UDC 621.882.082.4 : 621.753.1

Ref. No. ISO 2903-1977 (E)

Descriptors: screw threads, trapezoidal threads, specifications, dimensional tolerances, fundamental deviations, rules of calculation, designation.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2903 was developed by Technical Committee ISO/TC 1, *Screw threads*, and was circulated to the member bodies in June 1976.

It has been approved by the member bodies of the following countries :

Austria	India	Romania 1977
Belgium	Ireland	South Africa, Rep. of
Brazil	Italy	Spain 64a607/iso-2903-1977
Canada	Korea, Rep. of	Sweden
Denmark	Mexico	Switzerland
Finland	Netherlands	U.S.A.
France	New Zealand	U.S.S.R.
Germany	Norway	
Hungary	Poland	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Japan
United Kingdom

ISO metric trapezoidal screw threads – Tolerances

1 SCOPE AND FIELD OF APPLICATION

This International Standard specifies a tolerance system for metric trapezoidal screw threads according to ISO 2902. The tolerances refer to the basic profile according to ISO 2901.

The tolerance system does not apply to trapezoidal screw threads with special requirements on axial displacement, for example lead screws.

2 REFERENCES

ISO 965/I, ISO general purpose metric screw threads – Tolerances – Principles and basic data, ISO 2903:1977
<https://standards.iteh.ai/catalog/standards/sist/2e463cD19150-4>

ISO 2901, ISO metric trapezoidal screw threads – Basic profile and maximum material profiles.

ISO 2902, ISO metric trapezoidal screw threads – General plan.

3 STRUCTURE OF THE TOLERANCE SYSTEM

The system is based on the tolerance system for ISO general purpose metric screw threads of ISO 965/I, completed with tolerance positions c and e, and with values for pitches above 6 mm.

The recommended tolerance classes are, however, not the same as those for ISO metric screw threads in ISO 965/I.

4 TERMINOLOGY AND SYMBOLS

4.1 Terminology

The term "bolt threads" is used for external screw threads, the term "nut threads" for internal screw threads.

4.2 Symbols

The following symbols are used :

Symbol	Explanation
D_4	basic major diameter of nut thread
D_1	basic minor diameter of nut thread
D_2	basic pitch diameter of nut thread
d	basic major diameter of bolt thread
d_3	basic minor diameter of bolt thread
d_2	basic pitch diameter of bolt thread
P	pitch
N	designation for thread engagement group Normal
L	designation for thread engagement group Long
T	tolerance
$T_{D_1} \ T_{D_2}$	tolerances for D_1 , D_2 , d , d_3 , d_2
$T_d \ T_{d_3} \ T_{d_2}$	(for D_4 no tolerances are specified)
$ei \ EI$	lower deviations (EI for the nut threads is equal to zero)
$es \ ES$	upper deviations

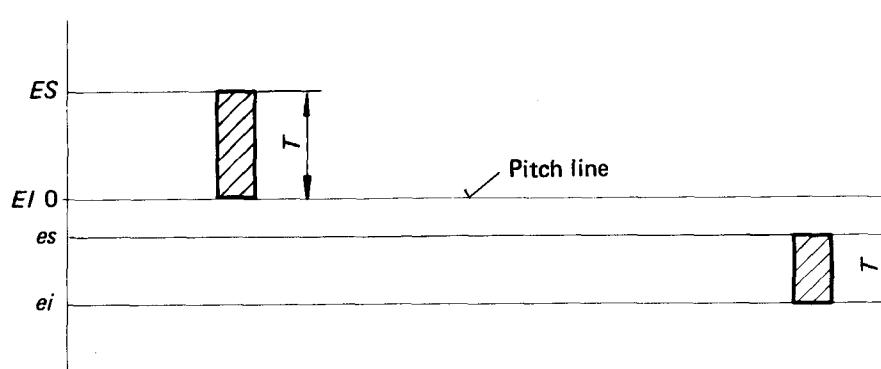

FIGURE 1 – Tolerance positions with respect to zero line (basic size)

5 DESIGNATION

A complete designation for a screw thread shall comprise a designation for the thread system and size, and a designation for the thread tolerance.

The thread designation appears in ISO 2902.

The tolerance designation consists of a symbol for the pitch diameter tolerance only.

There is no need to designate the crest diameter tolerance since

- the tolerance position is always the same;
- only one tolerance grade is established for the minor diameter of nut threads (D_1) and for the major diameter of bolt threads (d).

Each tolerance designation shall comprise :

- a figure indicating the grade of the pitch diameter tolerance;
- a letter indicating the position of the pitch diameter tolerance, capital for nuts, small for bolts.

Examples :

for nut threads :

Tr 40 x 7 – 7H

for bolt threads :

Tr 40 x 7 – 7e

iTeh STANDARD PREVIEW

(standards.iteh.ai)

<https://standards.iteh.ai/catalog/standards/sist/2ec461c9-9150-4d3e-ba31-64a607703a19/iso-2903-1977>

for two starts left-hand bolt threads :

Tr 40 x 14 (P7) LH – 7e

A fit between threaded parts is indicated by the nut thread tolerance designation followed by the bolt thread tolerance designations separated by a stroke.

Example :

Tr 40 x 7 – 7H/7e

Tr 40 x 14 (P7) – 7H/7e

6 TOLERANCE GRADES

The following tolerance grades are established :

Tolerance grades

Minor diameter of nut threads D_1 :	4
Major diameter of bolt threads d :	4
Pitch diameter of nut threads D_2 :	7 8 9
Pitch diameter of bolt threads d_2 :	(6) ¹⁾ 7 8 9
Minor diameter of bolt threads d_3 :	7 8 9

The tolerance grade for the minor diameter (d_3) of the bolt thread is always the same as for the pitch diameter (d_2).

However, the values for T_{d_3} and T_{d_2} are not the same for a same grade because $T_{d_3} = 1,25 T_{d_2} + |es|$.

7 TOLERANCE POSITIONS

The following tolerance positions are standardized for the pitch diameter :

- for nut threads : H with zero fundamental deviation;
- for bolt threads : c and e with negative fundamental deviation.

The tolerance position for the minor diameter D_1 and the major diameter D_4 of the nut threads is always H, i.e. with zero fundamental deviation. The tolerance position for the major diameter d and minor diameter d_3 of the bolt threads is in all cases h, i.e. with zero fundamental deviation, and it is independent of the tolerance position of the pitch diameter.

TABLE 1 — Fundamental deviations for the pitch diameter of nut threads and bolt threads

Pitch ISO 2903:1977 mm	D_2 μm	Fundamental deviation		
		Nut thread		Bolt thread
		H E_l	c es	e es

9 CREST AND ROOT DIAMETER TOLERANCES

9.1 Minor diameter tolerance of nut thread (T_{D_1})

For the minor diameter tolerance of the nut thread, T_{D_1} , there is only one tolerance grade, 4 (see table 3).

TABLE 3 – Minor diameter tolerance of nut threads (T_{D_1})
