EN 17873:2023 (E)**Introduction**

This document supports the existing product standards for factory made underlays for discontinuous roof coverings and walls by complementing the instructions for mounting and fixing for reaction to fire testing. The information given in this document comprises exposure to thermal attack, choice of substrates, consideration and orientation of joints and edges as well as product orientation and fixation of test specimen, to define unambiguous test conditions in the small-scale burner test and in the single burning item test.
