Important notice

The present document can be downloaded from the
ETSI [Search & Browse Standards application](#).

The present document may be made available in electronic versions and/or in print. The content of any electronic and/or print versions of the present document shall not be modified without the prior written authorization of ETSI. In case of any existing or perceived difference in contents between such versions and/or in print, the prevailing version of an ETSI deliverable is the one made publicly available in PDF format on [ETSI deliver](#).

Users should be aware that the present document may be revised or have its status changed,
this information is available in the [Milestones listing](#).

If you find errors in the present document, please send your comments to
the relevant service listed under [Committee Support Staff](#).

If you find a security vulnerability in the present document, please report it through our
[Coordinated Vulnerability Disclosure \(CVD\)](#) program.

Notice of disclaimer & limitation of liability

The information provided in the present deliverable is directed solely to professionals who have the appropriate degree of experience to understand and interpret its content in accordance with generally accepted engineering or other professional standard and applicable regulations.

No recommendation as to products and services or vendors is made or should be implied.

No representation or warranty is made that this deliverable is technically accurate or sufficient or conforms to any law and/or governmental rule and/or regulation and further, no representation or warranty is made of merchantability or fitness for any particular purpose or against infringement of intellectual property rights.

In no event shall ETSI be held liable for loss of profits or any other incidental or consequential damages.

Any software contained in this deliverable is provided "AS IS" with no warranties, express or implied, including but not limited to, the warranties of merchantability, fitness for a particular purpose and non-infringement of intellectual property rights and ETSI shall not be held liable in any event for any damages whatsoever (including, without limitation, damages for loss of profits, business interruption, loss of information, or any other pecuniary loss) arising out of or related to the use of or inability to use the software.

Copyright Notification

No part may be reproduced or utilized in any form or by any means, electronic or mechanical, including photocopying and microfilm except as authorized by written permission of ETSI.

The content of the PDF version shall not be modified without the written authorization of ETSI.

The copyright and the foregoing restriction extend to reproduction in all media.

Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: *"Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards"*, which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org/>).

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

DECT™, **PLUGTESTS™**, **UMTS™** and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP™** and **LTE™** are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M™** logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM®** and the GSM logo are trademarks registered and owned by the GSM Association.

Legal Notice

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities. These shall be interpreted as being references to the corresponding ETSI deliverables. (2024-10)

The cross reference between 3GPP and ETSI identities can be found under <https://webapp.etsi.org/key/queryform.asp>.

Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

7.3.1.4.2	Procedure	153
7.3.1.4.3	Procedure, reverberation chamber method	153
7.3.1.5	Test requirements	154
7.3.2	Total Radiated Sensitivity (TRS) for UTRA LCR TDD LEE	155
7.3.2.1	Definition and applicability	155
7.3.2.2	Minimum Requirements	156
7.3.2.3	Test purpose	157
7.3.2.4	Method of test	157

