EUROPEAN STANDARD

NORME EUROPÉENNE

EUROPÄISCHE NORM

EN ISO/IEC 19896-1

January 2023

ICS 35.030

English version

IT security techniques - Competence requirements for information security testers and evaluators - Part 1: Introduction, concepts and general requirements (ISO/IEC 19896-1:2018)

Techniques de sécurité IT - Exigences de compétence pour l'information testeurs d'assurance et les évaluateurs - Partie 1: Introduction, concepts et exigences générales (ISO/IEC 19896-1:2018)

IT-Sicherheitstechniken - Kompetenzanforderungen an Tester und Evaluatoren von Informationssicherheit - Teil 1: Einführung, Konzepte und allgemeine Anforderungen (ISO/IEC 19896-1:2018)

This European Standard was approved by CEN on 9 January 2023.

CEN and CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN and CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN and CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN and CENELEC members are the national standards bodies and national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

European foreword

The text of ISO/IEC 19896-1:2018 has been prepared by Technical Committee ISO/IEC JTC 1 "Information technology" of the International Organization for Standardization (ISO) and has been taken over as EN ISO/IEC 19896-1:2023 by Technical Committee CEN-CENELEC/ JTC 13 "Cybersecurity and Data Protection" the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by July 2023, and conflicting national standards shall be withdrawn at the latest by July 2023.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN-CENELEC shall not be held responsible for identifying any or all such patent rights.

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN and CENELEC websites.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

Endorsement notice

The text of ISO/IEC 19896-1:2018 has been approved by CEN-CENELEC as EN ISO/IEC 19896-1:2023 without any modification.

ISO/IEC 19896-1:2018(E)

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 27, *IT Security techniques*.

A list of all parts in the ISO/IEC 19896 series can be found on the ISO website.

Introduction

The objective of the ISO/IEC 19896 series is to provide the fundamental concepts related to the topic of the competence of the individuals responsible for performing IT product security evaluations and conformance testing. The ISO/IEC 19896 series provides the framework and the specialized requirements that specify the minimum competence of individuals performing IT product security evaluations and conformance testing using established standards.

In pursuit of this objective, the ISO/IEC 19896 series comprises the following:

a) The terms and definitions relating to the topic of competence in IT product security evaluators and testers;

b) The fundamental concepts relating to competence in IT product security evaluations and conformance testing; and

c) The minimum competence requirements for IT product security evaluators and testers to conduct IT product testing/evaluation.

The ISO/IEC 19896 series is of interest to:

a) Information security evaluation and conformance-testing specialists;

b) Information security evaluation and conformance-testing approval authorities;

c) Information security evaluation and conformance-testing laboratories;

d) Vendors or technology providers whose IT products can be the subject of information security assurance evaluations or conformance-testing;

e) Organizations offering professional credentials or recognitions.

The ISO/IEC 19896 series is organized in parts to address the competence of evaluation and testing professionals as follows.

In this document, the introduction and concepts, provides an overview of the definitions, fundamental concepts and a general description of the framework used to communicate the competence requirements for certain specialized areas. This material is aimed at providing the fundamental knowledge necessary to use the framework presented in the other parts of the ISO/IEC 19896 series appropriately.

ISO/IEC 19896-2 describes the minimum set of competence requirements at each competency level for conformance testers working with ISO/IEC 19790 and associated standards.

ISO/IEC 19896-3 describes the minimum set of competence requirements at each competency level for information security evaluators working with ISO/IEC 15408 (all parts) and associated standards.
