Contents—Page

Foreword	xii
Introduction	xx
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	13
5 Characteristics of Open-edi	14
6 Components of a business transaction	15
7 Basic principles, rules and guidelines for scoping Open-edi scenarios	64
8 Rules for specification of Open-edi scenarios and their components	73
9 Primitive Open-edi scenario template	100
10 Requirements on Open-edi description techniques	104
Annex A (normative) Consolidated controlled vocabulary definitions and associated terms, as human interface equivalents (HIEs), English and French language equivalency in the IT standardization context	107
Annex B (normative) Codes representing presence-type attributes: mandatory, conditional, mandatory subject to a conditional, optional and not applicable	111
Annex C (informative) Unambiguous identification of entities in (electronic) business transactions	115
Annex D (informative) Existing standards for the unambiguous identification of Persons in business transactions (organizations and individuals) and some common policy and implementation considerations	123
Annex E (informative) Business transaction model: Person component	146
Annex F (informative) Business transaction model — Process component	198
Annex G (informative) Business transaction model: data component	220
Annex H (informative) Scenario descriptions using the Open-edi scenario template: "Telecommunications Operations Map" example	241
Bibliography	300
Introduction	xiii
0.1 Purpose and overview	xiii
0.2 Requirements on the business operational view aspects of Open-edi	xv
0.3 Business operational view (BOV), Open-edi e-business, etc	xviii
0.4 Use of "Person", "person", and "party" in the context of business transactions and commitment exchange	xix
0.5 Registration aspects of Open-edi scenarios, scenario attributes and scenario components	xx

0.6	Organization and description of the document	xx
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviations	13
5	Characteristics of Open-edi	15
5.1	General	15
5.2	Actions based on following clear, predefined rules	15
5.3	Commitment of the parties involved	15
5.4	Communications among parties are automated	16
5.5	Parties control and maintain their states	16
5.6	Parties act autonomously	16
5.7	Multiple simultaneous transactions can be supported	16
6	Components of a business transaction	17
6.1	General	17
6.1.1	Overview	17
6.1.2	Standard based on rules and guidelines	18
6.1.3	Business transaction: commitment exchange added to information exchange	18
6.1.4	Business transaction: unambiguous identification of entities	22
6.1.5	Business transaction model: key components	25
6.1.6	Business transaction model: classes of constraints	25
6.2	Rules governing the Person component	28
6.2.1	Purpose	28
6.2.2	Person, personae, identification and Person signature	28
6.2.3	Person – identity and authentication	33
6.2.4	Person and roles: buyer and seller	36
6.2.5	Person and delegation to “agent” and/or “third party”	37
6.2.6	Person and external constraints: the “regulator”	38
6.2.7	Person and external constraints: individual, organization, and public administration	38
6.2.8	Person and external constraints: consumer and vendor	42
6.3	Rules governing the process component	43
6.3.1	Overview	43
6.3.2	Planning	44
6.3.3	Identification	45
6.3.4	Negotiation	45
6.3.5	Actualization	46
6.3.6	Post-actualization	47