7.3.2.4.1	Initial conditions	157
7.3.2.4.2	Procedure	158
7.3.2.4.3	Procedure, reverberation chamber method.....	158
7.3.2.5	Test requirements.....	159
7.3.3	Total Radiated Sensitivity (TRS) for E-UTRA FDD LEE	160
7.3.3.1	Definition and applicability.....	160
7.3.3.2	Minimum Requirements.....	161
7.3.3.3	Test purpose	162
7.3.3.4	Method of test	162
7.3.3.4.1	Initial conditions	162
7.3.3.4.2	Procedure	163
7.3.3.4.3	Procedure, reverberation chamber method.....	163
7.3.3.5	Test requirements.....	163
7.3.4	Total Radiated Sensitivity (TRS) for E-UTRA TDD LEE	164
7.3.4.1	Definition and applicability.....	164
7.3.4.2	Minimum Requirements.....	165
7.3.4.3	Test purpose	165
7.3.5.4	Method of test	166
7.3.4.4.1	Initial conditions	166
7.3.4.4.2	Procedure	166
7.3.4.4.3	Procedure, reverberation chamber method.....	166
7.3.4.5	Test requirements.....	166
7.4	Radiated Performance of Multiple-antenna Receivers in the UE.....	167
7.4.1	Total Radiated Multi-antenna Sensitivity (TRMS) for E-UTRA FDD for Handheld UE in Free Space.....	167
7.4.1.1	Definition and applicability.....	167
7.4.1.2	Minimum requirements.....	168
7.4.1.3	Test Purpose.....	168
7.4.1.4	Method of test for Multi-probe Anechoic Chamber.....	168
7.4.1.4.1	Initial conditions	168
7.4.1.4.2	Procedure	169
7.4.1.4A	Method of test for Radiated Two-Stage	169
7.4.1.4A.1	Initial conditions.....	170
7.4.1.4A.2	Procedure.....	170
7.4.1.5	Test requirements.....	171
7.4.2	Total Radiated Multi-antenna Sensitivity (TRMS) for E-UTRA TDD for Handheld UE in Free Space.....	171
7.4.2.1	Definition and applicability.....	171
7.4.2.2	Minimum requirements.....	172
7.4.2.3	Test Purpose.....	172
7.4.2.4	Method of test for Multi-probe Anechoic Chamber.....	172
7.4.2.4.1	Initial conditions.....	172
7.4.2.4.2	Procedure.....	173
7.4.2.4A	Method of test for Radiated Two-Stage	174
7.4.2.4A.1	Initial conditions.....	174
7.4.2.4A.2	Procedure.....	174
7.4.2.5	Test requirements.....	175

Annex A (normative): Test system characterization and environmental requirements.....176

A.1	General	176
A.2	Phantom specifications.....	176
A.2.1	Head phantom	176
A.2.2	Hand phantom	176
A.2.2.1	General.....	176
A.2.2.2	Dimensions	176
A.2.2.3	Dielectric properties.....	178
A.2.2.4	Hand phantom grips.....	178
A.2.2.5	Mechanical Requirements of Hand Phantoms	180
A.2.3	Laptop Ground Plane Phantom	181
A.2.4	Parameters for embedded devices	183
A.2.4.1	General.....	183

A.2.4.2	Notebook	183
A.2.4.3	Tablet.....	184
A.3	Anechoic chamber constraints.....	184
A.3.1	General	184
A.3.2	Quiet zone dimension.....	187
A.3.3	Minimum Range Length	187
A.3.4	Reflectivity of the quiet zone	188
A.3.5	Shielding effectiveness of the chamber	188
A.4	Reverberation chamber constraints	188
A.4.1	General	188
A.4.2	Positioning and mode stirring facilities	189
A.4.3	Polarization imbalance and receiving antennas	189
A.4.4	Measurement antennas	190
A.4.5	Chamber size and characteristics.....	190
A.4.6	Shielding effectiveness of the chamber	190
A.5	Anechoic chamber constraints for Radiated Performance of Multiple-antenna Receivers	190
A.5.1	General	190
A.5.1.1	Multi-probe Anechoic Chamber	191
A.5.1.1.1	Concept and configuration	192
A.5.1.2	Radiated Two-Stage	193
A.5.1.2.1	Concept and configuration.....	194
A.5.2	Testing environment conditions	195
A.5.2.1	MPAC Positioning Guidelines.....	202
A.5.2.2	RTS Positioning Guidelines and test zone dimensions	206
Annex B (normative):	Calibration.....	207
B.1	General	207
B.2.1	Calibration procedure for Anechoic chamber method.....	207
B.2.2	Calibration procedure for Reverberation chamber method	208
B.2.2.1	Measurement of S-parameters through the chamber for a complete stirring sequence.....	209
B.2.2.2	Calculation of the chamber reference transfer function.....	210
B.2.2.3	Cable calibration.....	210
B.2.3	Calibration procedure for Anechoic chamber method with Multiprobe configuration	211
B.2.3.1	Example Calibration Procedure	211
B.2.4	Calibration procedure for RTS method	213
Annex C (informative):	Measurement test report	215
C.1	General	215
Annex D (normative):	Maximum uncertainty of test system and test tolerance.....	216
D.1	Maximum uncertainty of test system	216
D.2	Test tolerances.....	219
Annex E (informative):	Estimation of measurement uncertainty.....	223
E.1	General	223
E.2	Mismatch uncertainty between measurement receiver and the probe antenna.....	228
E.2.1	Total combined mismatch uncertainty calculations.....	228
E.2.1.1	Mismatch uncertainty through the connector between two elements	228
E.2.1.2	Mismatch uncertainty due to the interaction of several elements	229
E.2.2	Total combined mismatch uncertainty	230
E.3	Mismatch uncertainty of the RF relay	230
E.3.1	First part: RF Relay switched on the co-polarized signal	231
E.3.1.1	The mismatch through the connector between two elements	231
E.3.1.2	Mismatch due to the interaction between two elements or more	231
E.3.2	Second part: RF relay switched on the cross-polarized signal	232
E.3.2.1	The mismatch through the connector between two elements	232

