## INTERNATIONAL STANDARD

## ISO 10893-1

First edition 2011-04-01 **AMENDMENT 1** 2020-05

# Non-destructive testing of steel tubes —

Part 1:

#### Automated electromagnetic testing of seamless and welded (except submerged arc-welded) steel tubes for the verification of hydraulic (steaktightness<sup>ai</sup>)

https://standards.iteh.al/catalog/standards/sist/c74007a4-4e65-4008-2006e5aa3fe**the**:reference-notch; change acceptance criteria

Essais non destructifs des tubes en acier —

Partie 1: Contrôle automatisé électromagnétique pour vérification de l'étanchéité hydraulique des tubes en acier sans soudure et soudés (sauf à l'arc immergé sous flux en poudre)

AMENDEMENT 1: Changement de dimensions de l'entaille de référence; changement critères d'acceptation

Reference number ISO 10893-1:2011/Amd.1:2020(E)

#### Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see <a href="https://www.iso.org/directives">www.iso.org/directives</a>).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see <a href="https://www.iso.org/patents">www.iso.org/patents</a>).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see the following URL: <a href="https://www.iso.org/iso/foreword.stml">www.iso.org/iso/foreword.stml</a> no arcs.iten.ai

This document was prepared by Technical Committee ISO/TC 17, *Steel*, Subcommittee SC 19, *Technical delivery conditions for steel tubes for pressure purposes* 1:2020 https://standards.iteh.a/catalog/standards/sist/c74007a4-4e65-4008-b0bb-

Any feedback or questions on **this** document should be directed to the user's national standards body. A complete listing of these bodies can be found at <u>www.iso.org/members.html</u>.

## iTeh STANDARD PREVIEW (standards.iteh.ai)

<u>ISO 10893-1:2011/Amd 1:2020</u> https://standards.iteh.ai/catalog/standards/sist/c74007a4-4e65-4008-b0bbe5aa3fecc07d/iso-10893-1-2011-amd-1-2020

### Non-destructive testing of steel tubes —

#### Part 1: Automated electromagnetic testing of seamless and welded (except submerged arc-welded) steel tubes for the verification of hydraulic leaktightness

## AMENDMENT 1: Change of dimensions of the reference notch; change acceptance criteria

6.6.2.2, a) Width, w (see Figure 6)

Replace the definition of the width:

"The width of the reference notch shall be not greater than the reference notch depth or 1 mm whichever is greater."

with the following:

iTeh STANDARD PREVIEW

"The width of the reference notch shall not exceed 1 mm."

ISO 10893-1:2011/Amd 1:2020 https://standards.iteh.ai/catalog/standards/sist/c74007a4-4e65-4008-b0bbe5aa3fecc07d/iso-10893-1-2011-amd-1-2020

8.2, second sentence

Replace the second sentence:

"If after two consecutive retests all signals are lower than the trigger/alarm level, the tube shall be deemed to have passed this test otherwise the tube shall be designated as suspect."

with the following:

"If after one retest all signals are lower than the trigger/alarm level, the tube shall be deemed to have passed this test otherwise the tube shall be designated as suspect."
