

# DRAFT INTERNATIONAL STANDARD

## ISO/IEC DIS 14882

ISO/IEC JTC 1/SC 22

Secretariat: ANSI

Voting begins on:  
2020-06-11

Voting terminates on:  
2020-09-03

## Programming languages — C++

*Langages de programmation — C++*

ICS: 35.060

ITeh STANDARD PREVIEW  
(Standards.iteh.ai)  
Full standard:  
<https://standards.iteh.ai/catalog/standards/sist/3ee2b5bc-5de4-4642-8669-a9cef29d05e/iso-iec-dis-14882>

THIS DOCUMENT IS A DRAFT CIRCULATED FOR COMMENT AND APPROVAL. IT IS THEREFORE SUBJECT TO CHANGE AND MAY NOT BE REFERRED TO AS AN INTERNATIONAL STANDARD UNTIL PUBLISHED AS SUCH.

IN ADDITION TO THEIR EVALUATION AS BEING ACCEPTABLE FOR INDUSTRIAL, TECHNOLOGICAL, COMMERCIAL AND USER PURPOSES, DRAFT INTERNATIONAL STANDARDS MAY ON OCCASION HAVE TO BE CONSIDERED IN THE LIGHT OF THEIR POTENTIAL TO BECOME STANDARDS TO WHICH REFERENCE MAY BE MADE IN NATIONAL REGULATIONS.

RECIPIENTS OF THIS DRAFT ARE INVITED TO SUBMIT, WITH THEIR COMMENTS, NOTIFICATION OF ANY RELEVANT PATENT RIGHTS OF WHICH THEY ARE AWARE AND TO PROVIDE SUPPORTING DOCUMENTATION.

This document is circulated as received from the committee secretariat.

<b>Foreword</b>	<b>x</b>
<b>1 Scope</b>	<b>1</b>
<b>2 Normative references</b>	<b>2</b>
<b>3 Terms and definitions</b>	<b>3</b>
<b>4 General principles</b>	<b>7</b>
4.1 Implementation compliance . . . . .	7
4.2 Structure of this document . . . . .	8
4.3 Syntax notation . . . . .	8
4.4 Acknowledgments . . . . .	9
<b>5 Lexical conventions</b>	<b>10</b>
5.1 Separate translation . . . . .	10
5.2 Phases of translation . . . . .	10
5.3 Character sets . . . . .	11
5.4 Preprocessing tokens . . . . .	12
5.5 Alternative tokens . . . . .	13
5.6 Tokens . . . . .	13
5.7 Comments . . . . .	13
5.8 Header names . . . . .	14
5.9 Preprocessing numbers . . . . .	14
5.10 Identifiers . . . . .	14
5.11 Keywords . . . . .	15
5.12 Operators and punctuators . . . . .	16
5.13 Literals . . . . .	16
<b>6 Basics</b>	<b>26</b>
6.1 Preamble . . . . .	26
6.2 Declarations and definitions . . . . .	26
6.3 One-definition rule . . . . .	28
6.4 Scope . . . . .	32
6.5 Name lookup . . . . .	38
6.6 Program and linkage . . . . .	51
6.7 Memory and objects . . . . .	54
6.8 Types . . . . .	68
6.9 Program execution . . . . .	74
<b>7 Expressions</b>	<b>86</b>
7.1 Preamble . . . . .	86
7.2 Properties of expressions . . . . .	87
7.3 Standard conversions . . . . .	89
7.4 Usual arithmetic conversions . . . . .	94
7.5 Primary expressions . . . . .	95
7.6 Compound expressions . . . . .	110
7.7 Constant expressions . . . . .	140
<b>8 Statements</b>	<b>146</b>
8.1 Preamble . . . . .	146
8.2 Labeled statement . . . . .	147
8.3 Expression statement . . . . .	147
8.4 Compound statement or block . . . . .	147
8.5 Selection statements . . . . .	147