E.3.2.2	Mismatch due to the interaction between two elements or more	232
E.3.3	Total combined mismatch uncertainty	233
E.4	Insertion loss of the probe antenna cable	233
E.5	Insertion loss of the probe antenna attenuator (if used)	233
E.6	Insertion loss of the RF relays (if used).....	233
E.7	Influence of the antenna cable.....	234
E.7.1	Probe antenna cable.....	234
E.7.2	Calibration antenna cable	234
E.8	Absolute gain of the probe antenna.....	234
E.9	Measurement receiver: uncertainty of absolute level	234
E.10	Measurement distance	234
E.10.1	Offset of DUT phase centre from axis(es) of rotation	234
E.10.2	Mutual coupling	235
E.10.3	Phase curvature	235
E.11	Quality of quiet zone	235
E.12	Tx-power drift of DUT.....	235
E.13	Uncertainty related to the use of phantoms	236
E.13.1	Uncertainty from using different types of SAM phantom	236
E.13.2	Simulated tissue liquid uncertainty.....	236
E.13.3	Uncertainty of dielectric properties and shape of the hand phantom	236
E.13.4	Uncertainty from using different types of Laptop Ground Plane phantom.....	238
E.14	Coarse sampling grid.....	238
E.15	Random uncertainty	239
E.16	Uncertainty of network analyzer	240
E.17	Uncertainty of the gain/efficiency of the calibration antenna.....	240
E.18	Base station simulator: uncertainty of the absolute level	240
E.19	BER measurement: output level step resolution.....	240
E.20	Statistical uncertainty of the BER measurement	240
E.21	BER data rate normalization uncertainty.....	241
E.22	DUT sensitivity drift	241
E.23	Cable loss measurement uncertainty	241
E.24	Signal generator: uncertainty of the absolute output level	242
E.25	Signal generator: output level stability.....	242
E.26	Insertion loss: calibration antenna feed cable.....	242
E.27	Insertion loss: calibration antenna attenuator (if used).....	242
E.28	Chamber Statistical Ripple and Repeatability	242
E.29	Additional Power Loss in EUT Chassis	242
Annex F (informative):	Suggested recipes of liquid to be used inside SAM phantom.....	257
F.1	General	257
Annex G (informative):	Anechoic chamber specification and validation method.....	258
G.1	Shielded anechoic chamber specifications	258
G.2	Quiet zone reflectivity level validation	258
G.2.1	Description of a practical method for Quiet Zone characterization	258
G.3	Standard deviation of electric field.....	259
Annex H (informative):	Reverberation chamber specifications and validation method.....	261
H.1	Shielded reverberation chamber specifications	261
H.2	Reverberation chamber statistical ripple and repeatability validation.....	261
Annex I (informative):	Recommended performance for Handheld UE.....	263
I.1	General	263
I.2	Total Radiated Power	263
I.2.1	Beside the head phantom position.....	263
I.2.1.1	UTRA FDD	263
I.2.1.2	UTRA LCR TDD	264

