Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, Subcommittee SC 15, *Machinery for forestry*.

A list of all parts in the ISO 8082 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Self-propelled machinery for forestry — Laboratory tests and performance requirements for roll-over protective structures —

Part 1: General machines

AMENDMENT 1

Clause 7

Insert a new Clause 7 as follows, to provide labelling requirements to be consistent with ISO 8082-2:

7 Labelling of ROPS

7.1 General

ROPS meeting the requirements of this document shall be labelled in accordance with 7.2 and 7.3.

7.2 Label specifications

The label shall be of a permanent type and shall be permanently attached to the ROPS structure. The label shall be located on the structure so that it can be easily read from the ground, the operator's seat or an access platform and be protected from weather defacing.

7.3 Label content

The label shall indicate the following:

- a) the business name and address of the ROPS manufacturer and, where applicable, the ROPS manufacturer's authorized representative;
- b) designation of the ROPS/type of machine for which the ROPS was intended;
- c) mandatory marking, if required for a specific regional requirement;
- d) designation of series or type/model of machine for which the ROPS is intended;
- e) serial number, if applicable;
- f) machine mass, m , for which the ROPS structure meets all of the performance requirements of this document;
- g) the International Standards for which the structure meets all of the performance requirements;
- h) other such information as is deemed appropriate by the manufacturer (e.g. installation, repair or replacement information).
