This draft European Standard is submitted to CEN members for enquiry. It has been drawn up by the Technical Committee ASD-STAN.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

1bd7037beab5/osist-pren-4604-003-2022

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

**Warning :** This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

## European foreword

This document (prEN 4604-003:2022) has been prepared by the Aerospace and Defence Industries Association of Europe — Standardization (ASD-STAN).

After enquiries and votes carried out in accordance with the rules of this Association, this document has received the approval of the National Associations and the Official Services of the member countries of ASD-STAN, prior to its presentation to CEN.

This document is currently submitted to the CEN Enquiry.

This document will supersede EN 4604-003:2019.

For a list of the changes between prEN 4604-003:2022 and EN 4604-003:2019, see Annex A.

## prEN 4604-003:2022 (E)

### 1 Scope

This document specifies the characteristics of a UV laser printable coaxial cable, 50 Ω, type WZ, for use in aircraft electrical systems at operating temperatures between -65 °C and 200 °C and especially for high frequency up to 6 GHz.

The document encloses also a regular and reinforced cable version (code R) which is used for sensitive systems with controlled VSWR.

### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

### 3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 3475-100:2010 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <https://www.electropedia.org/>

#### 3.1

##### **epsilon ( $\epsilon$ )**

value of dielectric constant TBD

### 4 Required characteristics

#### 4.1 Material, construction, dimensions and mass

##### 4.1.1 Material

[oSIST prEN 4604-003:2022](#)

Conductor		Dielectric		Shield		Cable		nom.	max.	nom.	max.
min.	max.	min.	max.	min.	max.	min.	max.	nom.	max.	nom.	max.
0,88	0,93	2,20	2,50	2,90	3,20	3,40	3,60	3,70	26	30	

#### 4.2 General characteristics

- Operating temperature: -65 °C to 200 °C.
- Minimum bend radius:
  - in static use: 37 mm;
  - in dynamic use: 55 mm.
- Performances are guaranteed up to 6 GHz.

#### 4.3 Electrical characteristics

- Characteristic impedance:  $Z_c = 50 \Omega$ .
- Maximum power handling (at sea level): see Table 3 and Figure 2.
- Attenuation versus frequency: see Table 3 and Figure 2.
- Capacitance per unit length: 88 pF/m max.
- Velocity of propagation:  $v \geq 225\ 000 \text{ km/s}$  ( $vr = 0,75 \% \text{ min.}$ ).

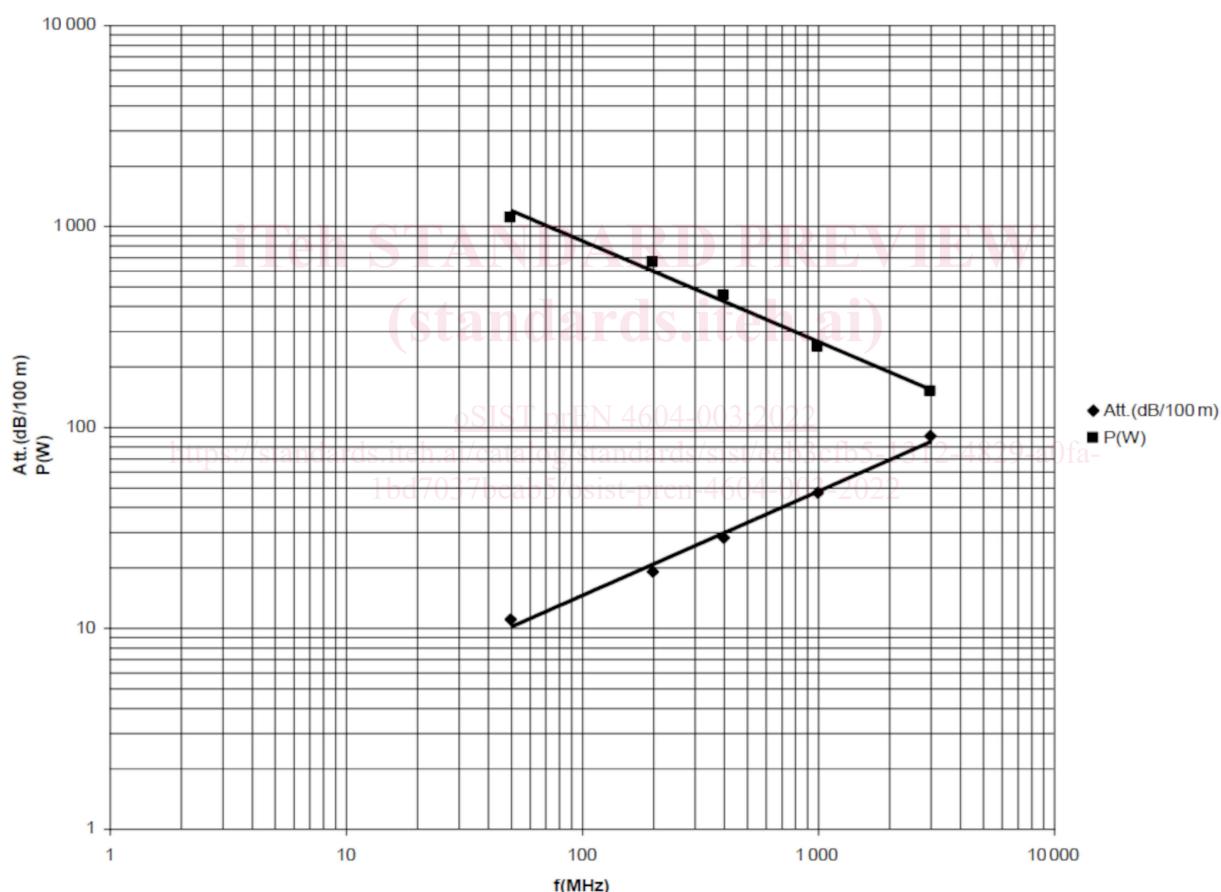

## prEN 4604-003:2022 (E)

— Transfer impedance from 1 MHz to 6 000 MHz: 30 mΩ/m max.

**Table 3 — Frequency, attenuation, power handling and return loss**
