Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: *"Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards"*, which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org/>).

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

DECT™, **PLUGTESTS™**, **UMTS™** and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP™** and **LTE™** are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M™** logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM®** and the GSM logo are trademarks registered and owned by the GSM Association.

Legal Notice

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities. These shall be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between 3GPP and ETSI identities can be found under <https://webapp.etsi.org/key/queryform.asp>.

Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

Annex A (normative):	Test system characterization	350
-----------------------------	---	------------

Annex B (normative):	Calibration.....	351
Annex C (informative):	Test tolerances and derivation of test requirements.....	352
C.1	General	352
C.2	Measurement of transmitter (OTA).....	353
C.3	Measurement of receiver (OTA)	355
Annex D (informative):	Test system set-up	356
D.1	Transmitter	356
D.1.1	Radiated Transmit Power, OTA E-UTRA DL RS power, output power dynamics and Transmitter signal quality.....	356
D.1.2	OTA Base Station output power, ACLR, OTA spectrum emissions mask, OTA operating band unwanted emissions.....	357
D.1.3	OTA spurious emissions	357
D.1.4	OTA Co-location emissions, TX OFF power.....	358
D.1.5	OTA Transmitter Intermodulation	358
D.2	Receiver.....	359
D.2.1	OTA sensitivity and OTA Reference sensitivity	359
D.2.2	OTA Dynamic range	359
D.2.3	OTA Adjacent channel selectivity, general blocking, and narrowband blocking.....	360
D.2.4	OTA Blocking	361
D.2.5	OTA Receiver spurious emissions	362
D.2.6	OTA Receiver intermodulation	362
D.2.7	OTA In-channel selectivity	363
D.3	Performance requirements.....	364
Annex E (normative):	Estimation of Measurement Uncertainty.....	365
E.1	General	365
E.2	Measurement methodology descriptions.....	365
E.3	Measurement uncertainty budget format.....	365
E.4	Measurement uncertainty budgets.....	365
E.5	Measurement error contribution descriptions.....	365
Annex F (normative):	TRP measurement grids.....	366
F.1	General	366
F.2	Spherical equal angle grid	366
F.2.1	General	366
F.2.2	Reference angular step criteria	366
F.3	Spherical equal area grid	368
F.4	Spherical Fibonacci grid.....	369
F.5	Orthogonal cut grid	369
F.5.1	General	369
F.5.2	Operating band unwanted emissions	370
F.5.3	Spurious unwanted emissions.....	370
F.6	Wave vector space grid	371
F.7	Orthogonal 2 cuts with pattern multiplication.....	371
F.8	Void.....	371
F.9	Full sphere with sparse sampling	371
F.10	Beam-based directions	372

F.11	Peak method	372
F.12	Equal sector with peak average	372
F.13	Pre-scan	373
Annex G (normative): Environmental requirements for the BS equipment		374
G.1	General	374
G.2	Normal test environment	374
G.3	Extreme test environment.....	374
G.3.1	General	374
G.3.2	Extreme temperature	375
G.4	Vibration.....	375
G.5	Power supply	375
G.6	Measurement of test environments.....	375
G.7	OTA extreme test methods.....	376
G.7.1	Direct far field method	376
G.7.2	Relative method.....	376
Annex H (informative): Measuring noise close to noise-floor.....		378
Annex I (informative): Change history		379

Foreword

This Technical Specification has been produced by the 3rd Generation Partnership Project (3GPP).

The contents of the present document are subject to continuing work within the TSG and may change following formal TSG approval. Should the TSG modify the contents of the present document, it will be re-released by the TSG with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

- x the first digit:
 - 1 presented to TSG for information;
 - 2 presented to TSG for approval;
 - 3 or greater indicates TSG approved document under change control.
- y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- z the third digit is incremented when editorial only changes have been incorporated in the document.

In the present document, modal verbs have the following meanings:

- shall** indicates a mandatory requirement to do something
- shall not** indicates an interdiction (prohibition) to do something

The constructions "shall" and "shall not" are confined to the context of normative provisions, and do not appear in Technical Reports.

The constructions "must" and "must not" are not used as substitutes for "shall" and "shall not". Their use is avoided insofar as possible, and they are not used in a normative context except in a direct citation from an external, referenced, non-3GPP document, or so as to maintain continuity of style when extending or modifying the provisions of such a referenced document.

- should** indicates a recommendation to do something
- should not** indicates a recommendation not to do something
- may** indicates permission to do something
- need not** indicates permission not to do something

The construction "may not" is ambiguous and is not used in normative elements. The unambiguous constructions "might not" or "shall not" are used instead, depending upon the meaning intended.

- can** indicates that something is possible
- cannot** indicates that something is impossible

The constructions "can" and "cannot" are not substitutes for "may" and "need not".

- will** indicates that something is certain or expected to happen as a result of action taken by an agency the behaviour of which is outside the scope of the present document
- will not** indicates that something is certain or expected not to happen as a result of action taken by an agency the behaviour of which is outside the scope of the present document
- might** indicates a likelihood that something will happen as a result of action taken by some agency the behaviour of which is outside the scope of the present document