8.6	Iteration statements . . . . .	149
8.7	Jump statements . . . . .	152
8.8	Declaration statement . . . . .	153
8.9	Ambiguity resolution . . . . .	154
<b>9</b>	<b>Declarations</b>	<b>156</b>
9.1	Preamble . . . . .	156
9.2	Specifiers . . . . .	157
9.3	Declarators . . . . .	174
9.4	Initializers . . . . .	188
9.5	Function definitions . . . . .	204
9.6	Structured binding declarations . . . . .	210
9.7	Enumerations . . . . .	211
9.8	Namespaces . . . . .	214
9.9	The <code>using</code> declaration . . . . .	220
9.10	The <code>asm</code> declaration . . . . .	226
9.11	Linkage specifications . . . . .	226
9.12	Attributes . . . . .	228
<b>10</b>	<b>Modules</b>	<b>236</b>
10.1	Module units and purviews . . . . .	236
10.2	Export declaration . . . . .	237
10.3	Import declaration . . . . .	240
10.4	Global module fragment . . . . .	241
10.5	Private module fragment . . . . .	243
10.6	Instantiation context . . . . .	244
10.7	Reachability . . . . .	245
<b>11</b>	<b>Classes</b>	<b>247</b>
11.1	Preamble . . . . .	247
11.2	Properties of classes . . . . .	248
11.3	Class names . . . . .	249
11.4	Class members . . . . .	250
11.5	Unions . . . . .	272
11.6	Local class declarations . . . . .	274
11.7	Derived classes . . . . .	275
11.8	Member name lookup . . . . .	283
11.9	Member access control . . . . .	285
11.10	Initialization . . . . .	294
11.11	Comparisons . . . . .	306
11.12	Free store . . . . .	308
<b>12</b>	<b>Overloading</b>	<b>311</b>
12.1	Preamble . . . . .	311
12.2	Overloadable declarations . . . . .	311
12.3	Declaration matching . . . . .	313
12.4	Overload resolution . . . . .	314
12.5	Address of overloaded function . . . . .	337
12.6	Overloaded operators . . . . .	338
12.7	Built-in operators . . . . .	341
12.8	User-defined literals . . . . .	344
<b>13</b>	<b>Templates</b>	<b>346</b>
13.1	Preamble . . . . .	346
13.2	Template parameters . . . . .	347
13.3	Names of template specializations . . . . .	351
13.4	Template arguments . . . . .	353
13.5	Template constraints . . . . .	359
13.6	Type equivalence . . . . .	364

13.7	Template declarations . . . . .	364
13.8	Name resolution . . . . .	385
13.9	Template instantiation and specialization . . . . .	401
13.10	Function template specializations . . . . .	413
<b>14</b>	<b>Exception handling</b>	<b>433</b>
14.1	Preamble . . . . .	433
14.2	Throwing an exception . . . . .	434
14.3	Constructors and destructors . . . . .	435
14.4	Handling an exception . . . . .	436
14.5	Exception specifications . . . . .	437
14.6	Special functions . . . . .	440
<b>15</b>	<b>Preprocessing directives</b>	<b>442</b>
15.1	Preamble . . . . .	442
15.2	Conditional inclusion . . . . .	444
15.3	Source file inclusion . . . . .	446
15.4	Module directive . . . . .	447
15.5	Header unit importation . . . . .	447
15.6	Macro replacement . . . . .	449
15.7	Line control . . . . .	454
15.8	Error directive . . . . .	454
15.9	Pragma directive . . . . .	454
15.10	Null directive . . . . .	455
15.11	Predefined macro names . . . . .	455
15.12	Pragma operator . . . . .	457
<b>16</b>	<b>Library introduction</b>	<b>458</b>
16.1	General . . . . .	458
16.2	The C standard library . . . . .	459
16.3	Definitions . . . . .	459
16.4	Method of description . . . . .	462
16.5	Library-wide requirements . . . . .	468
<b>17</b>	<b>Language support library</b>	<b>488</b>
17.1	General . . . . .	488

# Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)) or the IEC list of patent declarations received (see <http://patents.iec.ch>).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 22, *Programming languages, their environments and system software interfaces*.

This sixth edition cancels and replaces the fifth edition (ISO/IEC 14882:2017), which has been technically revised. It also incorporates the Technical Specifications

- ISO/IEC TS 19217:2015 *Programming Languages — C++ Extensions for concepts*,
- ISO/IEC TS 21425:2017 *Programming Languages — C++ Extensions for ranges*,
- ISO/IEC TS 22277:2017 *Programming Languages — C++ Extensions for Coroutines*,
- ISO/IEC TS 21544:2018 *Programming Languages — Extensions to C++ for Modules*,
- portions of ISO/IEC TS 19571:2016 *Programming Languages — Technical specification for C++ extensions for concurrency*, and
- portions of ISO/IEC TS 19568:2017 *Programming Languages — C++ Extensions for Library Fundamentals*.

