AMENDMENT 1
2019-12

**Petroleum and related products —
Determination of air-release
properties of steam turbine and other
oils — Impinger method**

AMENDMENT 1

*Pétroles et produits connexes — Détermination de l'aptitude à la
désaération des huiles pour turbine à vapeur et autres huiles —
Méthode Impinger*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 28, *Petroleum and related products, fuels and lubricants from natural or synthetic sources*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Petroleum and related products — Determination of air-release properties of steam turbine and other oils — Impinger method

AMENDMENT 1

Normative references

Replace all the references with the following:

ISO 3170, *Petroleum liquids — Manual sampling*

ISO 3696, *Water for analytical laboratory use — Specification and test methods*

ISO 6353-2, *Reagents for chemical analysis — Part 2: Specifications — First series*

ISO 6353-3, *Reagents for chemical analysis — Part 3: Specifications — Second series*

ISO 6743-4, *Lubricants, industrial oils and related products (class L) — Classification — Part 4: Family H (Hydraulic systems)*

ITEH STANDARD PREVIEW

Clause 5, first paragraph

ISO 9120:1997/Amd 1:2019

Replace the text with the following:
<https://standards.iteh.ai/catalog/standards/sist/b4156e6b-d6a4-4ea2-a2ad-080ca08ab7a0/iso-9120-1997-amd-1-2019>

During the analysis, unless otherwise stated, use only reagents specified in ISO 6353-2 and ISO 6353-3, or reagents of analytical reagent grade and water conforming to grade 3 of ISO 3696.

5.6

Replace the text with the following:

Cleaning solution, a strongly oxidizing cleaning solution, e.g. NOCHROMIX® and MICRO-90®¹.

Replace the warning with the following:

WARNING — Non-chromium-containing, strongly oxidizing acid cleaning solutions are also highly corrosive and potentially hazardous in contact with organic materials, but do not contain chromium which has special disposal problems."

Add the following footnote:

¹ NOCHROMIX® (acid cleaning solution) and MICRO-90® (alkaline cleaning solution) are examples of suitable non-chromium-containing products available commercially. This information is given for the convenience of users of this document and does not constitute an endorsement by ISO of these products. Equivalent products may be used if they can be shown to lead to the same results.

Clause 12, paragraph 1

Replace "ISO 4259" with "the ISO 4259 series".

Bibliography

Add bibliography with the following reference:

ISO 4259 (all parts), *Petroleum and related products — Precision of measurement methods and results*
