## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 219, *Floor coverings*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 134, *Resilient, textile and laminate floor coverings*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).

# Resilient, textile and laminate floor coverings — Classification

## AMENDMENT 1: Elimination of class 22+

### *Scope*

Add the following NOTE at the end of the clause:

NOTE The wear and appearance of floor coverings are influenced by standards of installation and maintenance, the condition of the subfloor and the kind of use (type of footwear, high concentrations of localized traffic, etc). These factors are intended to be taken into account when using this classification system.

### *Normative references*

Replace the title of Clause 2 with 'Normative references' and add the following paragraph:

There are no normative references in this document.

### *Terms and definitions*

Replace the title of Clause 3 with 'Terms and definitions' and add the following paragraphs:

No terms and definitions are listed in this document.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <http://www.electropedia.org/>

### *Clause 2 Explanation of the classification system*

Designate the existing Clause 2 as Clause 4.

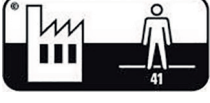

Delete the fourth paragraph.

### *Clause 3 Classification*

Designate the existing Clause 3 as Clause 5.

Replace [Table 1](#) with the following table:

Table 1 — Classification

Class	Symbol	Level of use	Description
		<b>DOMESTIC</b>	<b>Areas considered for residential use</b>
21		Moderate	Areas with low or intermittent use
22		General	Areas with medium use
23		Heavy	Areas with heavy use
		<b>COMMERCIAL</b>	<b>Areas considered for public and commercial use</b>
31		Moderate	Areas with low or intermittent use
32		General	Areas with medium use
33		Heavy	Areas with heavy use
34		Very heavy	Areas with intense use
		<b>LIGHT INDUSTRIAL</b>	<b>Areas considered for light industrial use</b>
41		Moderate	Areas where work is mainly sedentary with occasional use of light vehicles
42		General	Areas where work is mainly standing and/or with vehicular traffic
43		Heavy	Other light industrial areas

*Bibliography*

Delete the Bibliography and the reference to EN 685.
