## Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available **free of charge** from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<http://www.etsi.org/ipr>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

## Foreword

This European Standard (Telecommunications series) has been produced by ETSI Technical Committee Signalling Protocols and Switching (SPS).

The present document is part 1 of a multi-part EN covering the Signalling ATM Adaptation Layer (SAAL); Layer Management for the SAAL at the Network Node Interface (NNI), as identified below:

**Part 1: "Service Specific Connection Oriented Protocol (SSCOP) and Service Specific Co-ordination Function (SSCF)";**

Part 2: "Protocol Implementation Conformance Statement (PICS) proforma".

Other parts are for further study.

The present document was originally published as ETS 300 647 and the present text carries no technical changes to that original version.

## Endorsement notice

The elements of ITU-T Recommendation Q.2144 apply, with the following modifications:

NOTE: New or modified text is indicated using sidebars. In addition, underlining and/or strike-out are used to highlight detailed modifications where necessary.

### Clause 1

Replace clause 1 by:

## Scope

The present document specifies the Layer Management functions for the Signalling ATM Adaptation Layer (SAAL) at the Network Node Interface (NNI) for the pan-European Broadband Integrated Services Digital Network (B-ISDN) as provided by European public telecommunications operators.

These Layer Management functions include the interfaces to the Service Specific Connection Oriented Protocol (SSCOP) (see ETS 300 436-1 [8]), to the Service Specific Co-ordination Function (SSCF) at the NNI (see ETS 300 438-1 [9]), and to systems management.

### Clause 2.1

Insert the following references at the end of subclause 2.1:

- [8] ETS 300 436-1: "Broadband Integrated Services Digital Network (B-ISDN); Signalling ATM Adaptation Layer (SAAL); Service Specific Connection Oriented Protocol (SSCOP); Part 1: Protocol specification [ITU-T Recommendation Q.2110 (1995), modified]".
- [9] ETS 300 438-1: "Broadband Integrated Services Digital Network (B-ISDN); Signalling ATM Adaptation Layer (SAAL); Service Specific Co-ordination Function (SSCF) for support of signalling at the Network Node Interface (NNI); Part 1: Specification of SSCF at NNI [ITU-T Recommendation Q.2140 (1995), modified]".

Throughout the text of ITU-T Recommendation Q.2144

Replace references as shown in the following table.

Reference in ITU-T Recommendation Q.2144	Modified reference
ITU-T Recommendation Q.2110 [2]	ITU-T Recommendation Q.2110 as modified by ETS 300 436-1 [8]
ITU-T Recommendation Q.2140 [3]	ITU-T Recommendation Q.2140 as modified by ETS 300 438-1 [9]
