Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see <http://patents.iec.ch>).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by INCITS (as INCITS 509-2014) and drafted in accordance with its editorial rules. It was assigned to Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 25, *Interconnection of information technology equipment*, and adopted under the "fast-track procedure".

This corrected version of ISO/IEC 14165-246:2019 incorporates the following corrections: throughout the document, formatting errors affecting the links have been corrected. This has also resulted in a different pagination of the document.

A list of all parts in the ISO/IEC 14165 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

5.4.3.5 B_Port Platform Management Module (PMM)	49
5.4.4 IP Network Interface	49
5.5 FC-BB_IP network topologies	49
5.6 Mapping and message encapsulation using TCP/IP	51
5.6.1 Encapsulated frame structures	51
5.6.1.1 FC frame encapsulation structure	51
5.6.1.2 Encapsulated FCIP Special Frame (FSF) structure	52
5.6.2 TCP/IP encapsulation	53
5.7 FC-BB_IP protocol procedures	54
5.7.1 Overview	54
5.7.2 Procedures for platform management	54
5.7.2.1 Function	54
5.7.2.2 Procedures for discovery	54
5.7.2.3 Procedures for extending FC-SP-2 security	54
5.7.3 Procedures for connection management	56
5.7.3.1 Function	56
5.7.3.2 Procedures for link setup	57
5.7.3.3 Procedures for data transfer	57
5.7.3.4 Procedures for FCIP Link disconnection	58
5.7.3.5 Procedures for multiple connection management	58
5.7.4 Procedures for error detection recovery	58
5.7.4.1 Procedures for handling invalid FC frames	58
5.7.4.2 Procedures for error recovery	59
5.7.5 FC-BB_IP system parameters	59
5.7.5.1 FC timers	59

5.7.5.2	TCP timers	59
5.7.5.3	Maximum number of attempts to complete an encapsulated FC frame transmission	59
5.7.5.4	Maximum number of outstanding encapsulated FC frames	60
5.8	FC-BB_IP service considerations	60
5.8.1	Latency delay	60
5.8.2	Throughput	60
5.8.2.1	How timeouts affect throughput	60
5.8.2.2	How loss affects throughput	60
5.8.2.3	Other factors that affect throughput	60
5.8.3	Reliability	61
5.8.3.1	Loss of connectivity	61
5.8.3.2	Loss of synchronization	61
5.8.3.3	Loss or corruption of TCP segments	61
5.8.3.4	Loss or corruption of FC frames	61
5.8.3.5	FCIP error reporting	61
5.8.4	Quality of Service (QoS)	62
5.8.5	Delivery order	62
5.8.6	IP multicast and broadcast	62
5.8.7	Security and authentication	62
6	Transparent FC-BB (FC-BB_GFPT and FC-BB_PW) Structure and Concepts	64
6.1	Applicability	64
6.2	FC-BB_GFPT overview	64
6.3	FC-BB_PW overview	65
6.4	Transparent FC-BB functional model	66
6.4.1	Transparent FC-BB initialization	66
6.4.2	Transparent FC-BB initialization state machine	66
6.4.2.1	Initialization state machine keywords	66
6.4.2.2	Initialization state machine	66
6.4.3	Login Exchange Monitors	71
6.4.4	Port initialization parameter observation and modification	75
6.4.5	Handling of BB_SCs, BB_SCr, and R_RDY Primitive Signals and BB_Credit initialization	76
6.4.6	Transparent FC-BB Primitive Signals	77
6.4.7	Transparent FC-BB flow control	78
6.4.7.1	Overview	78
6.4.7.2	FC-BB_GFPT Alternate Simple Flow Control (ASFC)	78
6.4.7.3	FC-BB_PW Alternate Simple Flow Control (ASFC)	78
6.4.7.4	PING and PING_ACK signals	79
6.4.8	Adaptation of FC information for Transparent FC-BB	81
6.4.8.1	Adaptation of FC information for GFPT transport in FC-BB_GFPT	81
6.4.8.2	Adaptation of FC information for PW transport in FC-BB_PW	83
6.4.9	WAN Holdoff Timeout Value (WAN_HOLDOFF_TOV)	85
6.4.10	Transparent FC-BB frame compression encoding	85
6.4.10.1	FC-BB_GFPT FC frame compression	85
6.4.10.2	FC-BB_PW FC frame compression	86
6.4.10.3	LZS compression algorithm	86

Foreword (This foreword is not part of American National Standard INCITS 509-2014.)

This standard defines the functions and mappings for transporting Fibre Channel over various network technologies.

This standard was developed by Task Group T11.3 of Accredited Standards Organization INCITS during 2009-2013. The standards approval process started in 2012. This document includes annexes that are informative and are not considered part of the standard.

This standard includes seven annexes. Annex E is normative and is considered part of the standard. All of the other annexes are informative and are not considered part of the standard.

Requests for interpretation, suggestions for improvements or addenda, or defect reports are welcome. They should be sent to the INCITS Secretariat, Information Technology Industry Council, 1101 K Street, NW Suite 610, Washington, DC 20005.

This standard was processed and approved for submittal to ANSI by the International Committee for Information Technology Standards (INCITS). Committee approval of the standard does not necessarily imply that all committee members voted for its approval. At the time it approved this standard, INCITS had the following members:

Philip Wennblom, Chair
Jennifer Garner, Secretary

<i>Organization Represented</i>	<i>Name of Representative</i>
Adobe Systems Inc.	Scott Foshee
