(ISO 56000:2025)

This European Standard was approved by CEN on 24 January 2025.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

European foreword

This document (EN ISO 56000:2025) has been prepared by Technical Committee ISO/TC 279 "Innovation management" in collaboration with Technical Committee CEN/TC 389 "Innovation Management" the secretariat of which is held by UNE.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by July 2025, and conflicting national standards shall be withdrawn at the latest by July 2025.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN ISO 56000:2021.

Any feedback and questions on this document should be directed to the users' national standards body/national committee. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

ISO 56000:2025(en)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 279, *Innovation management*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 389, *Innovation Management*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO 56000:2020), which has been technically revised.

The main changes are as follows:

- new definitions have been added;
- Annex A has been deleted, and Annex B has been renamed as [Annex A](#);
- alignment with ISO 56001.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

ISO 56000:2025(en)

Introduction

0.1 General

The ability of organizations to innovate is recognized as a critical factor for their viability, competitiveness, resilience and renewal, and for the sustainable development of society.

The innovation capabilities of an organization include the ability to understand and respond to changing conditions of its context, to pursue new opportunities and to leverage the knowledge and creativity of people within the organization and in collaboration with external interested parties.

This document is intended to help the user by establishing a coherent, consistent and common framework to:

- a) understand the main terms, definitions, concepts and principles of innovation management;
- b) support an organization to establish, implement, maintain and continually improve an innovation management system;
- c) support an organization to utilize other innovation management standards;
- d) facilitate communication and create awareness of innovation activities internally and across organizations.

It can be used by:

- organizations establishing and using an innovation management system or performing innovation management assessments;
- organizations that need to improve their ability to effectively manage innovation activities;
- users, customers and other relevant interested parties seeking confidence in the innovation capabilities of an organization;
- organizations and interested parties seeking to improve communication through a common understanding of the vocabulary used in innovation management;
- providers of education and training in the assessment of or consultancy for innovation management and innovation management systems;
- developers of innovation management and related standards.

[Clause 3](#) specifies the terms and definitions that are necessary to understand innovation management and an innovation management system.

[Clause 4](#) provides the fundamental concepts and innovation management principles, describing why organizations should engage in innovation activities, the main concepts regarding innovation and the principles that an organization should consider as the basis for the effective management of innovation activities as well as the foundation of the innovation management system.

[Annex A](#) presents the relationship between the definitions within this document and those provided by other policy-setting organizations.

0.2 Relationships with other standards on innovation management

This document relates to standards on innovation management developed by ISO/TC 279, as follows:

- a) ISO 56001 provides requirements for organizations to establish, implement, maintain and continually improve an innovation management system.
- b) ISO 56002 gives guidance on how to establish, implement, maintain and continually improve an innovation management system with a focus on established organizations.

ISO 56000:2025(en)

- c) ISO 56003 gives guidance on how to plan, prepare and engage for external innovation partnerships at the level of a project, programme or initiative.
- d) ISO/TR 56004 gives guidance on how to choose, prepare, conduct, measure and improve an innovation management assessment. It does not directly apply to the management system approach in this document.
- e) ISO 56005 gives guidance on how to manage intellectual property throughout the innovation processes and the development of an innovation initiative.
- f) ISO 56006 gives guidance on how to set up and support the strategic intelligence activities of continuous monitoring, intelligence dissemination and document control.
- g) ISO 56007 gives guidance on how to systematically manage opportunities and ideas to realize value from innovation activities and arrive at decisions for development.
- h) ISO 56008 gives guidance on how to develop, define, implement, evaluate and improve the measurements needed to effectively manage individual innovation initiatives.
- i) ISO/TS 56010 provides an understanding of the most essential concepts in innovation management. It is intended to be used as an introduction to the standards on innovation management developed by ISO/TC 279.