The main changes compared to the previous edition are as follows:

- addition of concepts, *requires-clauses*, and *requires-expressions* and `<concepts>` (18.3) header
- addition of coroutines, including `co_yield`, `co_await`, and `co_return` keywords and `<coroutine>` (17.12.1) header
- addition of modules, *import-declarations*, and *export-declarations*
- addition of three-way comparison, defaulted comparisons, rewriting of comparison operator expressions, and `<compare>` (17.11.1) header
- addition of designated initializers
- support for class types and floating-point types as the type of a non-type template parameter
- new attributes `[[no_unique_address]]`, `[[likely]]`, `[[unlikely]]`
- support for optional reason string in `[[nodiscard]]` attribute
- ability to require constant initialization with `constinit` keyword

- ability to require constant evaluation with `constexpr` keyword
- extension of constant evaluation support to cover
  - memory allocation and deallocation
  - virtual function calls
  - `dynamic_cast` and `typeid`
  - changing the active member of a union
  - uninitialized variables
- support for `constexpr` functions to contain `catch` handlers and *asm-declarations* that are not reached during constant evaluation
- support for controlling destruction in a class-specific operator delete function
- addition of `using enum` declaration
- addition of `char8_t` type
- guarantee that `char16_t` and `char32_t` literals are encoded as UTF-16 and UTF-32 respectively
- support for an initializer statement in range-based for loops
- support for default member initializers for bit-fields
- support for parenthesized aggregate initialization
- extended support for lambda expressions, including
  - explicit *template-heads* in generic lambdas
  - default construction and assignment of stateless closure types
  - lambda expressions in unevaluated operands
  - pack expansion of lambda *init-captures*
- generalized support for structured bindings
- support for inline namespaces in nested namespace definitions
- support for conditionally-explicit member functions
- extended support for class template argument deduction to cover aggregate initialization and alias templates
- reduced cases in which `typename` is required
- support for calling an undeclared *template-id* via argument-dependent name lookup
- relaxed access checking rules in template specialization declarations
- revised memory model
- expanded cases in which returned or thrown variables are implicitly moved
- extended support for variadic macros with `__VA_OPT__`
- feature test macros and `<version>` (17.3.2) header
- restricted valid uses of standard library functions and function templates
- addition of ranges and `<ranges>` (24.2) header
- addition of calendar and time zone support
- addition of text formatting library and `<format>` (20.20.1) header
- addition of synchronization facilities for waiting, notifications, semaphores, latches, and barriers, and `<barrier>` (32.8.2.1), `<latch>` (32.8.1.1) and `<semaphore>` (32.7.1) headers
- addition of mathematical constants library and `<numbers>` (26.9.1) header
- support for representing source locations and `<source_location>` (17.8.1) header
- addition of `span` view and `<span>` (22.7.2) header
- addition of joining thread class and `<stop_token>` (32.3.2) header
- extensions to atomic types and operations, including

- new class template `atomic_ref`
- new atomic floating-point operations
- new atomic smart pointer types
- support for compare-and-exchange operations on types with padding
- conversion of `memory_order` to a scoped enumeration
- addition of `unsequenced` execution policy
- new utility functions, types, and templates in the standard library, including
  - new type traits `is_bounded_array`, `is_corresponding_member`, `is_layout_compatible`, `is_nothrow_convertible`, `is_pointer_interconvertible_base_of`, `is_pointer_interconvertible_with_class`, and `is_unbounded_array`
  - new transformation traits `remove_cvref`, `type_identity`, `unwrap_ref_decay`, and `unwrap_reference`
  - new standard library primitive functions `assume_aligned` and `is_constant_evaluated`
  - new free functions `erase` and `erase_if` for containers
  - utilities for uses-allocator construction
  - function template `to_address`
  - function template `bind_front`
  - function template `to_array`
- `make_shared` support for array types
- support for allocating objects owned by `shared_ptr` and `unique_ptr` with default initialization
- addition of bit manipulation library and `<bit>` (26.5.2) header
- addition of a synchronized buffered output stream and `<syncstream>` (29.10.1) header
- addition of `shift` algorithms
- addition of `midpoint` and `lerp` math functions
- use of `[[nodiscard]]` attribute in the standard library
- support for heterogeneous lookup for unordered containers
- support for element existence detection in associative containers
- change to return removed element count from `remove`, `remove_if`, and `unique` member functions on `list` and `forward_list`
- addition of `starts_with` and `ends_with` to `basic_string` and `basic_string_view`
- support for move semantics in `<numeric>` (25.9) algorithms
- support for efficient access to the buffer of a `basic_stringbuf`
- extended constant expression evaluation support in the standard library to cover more algorithms, utilities, and types, including `pair`, `tuple`, `vector`, and `string`
- removal of deprecated features

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).

# 1 Scope

[intro.scope]

- <sup>1</sup> This document specifies requirements for implementations of the C++ programming language. The first such requirement is that they implement the language, so this document also defines C++. Other requirements and relaxations of the first requirement appear at various places within this document.
- 2 C++ is a general purpose programming language based on the C programming language as described in ISO/IEC 9899:2018 *Programming languages — C* (hereinafter referred to as the *C standard*). C++ provides many facilities beyond those provided by C, including additional data types, classes, templates, exceptions, namespaces, operator overloading, function name overloading, references, free store management operators, and additional library facilities.
