COMMITTEE DRAFT FOR VOTE (CDV)

PROJECT NUMBER: **IEC 61131-9 ED2**	
DATE OF CIRCULATION: **2021-05-07**	CLOSING DATE FOR VOTING: **2021-07-30**
SUPERSEDES DOCUMENTS: **65B/1196/RR**	

IEC SC 65B : MEASUREMENT AND CONTROL DEVICES	
SECRETARIAT: United States of America	SECRETARY: Mr Angus Low
OF INTEREST TO THE FOLLOWING COMMITTEES: TC 65,SC 65C	PROPOSED HORIZONTAL STANDARD: ☐ Other TC/SCs are requested to indicate their interest, if any, in this CDV to the secretary.
FUNCTIONS CONCERNED: ☐ EMC ☐ ENVIRONMENT ☐ QUALITY ASSURANCE ☐ SAFETY	
☒ SUBMITTED FOR CENELEC PARALLEL VOTING	☐ NOT SUBMITTED FOR CENELEC PARALLEL VOTING
Attention IEC-CENELEC parallel voting The attention of IEC National Committees, members of CENELEC, is drawn to the fact that this Committee Draft for Vote (CDV) is submitted for parallel voting. The CENELEC members are invited to vote through the CENELEC online voting system.

Title:
Programmable controllers — Part 9: Single-drop digital communication interface for small sensors and actuators (SDCI)

This draft has no official front page. This front page is for internal use only. The official front pages will be added later before circulation of the document to IEC National Committees.

For the sake of estimating the translation effort for this edition 2: The following graph identifies clauses with changes beyond simple corrections (typos, etc.). The corresponding headers in the document are marked in yellow. Recent changes requested by the support organization are marked in yellow too.

Annex G (normative) Structure of the Data Storage data object 286
Annex H (normative) Master and Device conformity 287
H.1 Electromagnetic compatibility requirements (EMC) 287
H.1.1 General 287
H.1.2 Operating conditions 287
H.1.3 Performance criteria 287
H.1.4 Required immunity tests 288
H.1.5 Required emission tests 288
H.1.6 Test configurations for Master 289
H.1.7 Test configurations for Devices 290
H.2 Test strategies for conformity 291
H.2.1 Test of a Device 291
H.2.2 Test of a Master 291
Annex I (informative) Residual error probabilities 293
I.1 Residual error probability of the SDCI data integrity mechanism 293
I.2 Derivation of EMC test conditions 293
Annex J (informative) Example sequence of an ISDU transmission 295
Annex K (informative) Recommended methods for detecting parameter changes 297
K.1 CRC signature 297
K.2 Revision counter 297
Bibliography 298
