

Designation: E1669 - 95a (Reapproved 2012)

An American National Standard

Standard Classification for Serviceability of an Office Facility for Location, Access and Wayfinding^{1,2}

This standard is issued under the fixed designation E1669; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

- 1.1 This classification contains pairs of scales for classifying an aspect of the serviceability of an office facility, that is, the capability of an office facility to meet certain possible requirements for locating the building and finding the way inside the building.
- 1.2 Within that aspect of serviceability, each pair of scales, shown in Figs. 1-6, are for classifying one topic of serviceability. Each paragraph in an Occupant Requirement Scale (see Figs. 1-6) summarizes one level of serviceability on that topic, which occupants might require. The matching entry in the Facility Rating Scale (see Figs. 1-6) is a translation of the requirement into a description of certain features of a facility which, taken in combination, indicate that the facility is likely to meet that level of required serviceability.
- 1.3 The entries in the Facility Rating Scale (see Figs. 1-6) are indicative and not comprehensive. They are for quick scanning to estimate approximately, quickly, and economically, how well an office facility is likely to meet the needs of one or another type of occupant group over time. The entries are not for measuring, knowing, or evaluating how an office facility is performing.
- 1.4 This classification can be used to estimate the level of serviceability of an existing facility. It can also be used to estimate the serviceability of a facility that has been planned but not yet built, such as one for which single-line drawings and outline specifications have been prepared.
- 1.5 This classification indicates what would cause a facility to be rated at a certain level of serviceability but does not state how to conduct a serviceability rating nor how to assign a serviceability score. That information is found in Practice

E2334. The scales in this classification are complimentary to and compatible with Practice E2334. Each requires the other.

ISO 6240 International Standard, Performance Standards in Building—Contents and Presentation

3. Terminology

- 3.1 Definitions:
- 3.1.1 *facility*—a physical setting used to serve a specific purpose. **E631**
- 3.1.1.1 *Discussion*—A facility may be within a building, a whole building, or a building with its site and surrounding environment; or it may be a construction that is not a building. The term encompasses both the physical object and its use.
- 3.1.2 facility serviceability—the capability of a facility to perform the function(s) for which it is designed, used, or required to be used. **E631**
- 3.1.2.1 *Discussion*—The scope of this performance is of the facility as a system, including its subsystems, components and materials and their interactions, such as acoustical, hydrothermal, air purity, and economic; and of the relative importance of each performance requirement.
- 3.1.3 *office*—a place, such as a room, suite, or building, in which business, clerical or professional activities are conducted. **E631**

¹ This classification is under the jurisdiction of ASTM Committee E06 on Performance of Buildings and is the direct responsibility of Subcommittee E06.25 on Whole Buildings and Facilities.

Current edition approved April 1, 2012. Published May 2012. Originally approved in 1995. Last previous edition approved in 2005 as E1669 - 95a (2005). DOI: 10.1520/E1669-95AR12.

Scale A.14.1. Public transportation (urban sites)

