NORME EUROPÉENNE

EUROPÄISCHE NORM

April 2024

ICS 93.080.30

English Version

Road traffic noise reducing devices - Sustainability: Key Performance Indicators (KPIs) Declaration

Dispositifs de réduction du bruit du trafic routier -
Contribution au développement durable : Déclaration
des indicateurs d'impact environnemental

Lärmschutzvorrichtungen an Straßen -
Nachhaltigkeitsbewertung: Deklaration der
Leistungsindikatoren

This European Standard was approved by CEN on 29 January 2024.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

European foreword

This document (EN 17383:2024) has been prepared by the Technical Committee CEN/TC 226 “Road equipment”, the secretariat of which is held by AFNOR, it concerns the whole life sustainability of Road Traffic Noise Reducing Devices (RTNRDs).

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2024, and conflicting national standards shall be withdrawn at the latest by October 2024.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

Any feedback and questions on this document should be directed to the users’ national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

EN 17383:2024 (E)**Introduction**

When placing a construction product on the European market the manufacturer may be expected to present a Declaration of Performance (DoP) with reference to the Basic Work Requirements (BWRs) as listed in the CPR (Construction Product Regulation EU 305/2011).

The performance declared with reference to BWR 7 (Sustainable Use of Natural Resources) corresponds to the Environmental Product Declaration (EPD) as referred to in EN 15804:2012+A2:2019/AC:2021 which provides core rules for all construction products and services.

This document provides specific rules for Environmental Product Declarations (EPD) specifically for Road Traffic Noise Reducing Devices (RTNRD).

It is intended as a supporting standard for the manufacturer to declare the performance of RTNRD in the context of the assessment of the sustainability of civil engineering works as in EN 17472:2021: Sustainability of construction works — Sustainability assessment of civil engineering works — Calculation methods.

This document presents Environmental Impact Indicators the RTNRD manufacturers will provide to declare the performance of RTNRD with reference to BWR7 and to allow better understanding on how their product can be considered “sustainable”.

Considerations for materials (e.g. steel coils, panels of mineral wools, acryl transparent sheet, ..) if not related to the intended use (RTNRD) are not covered by this document.

This document is also intended to help manufacturers to identify the materials and product stages with the most important impact on different sustainability aspects.

Besides manufacturers other users of present standard are foreseen:

- designers when calculating the Life Cycle Assessment (LCA) of the product used.
- Third parties implementing infrastructure rating systems to determine how the project of the construction work has incorporated sustainability.
- Procuring entities can use the Environmental Impact Indicators in tender specifications to promote more sustainable solutions and innovations.
- Private developers to use RTNRDs on their own land like those used on public roads.

Declared Environmental Impact Indicators will be provided according to the valid standards at the time of product placing on the market.