6.4	Rules governing the data component	47
6.4.1	Recorded information	47
6.4.2	Predefined and structured data elements	49
6.5	Business requirements on the FSV (Business demands on Open-Edi Support Infrastructure)	52
6.5.1	Overview	52
6.5.2	Internal constraints (self-imposed)	52
6.5.3	External constraints	53
6.5.4	BOV requirements on the FSV for security methods and techniques	54
6.5.5	Liability of repositories	55
7	Basic Principles, Rules and Guidelines for scoping Open-edi scenarios	57
7.1	Basic principles	57
7.2	Rules for scoping Open-edi scenarios	58
7.3	Template for specifying scope of an Open-edi scenario	60
7.3.1	Introduction to template	60
7.3.2	Template for specifying the scope of an Open-edi scenario	61
8	Rules for specification of Open-edi scenarios and their components	65
8.1	Basic principles	65
8.2	OES demands on interoperability	68
8.3	Rules for specification of Open-edi scenarios and scenario attributes	68
8.3.1	Open-edi scenario rules	68
8.3.2	Open-edi scenario (OeS) attributes and associated rules	69
8.3.2.1	List of the Open-edi scenario attributes	69
8.3.2.2	Scenario attribute: OeS identifier	70
8.3.2.3	Scenario attribute: OeS name(s)	70
8.3.2.4	Scenario attribute: OeS purpose	70
8.3.2.5	Scenario attribute: OeS set of roles	70
8.3.2.6	Scenario attribute: OeS set of Information Bundles	70
8.3.2.7	Scenario attribute: OeS set of requirements on Open-edi Parties	71
8.3.2.8	Scenario attribute: OeS set of external constraints on business requirements, i.e. laws and regulations	71
8.3.2.9	Scenario attribute: OeS inheritance identifier(s) and cross-references	71
8.3.2.10	Scenario attribute: OeS security service requirements	72
8.3.2.11	Scenario attribute: OeS communication – quality of service requirements	72
8.3.2.12	Scenario attribute: OeS role requirements and constraints	72
8.3.2.13	Scenario attribute: OeS dependency among roles in a scenario	72

8.3.2.14 Scenario attribute: OeS dependency among Information Bundles in a scenario	72
8.3.2.15 Scenario attribute: OeS dependency among Semantic Components of different Information Bundles	72
8.3.2.16 Scenario attribute: OeS demands on Open-edi Parties	73
8.3.2.17 Scenario attribute: OeS demands on Open-edi infrastructure	73
8.4 Rules for specification of Open-edi roles and role attributes	73
8.4.1 Rules governing roles	73
8.4.2 Role attributes and associated rules	74
8.4.2.1 List of Role attributes	74
8.4.2.2 Role attribute: role identifier (ID)	75
8.4.2.3 Role attribute: role name(s)	75
8.4.2.4 Role attribute: role purpose	75
8.4.2.5 Role attribute: role business goal(s)	75
8.4.2.6 Role attribute: role business rules and constraints	76
8.4.2.7 Role attribute: role inheritance identifiers and cross-references	76
8.4.2.8 Role attribute: role external constraints on business requirements	77
8.4.2.9 Role attribute: role security service requirements	77
8.4.2.10 Role attribute: role communications and quality of service requirements	77
8.4.2.11 Role attribute: Role demands on Open-edi Support Infrastructure (OeSI)	78
8.4.3 Role demands on Open-edi Parties	78
8.4.4 Interoperability demands among roles	78
8.4.5 Role states	78
8.4.6 Role transitions	79
8.4.7 Role events	79
8.4.8 Role actions	80
8.4.9 Role internal function	80
8.4.10 Role demand on Open-edi Support Infrastructure (OeSI)	81
8.5 Rules for specification of Open-edi Information Bundles (IBs) and IB attributes	81
8.5.1 Rules governing Information Bundles (IBs)	81
8.5.2 Information Bundle (IB) attributes and associated rules	82
8.5.2.1 List of Information Bundle Attributes	82
8.5.2.2 Information Bundle attribute: IB identifier	82
8.5.2.3 Information Bundle attribute: IB name(s)	82
8.5.2.4 Information Bundle attribute: IB purpose	83
8.5.2.5 Information Bundle attribute: business rules controlling content of IBs	83
8.5.2.6 Information Bundle attribute: IB external constraints on business requirements governing content or concept(s) of an IB	83
8.5.2.7 Information Bundle attribute: IB contents	83

