

SLOVENSKI STANDARD oSIST prEN IEC 62149-3:2023

01-marec-2023

Aktivne komponente in naprave optičnih vlaken - Izvedbeni standardi - 3. del: Laserski diodni oddajniki z integriranim modulatorjem za optične prenosne sisteme 40 Gbit/s

Fibre optic active components and devices - Performance standards - Part 3: Modulatorintegrated laser diode transmitters for 40-Gbit/s fibre optic transmission systems

Aktive Lichtwellenleiterbauelemente und -geräte - Betriebsverhalten - Teil 3: Sender mit modulatorintegrierten Laserdioden für 40 Gbit/s-Lichtwellenleiter-Übertragungssysteme

Composants et dispositifs actifs fibroniques - Normes de performances - Partie 3: Émetteurs à diodes laser à modulateur intégré pour systèmes de transmission fibroniques 40 Gbit/s

COMMITTEE DRAFT FOR VOTE (CDV)

PROJECT NUMBER: IEC 62149-3 ED4 DATE OF CIRCULATION: 2023-01-06 SUPERSEDES DOCUMENTS: 86C/1799/CD, 86C/1818A/CC

IEC SC 86C : FIBRE OPTIC SYSTEMS AND ACTIVE DEVICES		
SECRETARIAT:	SECRETARY:	
United States of America	Mr Fred Heismann	
OF INTEREST TO THE FOLLOWING COMMITTEES:	PROPOSED HORIZONTAL STANDARD:	
	Other TC/SCs are requested to indicate their interest, if any, in this CDV to the secretary.	
FUNCTIONS CONCERNED:		
EMC ENVIRONMENT	QUALITY ASSURANCE SAFETY	
	NOT SUBMITTED FOR CENELEC PARALLEL VOTING	
Attention IEC-CENELEC parallel voting	andards	
The attention of IEC National Committees, members of CENELEC, is drawn to the fact that this Committee Draft for Vote (CDV) is submitted for parallel voting.		
The CENELEC members are invited to vote through the CENELEC online voting system.	nt Preview	

This document is still under study and subject to change. It should not be used for reference purposes.

Recipients of this document are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

TITLE:

Fibre optic active components and devices - Performance standards - Part 3: Modulator-integrated laser diode transmitters for 40-Gbit/s fibre optic transmission systems

PROPOSED STABILITY DATE: 2026

39		PERFORMANCE STANDARDS –
40		Part 3: Modulator intograted laser diode transmitters
41		for 40-Gbit/s fibre optic transmission systems
43		
44		FOREWORD
45 46 47 48 49 50 51 52 53	1)	The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
54 55 56	2)	The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
57 58 59 60	3)	IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
61 62 63	4)	In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
64 65 66	5)	IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
67	6)	All users should ensure that they have the latest edition of this publication.
68 69 70 71	7) s://sta	No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
72 73	8)	Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
74 75 76	9)	Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.
77 78	IE of	C 62149-3 has been prepared by subcommittee 86C: Fibre optic systems and active devices, IEC technical committee 86: Fibre optics. It is an International Standard.
79 80	Tł 1:	nis fourth edition cancels and replaces the third edition published in 2020 and Corrigendum 2021. This edition constitutes a technical revision.
81 82	Tł ec	nis edition includes the following significant technical changes with respect to the previous lition:
83	a)	specification of pull force for fibre pull test in Table 6 according to fibre type;
84	b)	change of symbol for kink free radiant power in Table 4 and Table 5;
85	c)	replacement of undefined symbols in Table 7;
86	d)	addition of IEC 62149-1 as a normative reference;
87	e)	addition of four ITU-T Recommendations in the Bibliography.
88	Tł	ne text of this International Standard is based on the following documents:

IEC CDV 62149-3/Ed4 © IEC 2023

- Full information on the voting for its approval can be found in the report on voting indicated in the above table.
- ⁹² The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/standardsdev/publications.

A list of all parts in the IEC 62149 series, published under the general title *Fibre optic active components and devices – Performance standards*, can be found on the IEC website.

99 The committee has decided that the contents of this document will remain unchanged until the 100 stability date indicated on the IEC website under "http://webstore.iec.ch" in the data related to 101 the specific document. At this date, the document will be

- 102 reconfirmed,
- 103 withdrawn,
- replaced by a revised edition, or
- 105 amended.