I.2.2	Beside the head and hand phantoms position	264
I.2.2.1	UTRA FDD	264
I.2.2.2	UTRA LCR TDD	264
I.2.2.3	E-UTRA FDD	265
I.2.2.4	E-UTRA TDD	265
I.2.3	Hand phantom browsing mode position	265
I.2.3.1	UTRA FDD	265
I.2.3.2	UTRA LCR TDD	265
I.2.3.3	E-UTRA FDD	266
I.2.3.4	E-UTRA TDD	266
I.3	Total Radiated Sensitivity	266
I.3.1	Beside the head phantom position	266
I.3.1.1	UTRA FDD	266
I.3.1.2	UTRA LCR TDD	267
I.3.2	Beside the head and hand phantoms position	267
I.3.2.1	UTRA FDD	267
I.3.2.2	UTRA LCR TDD	267
I.3.2.3	E-UTRA FDD	268
I.3.2.4	E-UTRA TDD	268
I.3.3	Hand phantom browsing mode position	268
I.3.3.1	UTRA FDD	268
I.3.3.2	UTRA LCR TDD	269
I.3.3.3	E-UTRA FDD	269
I.3.3.4	E-UTRA TDD	269

Annex J (informative): Recommended performance for LME269

J.1	General	269
J.2	Total Radiated Power	269
J.2.1	UTRA FDD	269
J.2.2	UTRA LCR TDD	270
J.2.3	E-UTRA FDD	270
J.2.4	E-UTRA TDD	270
J.3	Total Radiated Sensitivity	270
J.3.1	UTRA FDD	271
J.3.2	UTRA LCR TDD	271
J.3.3	E-UTRA FDD	271
J.3.4	E-UTRA TDD	271

Annex K (informative): Recommended performance for LEE271

K.1	General	271
K.2	Total Radiated Power	272
K.2.1	UTRA FDD	272
K.2.2	UTRA LCR TDD	273
K.2.3	E-UTRA FDD	273
K.2.4	E-UTRA TDD	273
K.3	Total Radiated Sensitivity	273
K.3.1	UTRA FDD	274
K.3.2	UTRA LCR TDD	274
K.3.3	E-UTRA FDD	275
K.3.4	E-UTRA TDD	275

Annex L (informative): Multi-Probe Anechoic Chamber Specification and Validation Method276

L.1	Multi-probe anechoic chamber specifications	276
L.2	Multi-probe anechoic chamber minimum distance between the DUT and the measurement antenna	276
L.3	Multi-probe anechoic chamber quiet zone reflectivity level validation	276
L.4	Multi-probe anechoic chamber channel model verification	276

Annex M (normative): Channel Model emulation of the Base Station antenna pattern configuration for Radiated Performance of Multiple-antenna Receivers277

M.1	Channel Model(s).....	277
M.2	Base Station antenna pattern configuration.....	278
Annex N (informative):	Estimation of measurement uncertainty for Multiple-antenna receivers	279
N.1	General	279
N.2	Fading channel emulator output uncertainty	283
N.3	External Amplifiers Uncertainty Terms	284
N.3.1	Stability	284
N.3.2	Linearity	284
N.3.3	Noise Figure	284
N.3.4	Mismatch.....	284
N.3.5	Gain	284
Annex O (normative):	Environmental conditions	285
O.1	General	285
O.2	Environmental requirements	285
O.2.1	Temperature	285
O.2.2	Voltage	285
Annex P (normative):	Base Station (BS) configuration for Radiated Performance of Multiple-antenna Receivers	286
P.1	eNodeB emulator settings	286
Annex Q (informative):	RTS Anechoic Chamber Specification and Validation Method	289
Q.1	RTS anechoic chamber specifications	289
Q.2	RTS anechoic chamber minimum distance between the DUT and the measurement antenna	289
Q.3	RTS anechoic chamber quiet zone reflectivity level validation	289
Q.4	RTS anechoic chamber channel model verification	289
Annex R:	UE ATF Requirements.....	290
R.1	RSAP	290
R.2	RSARP	290
Annex S:	Change history	291
History		292
