## COMMITTEE DRAFT FOR VOTE (CDV)

PROJECT NUMBER:

**IEC 61139-3 ED1**

DATE OF CIRCULATION:

**2022-09-30**

CLOSING DATE FOR VOTING:

**2022-12-23**

SUPERSEDES DOCUMENTS:

**65C/1140/CD, 65C/1166A/CC**

IEC SC 65C : INDUSTRIAL NETWORKS	
SECRETARIAT: France	SECRETARY: Ms Valérie DEMASSIEUX
OF INTEREST TO THE FOLLOWING COMMITTEES: SC 22G, TC 57, TC 65, SC 65B, SC 121A	PROPOSED HORIZONTAL STANDARD: <input type="checkbox"/> Other TC/SCs are requested to indicate their interest, if any, in this CDV to the secretary.
FUNCTIONS CONCERNED: <input type="checkbox"/> EMC <input type="checkbox"/> ENVIRONMENT <input type="checkbox"/> QUALITY ASSURANCE <input type="checkbox"/> SAFETY	
<input checked="" type="checkbox"/> SUBMITTED FOR CENELEC PARALLEL VOTING <b>Attention IEC-CENELEC parallel voting</b> The attention of IEC National Committees, members of CENELEC, is drawn to the fact that this Committee Draft for Vote (CDV) is submitted for parallel voting. The CENELEC members are invited to vote through the CENELEC online voting system.	<input type="checkbox"/> NOT SUBMITTED FOR CENELEC PARALLEL VOTING

This document is still under study and subject to change. It should not be used for reference purposes.

Recipients of this document are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

TITLE:

**Industrial networks – Single-drop digital communication interface – Part 3: Wireless extensions**

PROPOSED STABILITY DATE: 2027

NOTE FROM TC/SC OFFICERS:

NC comments will be addressed during the SC65C/WG16 web meeting scheduled on February 10th, 2023. A corresponding meeting notice will be provided in due time by the convener.

3	FOREWORD .....		20
4	INTRODUCTION .....		22
5	1 Scope .....		23
6	2 Normative references .....		23
7	3 Terms and definitions, abbreviated terms and conventions .....		23
8	3.1 Terms and definitions .....		24
9	3.2 Abbreviated terms .....		29
10	3.3 Conventions .....		31
11	3.3.1 General .....		31
12	3.3.2 Service primitives .....		31
13	3.3.3 Service parameters .....		31
14	3.3.4 Service procedures .....		32
15	3.3.5 Service attributes .....		32
16	3.3.6 Figures .....		33
17	3.3.7 Transmission octet order .....		34
18	3.3.8 Behavioral descriptions .....		34
19	3.3.9 Triple table format .....		34
20	4 Overview of wireless digital communication interface .....		34
21	4.1 Purpose and topology .....		34
22	4.2 Positioning in the automation hierarchy .....		35
23	4.2.1 General .....		35
24	4.2.2 Relationship to IEC 61131-9 .....		36
25	4.2.3 Role of a W-Master .....		37
26	4.2.4 Role of a W-Device .....		38
27	4.2.5 Role of a W-Bridge .....		38
28	4.2.6 System configuration tool .....		38
29	4.2.7 Mapping to fieldbuses .....		38
30	4.3 Cell concept .....		38
31	4.4 Wireless Mechanisms .....		39
32	4.4.1 General .....		39
33	4.4.2 Scan (W-Device Discovery) .....		39
34	4.4.3 Pairing .....		40
35	4.4.4 Unpairing .....		40
36	4.4.5 Roaming .....		40
37	4.4.6 Transmission Error Handling .....		41
38	4.4.7 "I am alive" supervision (IMA) .....		42
39	4.4.8 Wireless Quality supervision .....		42
40	4.5 Concept of Air Interface .....		42
41	4.5.1 General .....		42
42	4.5.2 Frequency Division Multiple Access (FDMA) .....		42
43	4.5.3 Time Division Multiple Access (TDMA) .....		43
44	4.5.4 SSlots, DSlots, Transmission capacity .....		44
45	4.5.5 Assignment of W-Devices to W-Tracks and slots .....		44
46	4.5.6 Assignment of W-Ports to W-Devices .....		45
47	4.5.7 W-Cycle .....		45

48	4.5.8	W-Frame .....	46
49	4.6	Characteristics of the SDCI-W technology .....	46
50	4.7	Layer model .....	47
51	4.8	Conformity assessment.....	48
