This European Standard was approved by CENELEC on 1998-10-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

The text of document 61J/57/FDIS, future second edition of IEC 60335-2-69 prepared by SC 61J of the IEC Technical Committee 61, was submitted to the IEC-CENELEC parallel vote in October 1996. The results of the vote were discussed during the Edinburgh meeting of CENELEC TC 61 in May 1997 when it was decided to circulate a new draft under the enquiry procedure, document CLC/TC 61 (SEC) 1121. The comments were discussed during the Fehratof meeting in October 1997 when it was decided to submit a draft for EN 60335-2-69 to the formal vote.

This draft was circulated in June 1998 and was approved by CENELEC as EN 60335-2-69 on 1998-10-01.

This European Standard replaces EN 60335-2-69:1995.

The following dates are applicable:

- latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 1999-04-01
- date on which national standards conflicting with the EN have to be withdrawn (dow) 2002-04-01

This standard has to be used in conjunction with EN 60335-1, Safety of household and similar electrical appliances, Part 1: General requirements. It was established on the basis of the 1994 edition of that standard. Amendments and revisions of part 1 have also to be taken into account and the dates when such changes become applicable will be stated in the relevant amendment or revision of part 1.

This part 2 supplements or modifies the corresponding clauses of EN 60335-1, so as to convert it into the European Standard: Safety requirements for wet and dry vacuum cleaners, including power brush, for industrial and commercial use.

When a particular subclause of part 1 is not mentioned in this part 2, that subclause applies as far as is reasonable. When this standard states "addition", "modification" or "replacement", the relevant text of part 1 is to be adapted accordingly.

Subclauses and figures which are additional to those in part 1 are numbered starting with 101. Annexes which are additional to those in part 1 are lettered AA, BB, etc..

Special national conditions causing a deviation from this European Standard are listed in annex ZA and are in addition to those in EN 60335-1.

There are no national deviations from this European Standard, other than those listed in annex ZB to EN 60335-1.

NOTE - The following print types are used:

- requirements: in roman type;
- *test specifications: in italic type;*
- notes: in small roman type.

Words in **bold** in the text are defined in clause 2. When a definition of part 1 concerns an adjective, the adjective and the associated noun are also in bold.

p NOTE - In this document p is used in the margin to indicate instructions for preparing the printed version.

Introduction

An investigation by CENELEC TC 61 has shown that all risks from products within the scope of this standard are fully covered by the Low Voltage Directive, 73/23/EEC. If the product has mechanical moving parts, a risk assessment in accordance with the Machinery Directive, 89/392/EEC, has shown that the risks are mainly of electrical origin and consequently this directive is not applicable. However, the relevant essential safety requirements of the Machinery Directive are covered by this standard together with the principal objectives of the Low Voltage Directive.

Endorsement notice

The text of the International Standard IEC 60335-2-69:1997 was approved by CENELEC as a European Standard with common modifications as given below.

COMMON MODIFICATIONS**7 Marking and instructions**

p 7.12 Replace the text by:

The front cover of the instruction manual shall include the substance of the following:

CAUTION Read the instruction manual before using the appliance.

This wording may be replaced by symbols Nos. 0434 and 1641 of ISO 7000. If these symbols are used, their meaning is to be explained in the instructions for use.

The instruction manual shall include the substance of the following warnings, as applicable:

- **CAUTION** This appliance is not suitable for picking up hazardous dust;
- **CAUTION** This appliance is for dry use only and is not to be used or stored outdoors in wet conditions;
- **WARNING** Only use the brushes provided with the appliance or those specified in the instruction manual. The use of other brushes may impair safety.

The instruction manual shall give details regarding the following, as applicable:

- the precautions to be taken when using the appliance under specific conditions such as handling flammable liquids or dust, and dust hazardous to health;
- a statement that the appliance is to be disconnected from its power source during cleaning or maintenance and when replacing parts or converting the appliance to another function,
 - for mains operated appliances, the plug is to be removed from the socket-outlet,
 - for battery operated appliances, the key of the supply switch is to be removed or an equivalent disconnection is to be made;
- the intended use of brushes which are specified for the appliance.

The instruction manual shall state the A-weighted sound pressure level L_{PA} in dB(A) emitted by the appliance. If the A-weighted sound pressure level exceeds 85 dB(A), it shall also state the sound power level L_{WA} in dB(A) and that appropriate ear protection has to be used.

NOTE - The sound level is measured in accordance with EN 60704-2-1.

The instruction manual shall include the substance of the following:

This appliance is suitable for commercial use, for example in hotels, schools, hospitals, factories, shops, offices and rental businesses.

The instruction manual for mains operated appliances shall include the substance of the following:

- do not allow the rotating brushes to come into contact with the supply cord;
- regularly examine the supply cord for damage, such as cracking or ageing. If damage is found, replace the cord before further use;
- only replace the supply cord with the type specified in the instruction manual;
- only use the socket outlet on the appliance for purposes specified in the instruction manual.

For wet suction appliances, the instruction manual shall state the substance of the following

- CAUTION If foam or liquid escapes from the appliance, switch off immediately.
- regularly clean the water level limiting device in accordance with the instructions and examine it for signs of damage.

20 Stability and mechanical hazards

p Add:

20.Z101 Shaft ends and similar rotating parts shall be protected if they protrude by more than a quarter of their diameter, unless the end is rounded and less than 50 mm in length.

Injury due to unintentional closing or slamming of parts, such as movable side walls and covers, shall be prevented.

