This European Standard was approved by CENELEC on 1997-03-11. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

EN 60107-2:1997

Foreword

The text of document 100A/22/FDIS, future edition 2 of IEC 60107-2, prepared by SC 100A, Multimedia end-user equipment, of IEC TC 100, Audio, video and multimedia systems and equipment, was submitted to the IEC-CENELEC parallel vote and was approved by CENELEC as EN 60107-2 on 1997-03-11.

The following dates were fixed:

 latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement

(dop) 1998-01-01

 latest date by which the national standards conflicting with the EN have to be withdrawn

(dow) 1998-01-01

Annexes designated "normative" are part of the body of the standard. Annexes designated "informative" are given for information only. In this standard, annex ZA is normative and annex A informative. Annex ZA has been added by CENELEC.

iTeh STANDARD PREVIEW

The text of the International Standard IEC 60107-2:1997 was approved by CENELEC as a European Standard without any modification.

In the official version, for annex A, Bibliography, the following notes have to be added for the standards indicated: //standards.iteh.ai/catalog/standards/sist/91040338-4a36-4e34-92a3-5977250e40f5/sist-en-60107-2-1999

| IEC 65 | NOTE: Harmonized, together with its amendments 1:1987, 2:1989 and 3:1992, as EN 60065:1993 (modified). | | |
|-----------|--|--|--|
| IEC 315-3 | NOTE: Harmonized as HD 560.3 S1:1992 (not modified). | | |
| CISPR 13 | NOTE: EN 55013:1990 (CISPR 13:1975 + A1:1983, mod.) + A12:1994 applies. The title of EN 55013 is: Limits and methods of measurement of radio disturbance | | |
| | characteristics of broadcast receivers and associated equipment. | | |

CISPR 20 NOTE: Instead of CISPR 20:1996, EN 55020:1994 + corr. Jan. 1996 + A11:1996, Electromagnetic immunity of broadcast receivers and associated equipment, applies.

Annex ZA (normative)

Normative references to international publications with their corresponding European publications

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies (including amendments).

NOTE: When an international publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

INTERNATIONAL ELECTROTECHNICAL COMMISSION

METHODS OF MEASUREMENT ON RECEIVERS FOR TELEVISION BROADCAST TRANSMISSIONS –

Part 2: Audio channels – General methods and methods for monophonic channels

FOREWORD

- 1) The IEC (International Electrotechnical Commission) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of the IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, the IEC publishes International Standards. Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. The IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of the IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested National Committees.
- 3) The documents produced have the form of recommendations for international use and are published in the form of standards, technical reports or guides and they are accepted by the National Committees in that sense.
- 4) In order to promote international unification, IEC National Committees undertake to apply IEC International Standards transparently to the maximum extent possible in their national and regional standards. Any divergence between the IEC Standard and the corresponding national or regional standard shall be clearly indicated in the latter.

 SIST EN 60107-2:1999
- 5) The IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with one of its standards. 2-1999
- 6) Attention is drawn to the possibility that some of the elements of this International Standard may be the subject of patent rights. The IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60107-2 has been prepared by subcommittee 100A: Receiving equipment, of IEC technical committee 100: Audio, video and multimedia systems and equipment.

This second edition cancels and replaces the first edition published in 1980 and constitutes a technical revision.

This part of IEC 60107 should be used in conjunction with IEC 60107-1.

The text of this standard is based on the following documents:

| FDIS | Report on voting |
|--------------|------------------|
| 100A/22/FDIS | 100A/41/RVD |

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

Annex A is for information only.