Occupant Requirement Scale		Facility Rating Scale			
 O ORIGIN OF STAFF AND VISITORS: Staff and visitors come from all parts of the city or town. O PROXIMITY TO TRANSIT ROUTES: The office must be near a major transit centre. O FREQUENCY OF VISITORS: There are many visitors each day, e.g. more than 100 members of the public per day. O OFFICE HOURS: Office hours are fixed, e.g. no flex-time. 	8 🗆	 O <u>Staff commuting during peak hours</u>: Staff can commute by transit from all parts of the community, with frequent service and express options during peak hours. O <u>Distance to transit stops</u>: Transit stops are within two blocks. O <u>Visitors use of public transportation during of peak hours</u>: Transit frequency is 20 minutes or less during off-peak hours. 			
 O ORIGIN OF STAFF AND VISITORS: Staff and visitors come from most parts of the city or town. O PROXIMITY TO TRANSIT ROUTES: The office must be within walking distance of most major transit route(s). O FREQUENCY OF VISITORS: There are many visitors each day, e.g. 50 per day. O OFFICE HOURS: Office hours are fixed for many staff, e.g. limited flex-time. 	6	7 O Staff commuting during peak hours: Staff can commute by transit from all parts of the community with frequent service during peak hours. O Distance to transit stops: Transit stops are within close walking distance, e.g. 10 minutes. O Visitors use of public transportation during of peak hours: Visitors can reach the site from homes or offices by transit. Transit frequency is half-hour or less.			
 O ORIGIN OF STAFF AND VISITORS: Staff come from many parts of the city or town. O PROXIMITY TO TRANSIT ROUTES: The office must be within walking distance of several major transit routes. O FREQUENCY OF VISITORS: There are some visitors each day, e.g. less than 35 per day, a few from homes, but most from work locations. O OFFICE HOURS: Flex-time is available to most staff. 	la:	O Staff commuting during peak hours: Staff can commute by transit from most parts of the community. O Distance to transit stops: Transit stops are within walking distance, e.g. 15 minutes. O Visitors use of public transportation during of peak hours: Visitors can reach the site from homes or offices by transit, but service is not convenient. Transit frequency is longer than half-hour intervals. 2-47c3-8c15-bal fibe7ceafc/astm-e1669-95a20			
 O ORIGIN OF STAFF AND VISITORS: Staff come from the local community, or a few parts of town. Some staff drive to work. O FREQUENCY OF VISITORS: There are a few visitors, and most do not return. Visitors typically come by car or taxi. 	2	 O <u>Staff commuting during peak hours</u>: Staff can commute by public transit from a few parts of the community. O <u>Distance to transit stops</u>: Transit stops are within a long walking distance. O <u>Visitors use of public transportation during of peak hours</u>: Few visitors can reach the site by public transit from homes or offices. 	<u>ff-</u>		
 O ORIGIN OF STAFF AND VISITORS: Staff come from the local community, most within walking distance, or drive to work. ○ FREQUENCY OF VISITORS: There are no visitors, or visitors are rare and tend to come by car or taxi. 		 O <u>Staff commuting during peak hours</u>: There is republic transit for commuting to the building. O <u>Distance to transit stops</u>: Transit stops are an unacceptably long walking distance. O <u>Visitors use of public transportation during of peak hours</u>: There is no public transit for visitors to the building.

Scale A.14.2. Staff visits to other offices

	Occupant Requirement Scale			Facility Rating Scale		
9	O PROXIMITY TO DESTINATION: Operations require very close proximity. O ACCESS TO DESTINATION: Sheltered access to external organizations, or to other offices of the same organization, e.g. staff hand-deliver documents or visit others nearby on a regular basis.	8	9	O <u>Location of other offices visited during work:</u> Frequently visited sites are on the same or adjacent block. O <u>Convenience of access to other sites:</u> Other sites are within close walking distance, and the route is sheltered from extremes of weather, e.g. it is indoors or covered.		
7	O PROXIMITY TO DESTINATION: Operations require close proximity. O ACCESS TO DESTINATION: Within walking distance, to external organizations, or to offices of other branches or divisions of the same organization.	6	7	O Location of other offices visited during work: Frequently visited sites are within walking distance. O Convenience of access to other sites: The route to other sites is out of doors and not sheltered. Transit or car are not needed.		
5	O PROXIMITY TO DESTINATION: Operations require reasonably close proximity. O ACCESS TO DESTINATION: Within one-half hour driving time. This is typically for staff or managers needing to visit others on a regular basis, or for outside staff needing to visit the office.	tar Na	od tro	O <u>Location of other offices visited during work</u> : Frequently visited sites are beyond walking distance. Driving time, office to office, is up to one-half hour. Visitor parking at the destination is within walking distance. O <u>Convenience of access to other sites</u> : Transit to other sites takes more than one-half hour. Visitor parking is usually available at the destination.		
3 ps://s	O PROXIMITY TO DESTINATION: O ACCESS TO DESTINATION: Staff, or people from other offices, rarely need to visit each other. When visits are necessary, access is normally by car.	669-9 80-b 2 □	3	O Location of other offices visited during work: Frequently visited sites are remote. Driving time, office to office, is between one-half hour and one hour. O Convenience of access to other sites: There is no transit to other sites, or, transit takes more than one hour. Visitor parking at the destination is usually full during working hours.		
1	O PROXIMITY TO DESTINATION: O ACCESS TO DESTINATION: There is no need for staff, or people from other offices, to visit each other.		1	O Location of other offices visited during work: Frequently visited sites are remote. Driving time, office to office, is one hour or more. O Convenience of access to other sites: There is no transit or visitor parking at most other sites.