Wheels or rollers for the transport of appliances heavier than 20 kg shall be located or protected so that injury to the feet of the operator is prevented.

Compliance is checked by inspection, by measurement and by manual test.

Annex A:

p Replace by:

INTERNATIONAL ELECTROTECHNICAL COMMISSION

SAFETY OF HOUSEHOLD AND SIMILAR ELECTRICAL APPLIANCES
Part 2-69: Particular requirements for wet and dry vacuum cleaners,
including power brush, for industrial and commercial use

FOREWORD

- 1) The IEC (International Electrotechnical Commission) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of the IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, the IEC publishes International Standards. Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. The IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of the IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested National Committees.
- 3) The documents produced have the form of recommendations for international use and are published in the form of standards, technical reports or guides and they are accepted by the National Committees in that sense.
- 4) In order to promote international unification, IEC National Committees undertake to apply IEC International Standards transparently to the maximum extent possible in their national and regional standards. Any divergence between the IEC Standard and the corresponding national or regional standard shall be clearly indicated in the latter.
- 5) The IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with one of its standards.
- 6) Attention is drawn to the possibility that some of the elements of this International Standard may be the subject of patent rights. The IEC shall not be held responsible for identifying any or all such patent rights.

This part of International Standard IEC 335 has been prepared by subcommittee 61J: Electrical motor-operated cleaning appliances for industrial use, of IEC technical committee 61: Safety of household and similar electrical appliances.

This second edition cancels and replaces the first edition published in 1992 of which it constitutes a technical revision.

The text of this standard is based on the following documents:

FDIS	Report on voting
61J/57/FDIS	61J/72/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This part 2 is to be used in conjunction with the latest edition of IEC 335-1 and its amendments. It was established on the basis of the third edition (1991) of that standard.

This part 2 supplements or modifies the corresponding clauses in IEC 335-1, so as to convert it into the IEC standard: *Safety requirements for wet and dry vacuum cleaners, including power brush, for industrial and commercial use.*

Annex AA forms an integral part of this standard.

Annex BB is for information only.

Annex AA does not contain details of filtration tests which are under consideration.

The tests considered by SC 61J are:

- 1) condensation nuclei (CN);
- 2) dispersed oil particulate (DOP);
- 3) sodium chloride (NaCl);
- 4) limestone dust.

Where a particular subclause of part 1 is not mentioned in this part 2, that subclause applies as far as is reasonable. Where this standard states "addition", "modification" or "replacement", the relevant text in part 1 is to be adapted accordingly.

NOTES

- 1 The following print types are used:
 - requirements: in roman type;
 - *test specifications: in italic type;*
 - notes: in small roman type;

Words in **bold** in the text are defined in clause 2. When a definition of part 1 concerns an adjective, in this part 2 the adjective and the associated noun are also in **bold**.

- 2 Subclauses, notes and figures which are additional to those in part 1 are numbered starting from 101; additional annexes are lettered AA, BB, etc.

The following additional differences exist in some countries:

- 2.2.9: A different type of carpet is specified than in A1.1.2 of IEC 312 (USA).
- 6.1: In some countries, class 0 and class 01 vacuum cleaners are permitted (Japan); appliances carried on the body during use can be class I, class II or class III (USA).
- 7.1: Other markings are required (USA).
- 7.9: If the motor drives a brush then there shall be an indicator (USA).
- 7.12: Additional information is required (USA).
- 15.2: The test is conducted differently (USA).
- 22.2: Disconnection of all poles is not required for switches in the supply circuit of water suction cleaning appliances.
- 25.5: Type Y attachment is only allowed for vacuum cleaners provided with an automatic cord reel.
- 25.7: PVC cables may not be suitable.
- 25.14: The test is not carried out (USA).
- 26.1: Vacuum cleaners shall be class I, class II or class III; in some countries, class 0 and class 01 vacuum cleaners are permitted.
- Clause 32: National health authorities responsible for the protection of labour may specify requirements in addition to annex AA (UK, Germany).
- AA.22.101: For wood, dust class M or H is suitable (Germany).
- AA.22.110: In dust class M (when suitable for wood, according to the instructions for use) and in dust class H appliances, the essential filter shall be at less than atmospheric pressure (Germany).

SAFETY OF HOUSEHOLD AND SIMILAR ELECTRICAL APPLIANCES

Part 2-69: Particular requirements for wet and dry vacuum cleaners, including power brush, for industrial and commercial use

1 Scope

This clause of part 1 is applicable except as follows.

Addition:

This standard applies to electrical motor-operated vacuum cleaners and includes appliances and stationary equipment specifically designed for wet suction, dry suction, or wet and dry suction for industrial and commercial use with or without attachments, for example for suction to withdraw dust or the like from work benches and production machines.

NOTE – Commercial uses are, for example, for use in hotels, schools, hospitals, factories, shops and offices for other than normal housekeeping purposes.

This standard also applies to machines handling hazardous dust, e. g. asbestos, or liquids for which additional national requirements apply.

It is also applicable to appliances making use of other forms of energy for the motor; but it is necessary that their influence is taken into consideration.

Modification:

Replace the first two dashed lines of note 3 by:

- appliances for household use to which IEC 335-2-2 applies;
- centrally sited stationary vacuum cleaning systems;
- appliances intended to be used in locations where special conditions prevail, such as the presence of a corrosive or explosive atmosphere (vapour or gas).

Addition:

NOTE 101 – For battery-operated appliances, reference shall be made to IEC 335-2-72.

2 Definitions

This clause of part 1 is applicable except as follows.
