

Designation: C1393 – 11

Standard Specification for Perpendicularly Oriented Mineral Fiber Roll and Sheet Thermal Insulation for Pipes and Tanks¹

This standard is issued under the fixed designation C1393; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers the composition, dimensions, and physical properties of compression-resistant, perpendicularly oriented mineral fiber (rock, slag, or glass) roll and sheet insulation intended for use on flat, curved, or round surfaces operating at temperatures between 0°F (–18°C) and 1000°F (538°C). This product (pipe and tank insulation) is typically used on nominal 24 in. (610 mm) or greater diameter surfaces. For specific applications, the actual use temperatures and diameters shall be agreed upon between the manufacturer and the purchaser.

1.2 The orientation of the fibers within the roll or sheet insulation is essentially perpendicular to the heated/cooled surface (parallel to heat flow). This specification does not apply to flat block, board, duct wrap, or preformed pipe mineral fiber insulation where the insulation fiber orientation is generally parallel to the heated/cooled surface (across the heat flow).

1.3 For satisfactory performance, properly installed protective vapor retarders must be used in below ambient temperature applications to reduce movement of moisture/water vapor through or around the insulation towards the colder surface. Failure to use a vapor retarder can lead to insulation and system damage. Refer to Practice C921 to aid material selection. Although vapor retarders properties are not part of this specification, properties required in Specification C1136 are pertinent to application or performance.

1.4 The values stated in inch-pound units are to be regarded as standard. The values given in parentheses are mathematical conversions to SI units that are provided for information only and are not considered standard.

1.5 When the installation or use of thermal materials, accessories, and systems may pose safety or health problems, the manufacturer shall provide the user-appropriate current information regarding any known problems associated with the

recommended use for the products of the company and shall also recommend protective measures to be employed in their safe utilization. The user shall establish appropriate safety and health practices and determine the applicability of regulatory requirements prior to use.

1.6 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

TABLE 1 Physical Property Requirements^A

Properties	Type I	Type II	Type IIIA	Type IIIB	Type IVA	Type IVB
Maximum Use Temperature, ° F (°C) See Note 1 in 6.2.1	Up to 450 (232)	650 (343)	850 (454)	850 (454)	1000 (538)	1000 (538)
Apparent thermal conductivity Maximum Btu in./h-ft ² °F (W/m-K) Mean temperature, ° F (°C)						
25 (-4)	0.26(0.038)	0.26(0.038)	0.26(0.038)	0.26(0.038)	0.26(0.038)	0.27(0.039)
75 (24)	0.27(0.039)	0.27(0.039)	0.27(0.039)	0.27(0.039)	0.27(0.039)	0.28(0.040)
100 (38)	0.29(0.042)	0.29(0.042)	0.29(0.042)	0.29(0.042)	0.29(0.042)	0.30(0.043)
200 (93)	0.38(0.055)	0.38(0.055)	0.38(0.055)	0.36(0.052)	0.36(0.052)	0.36(0.052)
300 (149)	0.48(0.069)	0.48(0.069)	0.48(0.069)	0.45(0.065)	0.45(0.065)	0.43(0.062)
400 (204)	0.61(0.088)	0.61(0.088)	0.61(0.088)	0.54(0.078)	0.54(0.078)	0.50(0.072)
500 (260)		0.81(0.117)	0.81(0.117)	0.66(0.095)	0.66(0.095)	0.58(0.084)
600 (316)					0.82(0.118)	0.67(0.097)
Category 1—Greater compressive resistance, minimum load required to produce a 10 % reduction in thickness, lb/ft ² (kPa)	120 (5.7)	120 (5.7)	120 (5.7)	120 (5.7)	120 (5.7)	200 (9.6)
Category 2—Lesser compressive resistance, minimum load required to produce a 10 % reduction in thickness, lb/ft ² (kPa)	25 (1.2)	25 (1.2)	25 (1.2)	25 (1.2)	25 (1.2)	25 (1.2)
Water vapor sorption, max % by weight	5.0	5.0	5.0	5.0	5.0	5.0
Density, maximum lb/ft ³ (kg/m ³) ^B	6 (96)	6 (96)	6 (96)	6 (96)	6 (96)	8 (128)
Surface burning characteristics:						
Maximum flame spread index	25	25	25	25	25	25
Maximum smoke developed index	50	50	50	50	50	50

^ARefer to Section 7 for additional physical property requirements.

^BThe maximum density specified is for weight design purposes only. It is acceptable for additional density requirements to be specified as agreed upon between the purchaser and the manufacturer.

3. Terminology

3.1 *Definitions*—Definitions pertaining to insulation are in accordance with Terminology C168.

3.2 *Definitions of Terms Specific to This Standard:*

3.2.1 *delivered density*—the actual density, calculated by shipped weight divided by volume, of the product transported by the manufacturer or the seller and received by the purchaser.

3.2.2 *facing*—a layer or foundation of thin material which is adhered to the insulation to form a continuous roll or sheet of insulation.

3.2.3 *mean temperature*—the sum of the cold surface temperature and the hot surface temperature divided by two.

4. Classification

4.1 Mineral fiber roll or sheet insulation covered by this specification is classified into the six types and two categories shown in Table 1. This classification is based upon the maximum use temperature, maximum apparent thermal conductivity, and compressive resistance properties.

4.1.1 *Types:*

4.1.1.1 *Type I*—Maximum use temperature up to 450°F (232°C).

4.1.1.2 *Type II*—Maximum use temperature up to 650°F (343°C).

4.1.1.3 *Type IIIA*—Maximum use temperature up to 850°F (454°C).

4.1.1.4 *Type IIIB*—Maximum use temperature up to 850°F (454°C).

4.1.1.5 *Type IVA*—Maximum use temperature up to 1000°F (538°C).

4.1.1.6 *Type IVB*—Maximum use temperature up to 1000°F (538°C).
