

Designation: D5749 – 01 (Reapproved 2012)

Standard Specification for Reinforced and Plain Gummed Tape for Sealing and Securing¹

This standard is issued under the fixed designation D5749; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers plain and reinforced paper gummed adhesive tapes suitable for securing and banding paper products and closing fiberboard boxes.

1.2 This specification is intended to replace Fed. Specs. CID A-A-1492, CID A-A-1671, and PPP-T-45 in part.

1.3 The values stated in SI units are to be regarded as standard. The values given in parentheses are for information only.

1.4 The following safety hazards caveat pertains only to the test methods portion, Section 11, of this specification: *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

D685 Practice for Conditioning Paper and Paper Products for Testing (Withdrawn 2010)³

D828 Test Method for Tensile Properties of Paper and Paperboard Using Constant-Rate-of-Elongation Apparatus (Withdrawn 2009)³

D996 Terminology of Packaging and Distribution Environments

D1974 Practice for Methods of Closing, Sealing, and Reinforcing Fiberboard Boxes

D3951 Practice for Commercial Packaging

2.2 TAPPI Standards:

T 401 Fiber Analysis of Paper and Paperboard⁴

T 410 Weight per Unit Area (Basis Weight or Substance)⁴

T 414 Internal Tearing Resistance of Paper (Elmendorf-Type Method)⁴

UM 575 Water Resistance of Adhesive Bond in Laminated Paper and Paperboard⁴

2.3 ANSI/ASQC Standards:

ANSI/ASQC Z 1.4 Sampling Procedures and Tables for Inspection by Attributes⁵

ANSI/ASQC Z 1.9 Sampling Procedures and Tables for Inspection by Variables for Percent Defective⁵

2.4 Federal Specifications:

PPP-T-45 Tape, Gummed, Paper, Reinforced and Plain, for Sealing and Securing⁶

PPP-T-681 Tape, Gummed, Packaging and Packing of⁶

CID A-A-1492 Commercial Item Description Tape, Gummed, Paper, Plain⁶

CID A-A-1671 Commercial Item Description Tape, Gummed, (Paper, Reinforced, Laminated)⁶

2.5 ISO Standard:

ISO 9002 Quality Systems Model for Quality Assurance in Production and Installations⁵

3. Terminology

3.1 *Definitions*—General definitions for packaging and distribution environments are found in Terminology D996.

4. Classification

4.1 Type I Reinforced, Laminated:

4.1.1 Class 1—Strippable.

4.1.2 Class 2—Nonstrippable.

4.2 Type II Plain, Single Ply, Strippable:

4.2.1 Grade A—Light duty, for lightweight packages.

4.2.2 Grade B—Medium duty, for medium-sized packages.

¹ This specification is under the jurisdiction of ASTM Committee D10 on Packaging and is the direct responsibility of Subcommittee D10.14 on Tape and Labels.

Current edition approved April 1, 2012. Published May 2012. Originally approved in 1995. Last previous edition approved in 2006 as D5749 – 01(2006). DOI: 10.1520/D5749-01R12.

4.2.3 *Grade C*—Heavy duty, for heavy-duty packages.

5. Significance and Use

5.1 Type I is a reinforced gummed tape which may be strippable (Class 1) or nonstrippable (Class 2). It is intended for use in Methods 2C2, 2C3, and any other methods in Practice D1974.

5.2 Type II is a plain paper-backed nonstrippable gummed tape. It is intended for use in Methods 2C4, 2C5, and other methods in Practice D1974.

6. Ordering Information

- 6.1 The inquiry or order shall include the following:
 - 6.1.1 ASTM designation and date of issue,
 - 6.1.2 Type, class, and grade required (5.1),
 - 6.1.3 When core plugs are required (7.7),
 - 6.1.4 If tape is to be wound gummed side out (7.7),
 - 6.1.5 Roll width and length (9.1 and 9.2),
 - 6.1.6 Acceptance sampling plan and desired acceptance quality level (Section 12),
 - 6.1.7 When backing certification is required (15.1),
 - 6.1.8 When testing and inspection certification is required (15.1),
 - 6.1.9 Level of packaging and packing if other than commercial (Section 17), and
 - 6.1.10 When packaging for shipments to the U.S. Government (17.2).

