

EUROPEAN STANDARD

EN 15560

NORME EUROPÉENNE

EUROPÄISCHE NORM

August 2023

ICS 65.080

Supersedes EN 15560:2009

English Version

## Inorganic fertilizers - Determination of total nitrogen in calcium cyanamide nitrate free

Engrais inorganiques - Dosage de l'azote total dans la cyanamide calcique exempte de nitrate

Anorganische Düngemittel - Bestimmung von Gesamtstickstoff in nitratfreiem Kalkstickstoff

This European Standard was approved by CEN on 26 June 2023.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

## European foreword

This document (EN 15560:2023) has been prepared by Technical Committee CEN/TC 260 “Fertilizers and liming materials”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by February 2024, and conflicting national standards shall be withdrawn at the latest by February 2024.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 15560:2009.

In comparison with the previous edition EN 15560:2009, the following technical modifications have been made:

- deletion of former tables and addition of a technically revised Table (8.2);
- rewording of the control test (8.4);
- deletion of distillation apparatus drawings;
- rewording of the Expression of the result (Clause 8).

This document has been prepared under a standardization request addressed to CEN by the European Commission. The Standing Committee of the EFTA States subsequently approves these requests for its Member States.

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

## EN 15560:2023 (E)

### 1 Scope

This document specifies a method for the determination of total nitrogen in nitrate-free calcium cyanamide.

### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 1482-2, *Fertilizers and liming materials — Sampling and sample preparation — Part 2: Sample preparation*

EN 12944-1, *Fertilizers and liming materials — Vocabulary — Part 1: General terms*

EN 12944-2, *Fertilizers and liming materials — Vocabulary — Part 2: Terms relating to fertilizers*

### 3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 12944-1 and EN 12944-2 apply.

ISO and IEC maintain terminology databases for use in standardization at the following addresses:

- IEC Electropedia: available at <https://www.electropedia.org/>
- ISO Online browsing platform: available at <https://www.iso.org/obp>

### 4 Principle

Digestion in sulfuric acid with the aid of a catalyst. Distillation of the ammonia from an alkaline solution, absorption in an excess of sulfuric acid volumetric solution and back-titration with sodium or potassium hydroxide volumetric solution.

### 5 Reagents

Use only reagents of recognized analytical grade and water with an electrical conductivity < 0,5 mS/m (at 25 °C).

**5.1 Sulfuric acid**, mass concentration  $\rho_{20} = 1,84$  g/ml

**5.2 Potassium sulphate**, analytical grade

**5.3 Catalyst**

Use 0,3 g to 0,4 g of copper (II)oxide or 0,95 g to 1,25 g of copper (II) sulphate pentahydrate for each determination.

**5.4 Sulfuric acid**, substance concentration  $c = 0,05$  mol/l

**5.5 Sodium or potassium hydroxide**, substance concentration  $c = 0,1$  mol/l, carbonate free