Scale A.14.4. Wayfinding to building and lobby

0	ccupant Requirement Scale		Facility Rating Scale	
9	O EASE OF WAYFINDING TO BUILDING AND LOBBY: Wayfinding to the building, to the building entrance, and to the building lobby, must be exceptionally easy and simple. O TYPE OF VISITORS: There are large numbers of visitors to the facility daily, most of them for the first time, and many with cultural expectations that differ from the norm for that locality, or different languages, etc.	8	 O Locating the building: The signage is excellent, e.g. the name, signage and street number are all obvious and easily readable from the sidewalk or from a passing car. O Wayfinding to entry: The entrance is obvious from the sidewalk, car park or mall. Signage is excellent. There is a direct entry from visitor parking and drop-off. There is a convenient entry from staff parking. O Visitor drop-off: There is a turning-in area for visitor drop-off near the main entry with room for attended cars to stand while waiting. O Wayfinding to lobby: The entry to the lobby is direct and obvious from all main entrance points and parking. 	
7	O EASE OF WAYFINDING TO BUILDING AND LOBBY: Wayfinding to the building, to the building entrance, and to the building lobby, must be easy and clear. O TYPE OF VISITORS: There are many visitors to the facility daily, some of them for the first time, and some with cultural expectations that differ from the norm for that locality, or different languages, etc.	6 II St:	 O Locating the building: The signage is very good, e.g. the name, signage and street number are all clearly visible and obvious from the sidewalk or from a passing car. O Wayfinding to entry: The entrance is obvious from the street or sidewalk and is easily found from the car park or mall. Signage is fully adequate and appropriate. O Visitor drop-off: A turning-in area is provided near the main entry. O Wayfinding to lobby: The lobby is easily found from all entrance points and by direct access from parking. 	
ttps://stan	O EASE OF WAYFINDING TO BUILDING AND LOBBY: Wayfinding to the building, to the building entrance, and to the building lobby is not likely to be a problem. O TYPE OF VISITORS: Most visitors are from the local community and are therefore conversant with the layout and names of streets and landmarks. Most visitors have been to the office before.	8 TM /84 5	O Locating the building: The building name, signage and street number are clearly visible from the sidewalk or a passing car. O Wayfinding to entry: The entrance is visible but not obvious from the street. Basic signage is provided, that complies with minimum requirements. O Visitor drop-off: There is a visitor drop-off at curbside not far from the main entry. O Wayfinding to lobby: Access routes to the lobby from the entrance and parking are not direct, but necessary signage is provided.	
3	O EASE OF WAYFINDING TO BUILDING AND LOBBY: Wayfinding to the building, to the building entrance, and to the building lobby is eased because most people who enter the facility know their way around. O TYPE OF VISITORS: Operations involve only a few visitors to the facility, most of whom are known to staff working in the facility, and most of whom have visited before. Staff turnover is low, and new staff are shown around by an old hand. The operation can be characterized as a back office.	2	O Locating the building: Signage is inadequate, inappropriate or missing. The street number is hard to see from the sidewalk or a passing car. O Wayfinding to entry: Direction signs are needed because the entry is not obvious from the street. It is hard to distinguish the main building entrance from secondary building entrances. However, signage is inadequate, inappropriate or missing. O Visitor drop-off: There is no visitor drop-off area, or, if provided, is dangerous to use. O Wayfinding to lobby: Access to the lobby from parking is circuitous and hard to find. Signage is inadequate, inappropriate or missing.