7. Materials and Manufacture

7.1 The materials used in the construction of the tape shall be such as to ensure performance of the tape over the range of -55 to +71°C (-65 to +160°F) and shall conform to the requirements of this specification.

7.2 Paper:

7.2.1 *Stock*—The paper used in the fabrication of the tape shall be a kraft paper. The use of recycled pulp in the paper is encouraged.

7.2.2 *Weight*—The weight of the paper prior to gumming shall conform to the requirement of Table 1, when tested as described in TAPPI T 410.

7.3 *Adhesives*—The adhesives used shall not have an offensive odor (dry or wet) and shall meet the environmental considerations of 16.1.

7.3.1 Type I, Class 1 adhesive shall be capable of being quickly activated with water. The wetted adhesive shall show pronounced tackiness and shall cause the tape to remain so firmly affixed that it cannot be removed without leaving a thin

film of paper from the tape on the test paper, when tested in accordance with 13.6.1.

7.3.2 Type I, Class 2, and Type II adhesive shall be capable of being quickly activated with water. The wetted adhesive shall show pronounced tackiness and shall cause the tape to remain so firmly affixed that it cannot be removed without failure of either the tape or paper when tested in accordance with 13.6.1.

7.4 *Reinforcing Materials*—The reinforcing fibers used in fabricating Type I tapes shall be composed of glass of such size as to permit the reinforced tape to meet the requirements set forth in Table 2 when tested as described in 13.5.

7.5 *Laminating Materials*—The laminating material for Type I tape shall be non-asphaltic, water resistant, flexible, and non-staining. Water resistance of the finished tape shall be tested in accordance with TAPPI UM 575.

7.6 *Construction*—Type I tape shall consist of two strips of paper in roll form, securely laminated together with reinforcing fibers embedded in the laminate. The reinforcing laminated tape shall be completely and uniformly coated on one side with an adhesive.

7.6.1 The tape shall be reinforced by crosswise reinforcing fibers spaced not less than 2 fibers/50 mm (1 in.) on average and by lengthwise fibers spaced not more than an average of 25 mm (1/2 in.) apart. If a diamond pattern is employed for crosswise reinforcement, the spacing between the parallel sides of the diamond shall not be more than 32 mm (1 1/4 in.). The three-way tape shall be reinforced in both the machine direction and cross direction with reinforcing fibers spaced not less than 2 fibers/50 mm (1 in.) on average, in addition to the diamond-patterned reinforcement.

7.6.2 Type II tapes, all grades, shall consist of one strip of paper in roll form of the applicable grade, completely and uniformly coated on one side with an adhesive.

7.7 *Rolls*—Unless otherwise specified, the tape shall be evenly wound and tightly wound in rolls with the gummed side in (6.1.4). Type II shall be wound on a core having sufficient rigidity to prevent distortion of the roll under normal conditions of transportation and use. The inside diameter of the core shall be not less than 13 mm (1/2 in.). When specified, Type II tape shall have the core secure with a plug (6.1.3). Type I tape shall not be required to have a core. The end of the outer leaf of the tape shall be adhered to the next layer to prevent unwinding. The tape in each roll shall be furnished in one continuous length and have no more than three splices per roll.

TABLE 1 Weight of Ungummed Paper

Minimum Weight		
	g/m ²	lb
(24 × 36 — 5500 sheets)		
Type I, Classes 1 and 2	49	55
Type II		
Grade A	57	35
Grade B	98	60
Grade C	146	90

TABLE 2 Physical Properties

Type	Tensile Strength, kN/m width (lb/in.) min		Tearing Resistance, grams force mN min ^A	
	Machine direction	Cross direction ^B	Machine direction	Cross direction
Type I	11 (63)	5.25 (30)		
Type II				
Grade A	4.5 (26)		540(55)	647 (66)
Grade B	8 (45)		1109 (113)	1315 (134)
Grade C	12 (68)		1991 (203)	2197 (224)

^A This requirement does not apply to tapes less than 63 mm (2 1/2 in.) in width.

^B This requirement does not apply to tapes less than 76 mm (3 in.) in width.