8.5.2.8 Information Bundle attribute: IB security service requirements	83
8.5.2.9 Information Bundle attribute: IB recorded information retention – business rules and constraints	84
8.5.2.10 Information Bundle attribute: IB recorded information retention - external constraints on business requirements	84
8.5.2.11 Information Bundle attribute: IB time validity characteristics	84
8.5.3 IB information for interoperability	85
8.5.4 IB demands on Open-edi Support Infrastructure (OeSI)	85
8.5.5 Rules for the specification of Semantic Components and Semantic Component attributes	85
8.5.5.1 Rules governing Semantic Components	85
8.5.5.2 Rules governing Semantic Component attributes	86
8.5.5.2.1 List of the Semantic Component attributes	86
8.5.5.2.2 Semantic Component attribute: SC identifier	87
8.5.5.2.3 Semantic Component attribute: SC name(s)	87
8.5.5.2.4 Semantic Component attribute: SC definition	87
8.5.5.2.5 Semantic Component attribute: SC security service requirements	87
8.6 Business requirements on FSV (business demands on Open-edi Support Infrastructure)	87
9 Primitive Open-edi scenario template	89
9.1 Purpose	89
9.2 Consolidated template for specifying attributes of Open-edi scenario, roles and Information Bundles (IBs)	89
9.2.1 IT-interface needs perspective	90
9.2.2 Human Interface Equivalent (HIE) needs perspective	90
9.2.3 Consolidated template of attributes of Open-edi scenarios, roles and Information Bundles	91
10 Requirements on Open-edi description techniques	95
10.1 General requirements on Open-edi description techniques	95
10.2 Requirements on OeDTs for roles	96
10.3 Requirements on OeDTs for Information Bundles	97
Annex A (normative) Consolidated controlled vocabulary definitions and associated terms, as human interface equivalents (HIEs), English and French language equivalency in the IT standardization context	99
A.1 Purpose	99
A.2 Maximizing unambiguity and quality control	99
A.3 Role and importance of ISO/IEC 15944-7 “Information technology – Business Operational View – Part 7: eBusiness vocabulary in support of facilitating HIE approach	101
A.4 List of terms and definition with cultural adaptability: English and French language equivalency in the IT standardization context	102

Annex B (normative) Codes representing presence type attributes: mandatory, conditional, mandatory subject to a conditional, optional, and not applicable	103
Annex C (informative) Unambiguous identification of entities in (electronic) business transactions	107
C.1 Overview	107
C.2 Key issues	107
C.3 Basic assumptions: entities, objects and Persons	107
C.4 "Unambiguous"	109
C.5 "Identification"	110
Annex D (informative) Existing standards for the unambiguous identification of Persons in business transactions (organizations and individuals) and some common policy and implementation considerations	116
D.1 Overview	116
D.1.1 Note on compliance with privacy/data protection, consumer protection, etc	117
D.1.2 Standards referenced in this Annex D	117
D.2 Purpose	118
D.3 Approach and overview	119
D.4 Existing standards for the unambiguous identification of Persons	119
D.4.1 Purpose	119
D.4.2 Key existing standards	120
D.4.2.1 Specific standards already identified	120
D.4.2.2 (Global) Unambiguous identification of "organizations" - ISO/IEC 6523	121
D.4.2.3 (Global) Unambiguous identification of "buyers and sellers" - ISO/IEC 7812)	125
D.4.2.3 (Global) Unambiguous identification of individuals - ISO/IEC 7501	128
D.4.3 Conclusions	129
D.5 Some common policy and implementation considerations for the unambiguous identification of Persons as individuals	130
D.5.1 Overview	130
D.5.2 Anonymity	131
D.5.3 Privacy/data protection	132
D.5.4 What is an "individual" and what are criteria for an "identifiable individual"?	134
D.5.5 Role of a natural person in a business transaction as "individual or organization" (or "organization Person")	135
D.5.6 Unambiguous identification of individuals - two basic options	136
Annex E (informative) Business transaction model: Person component	139
E.1 Overview	139
E.2 Purpose	141
E.3 "Person" in a business transaction	142
E.4 Personae, identification and Person signature	144

