EN 16484:2023 (E)**Introduction**

This document has been prepared for defining the conditions for determining the origin of the leather production in conformity with the international Non-Preferential Rules of Origin and for fulfilling, where applicable, the requirements for supplying the declaration of the country of origin of the leather production.

When the origin of the leather production is declared, it is essential to make certain that the statement is accurate. Therefore, it needs to relate to objective and verifiable requirements.

This document applies to leather only. Leather articles, such as leather bags, leather goods, leather accessories, leather footwear, leather clothes or leather clothes accessories, leather upholstered furniture, etc. are subject to their own respective rules of origin. It is not possible to determine implicitly the origin of leather used (partially or totally) from the declared origin of leather articles. Conversely, the origin of the leather used does not automatically confer the origin to the leather article.
