Descriptors : leather, hides, trimming, presentation.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2820 was drawn up by Technical Committee ISO/TC 120, *Leather*, and circulated to the Member Bodies in April 1972.

It has been approved by the Member Bodies of the following countries :

Australia
Chile
Czechoslovakia
Egypt, Arab Rep. of
France
Hungary
India

Iran
Ireland
Israel
Italy
New Zealand
Poland
Romania

ISO 2820:1974

Spain
Thailand
Turkey
U.S.S.R.

The Member Bodies of the following countries expressed disapproval of the document on technical grounds :

United Kingdom
U.S.A.

Leather — Raw hides of cattle and horses — Method of trim

iTeh STANDARD PREVIEW (standards.iteh.ai)

1 SCOPE

This International Standard specifies the method of trimming the raw hides of cattle and horses, intended for the tanning industry.

2 FIELD OF APPLICATION

This International Standard is applicable to all cattle and horse hides obtained after slaughtering and flaying.

3 DEFINITION

For the purposes of this International Standard the following definition applies :

trim (of a hide) : The shape given to a hide with its ultimate use in mind.

4 METHOD OF TRIM

The trim of cattle or horse hides shall comply with the following requirements :

4.1 Cattle¹⁾

Hide presented without head (head cut straight behind the ears), shanks cut off at right-angles immediately above the knee (fore shanks) and the hock (hind shanks), tail cut off not more than 25 cm from the butt, without excess fat, flesh, or any other material unsuitable for making leather (see figure 1)²⁾.

4.2 Horses

Hide presented without muzzle, fore shanks cut off at right-angles immediately above the knee, hind shanks cut off at right-angles between the hock and the hoof, tail open and cut off not more than 25 cm from the butt (see figure 2).

1) This method of presentation represents the objective which is to be reached by international standardization. The various countries which use a different method of presentation should endeavour to reach this objective as soon as possible.

2) In order to establish with certainty the origin of a hide, it may be necessary to retain a part of the udder containing a teat on hides from cows.
