bit quantization <u>shall be used for the decoder.</u>	CCSDS requirement modified: for convolutional codes. Words “should be used whenever constraints (such as complexity of decoder) permit” deleted and replaced by words “shall be used for the decoder”	Soft bit decisions with at least three-bit quantization should be used whenever constraints (such as complexity of decoder) permit.
4.3.1c.	New requirement	E=8 shall not be used unless the modulation scheme is 4-dimensional 8PSK trellis-coded modulation (4D-8PSK-TCM).	New requirement added: restricted use of Reed-Solomon codes with E=8	

EN 16603-50-21:2022 (E)

Clause or requirement number	Applicability	Applicable text (the new/added text is underlined)	Comments	Text as in the original document (deleted text with strikethrough)
4.3.5.1	Modified	The allowable values of interleaving depth shall be: <u>a) When E=16, I=1, 2, 3, 4, 5, and 8.</u> <u>b) When E=8, I=8</u>	CCSDS requirement modified for Reed-Solomon codes to explain better applicability of E=16 and E=8	The allowable values of interleaving depth are I=1, 2, 3, 4, 5, and 8.
4.3.5.2	Modified	The interleaving depth shall be fixed on a Physical Channel for a Mission Phase.	CCSDS requirement modified for Reed-Solomon codes: word "normally" deleted.	The interleaving depth shall normally be fixed on a Physical Channel for a Mission Phase.
5.1	Modified	Concatenated codes shall consist of a combination of a Reed-Solomon code <u>with E=16</u> defined in section 4 with one of the convolutional codes defined in section 3.	CCSDS requirement modified for restricted use of Reed-Solomon codes: the original requirement was applicable to both E=8 and E=16, the new requirement applies only to E=16	Concatenated codes shall consist of a combination of a Reed-Solomon code defined in section 4 with one of the convolutional codes defined in section 3.
5.1	New NOTE	NOTE - Reed-Solomon code with E=8 is not concatenated with one of the convolutional codes.	New NOTE added.
