#### **European foreword**

This document (FprCEN/TS 13387-5:2024) has been prepared by Technical Committee CEN/TC 252 "Child care articles", the secretariat of which is held by AFNOR.

This document will supersede CEN/TR 13387-5:2018.

The first edition of CR 13387 was published in 1999 and this is its latest revision. It is a Technical Specification which provides guidance information on common hazards that should be taken into consideration when developing safety standards for child care articles.

This new edition of this Technical Specification is a hazard based Technical Specification. In comparison with the previous edition, the main changes related to the section on Product information are:

When preparing CEN/TS 13387-5, CEN/CLC Guide 11, Product information relevant to consumers —
 Guidelines for standard developers, and ISO/IEC Guide 50, Safety aspects — Guidelines for child safety
 in standards and other specifications, have been taken into consideration.

The CEN/TS 13387 series comprises the following five parts:

- Safety philosophy and safety assessment (CEN/TS 13387-1);
- Chemical hazards (CEN/TS 13387-2);
- Mechanical hazards (CEN/TS 13387-3);
- Thermal hazards (CEN/TS 13387-4);
- Product information (CEN/TS 13387-5).

CEN/TS 13387-5 is intended to be used in conjunction with CEN/TS 13387-1.

#### FprCEN/TS 13387-5:2024 (E)

#### 1 Scope

Product information given in standards has a direct impact on safety. It contributes to avoiding risks to the child. However, product information is not intended to compensate for design deficiencies and does not in itself make a product safer but is a means for the manufacturer to communicate with the user. Reasonable foreseeable misuse and risks of the product are made explicit and adequate warnings are given.

All product information is in the language(s) of the country in which the product is sold. It is presented so that it is unambiguous, legible and easy to read and comprehend.

A risk analysis is applied to identify those hazards for which safety-related product information is required.

#### 2 Normative references

There are no normative references in this document.

#### 3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminology databases for use in standardization at the following addresses:

- IEC Electropedia: available at https://www.electropedia.org/
- ISO Online browsing platform: available at <a href="https://www.iso.org/obp">https://www.iso.org/obp</a>

#### 3.1

#### product information

texts and images that may accompany or be associated with a specific child care article

Note 1 to entry: This includes marking of the product and any packaging, purchase information and instructions for use. Electronic information may be supplied in conjunction with written versions.

#### 3.2

#### marking of the product

product information permanently attached to the child care article

Note 1 to entry: Where the packaging creates the risk, marking should be attached to the packaging. All markings belong to one of the categories 'purchase information' and 'instructions for use', or both. Too much information should be avoided, as this could detract from safety warnings.

#### 3.3

#### purchase information

information provided on the product and/or its packaging at the point of sale that will enable the purchaser to make an informed choice before purchasing the product

Note 1 to entry: This information should be provided in mail order catalogues, etc. as well as on the product and/or its packaging.

#### 3.4

#### instructions for use

information provided regarding safety, assembly, installation, operation, storage, maintenance, repair, etc