E.4.1	Personae and identification	144
E.4.2	Person signature	151
E.5	Person – identification and authentication	155
E.6	Person and roles: buyer and seller	159
E.7	Person and delegation of commitment to agent and/or third parties	161
E.7.1	Introduction	161
E.7.2	Agents	161
E.7.3	Third parties	164
E.8	Person and external constraints: regulator	165
E.9	Person and external constraints: individual, organization, and public administration	166
E.9.1	Purpose	166
E.9.2	Individual	169
E.9.3	Organization, organization part and organization Person	170
E.9.4	Organization part	171
E.9.5	Organization Person	172
E.9.6	Public administration	175
E.9.7	Summary overview of the three sub-types of Persons and the three primary “primitive” roles of a Person in a business transaction	175
E.10	Person and external constraints: consumer and vendor	176
Annex F (informative) Business transaction model: process component		161
F.1	Overview	161
F.1.1	Purpose	162
F.1.2	Sources of contents	163
F.2	Process component	163
F.2.1	General rules	163
F.2.2	Planning phase	165
F.2.3	Identification phase	167
F.2.4	Negotiation phase	168
F.2.5	Actualization phase	168
F.2.6	Post-actualization phase	168
F.3	Process component and construction of scenarios and scenario components	168
F.4	Summary of background study supporting the five phases of the process component	169
F.4.1	Initial view of process component	169
F.4.2	Results of analysis of buying and selling models	170
F.4.2.1	Overview	170
F.4.2.2	Conclusions	174

F.4.3	List of references of Annex F	174
F.5	Survey of buying and selling models forming part of background study	175
F.5.1	"Depth selling model"	175
F.5.2	"Stages in making a sale"	176
F.5.3	"The cycle of industrial buying process"	177
F.5.4	"The dyadic sales process"	178
F.5.5	"Industrial buyer behaviour"	179
F.5.6	"The stages of the corporate industrial buying process for selected items of capital equipment"	179
	Annex G (informative) Business transaction model: data component	181
G.1	Overview	181
G.2	Context: Business transaction	182
G.3	Business information to recorded information	183
G.4	Recorded information to electronic data	186
G.5	Predefined and structured data elements	189
G.5.1	Data to data elements	189
G.5.2	Unambiguity in data elements	190
G.5.3	Predefined and structured data elements	191
G.5.4	Granularity	192
G.6	Linking data element to Information Bundle and Semantic Component	193
	Annex H (informative) Scenario descriptions using the Open-edi scenario template:	
	"Telecommunications Operations Map" example	196
H.1	Overview	196
H.1.1	Purpose	196
H.1.2	Formal Description Technique (FDT)	196
H.1.3	Disclaimer Notice	196
H.1.4	Summary Introduction to "Telecommunications Operations Map"	196
H.1.5	Terminology	197
H.2	Open-edi Scenario - identification and classification	197
H.2.1	Scenario Scope Attributes	197
H.2.2	Business Model: Telecommunications Operational Map	200
H.2.3	Business Areas	202
H.2.4	Process Areas	203
H.2.5	Business Processes	204
H.2.5.1	Create Service Request Process	205
H.2.5.2	Develop Service Work Order Plan Process	206
H.3	Negotiate Reservation Business Process (Open-edi Scenario)	207
H.3.1	Negotiate Reservation Business Scenario UML Diagram	207

H.3.2 Scenario Identification and Definition Attributes Values	207
H.3.2.1 Negotiate Reservation	207
H.3.2.2 Check Time Slot Availability	208
H.3.2.3 Negotiate Time	209
H.3.2.4 Request Time Slot Reservation	210
H.3.3 Scenario Component Specification (Business collaboration)	211
H.3.3.1 Negotiate Reservation Collaboration	211
H.3.3.2 Partners	212
H.3.3.3 Roles	213
H.3.3.4 Information Bundles	215
H.4 Business Transactions: Query Available Time Slots Commercial Transaction Definition	216
H.4.1 Activity Diagram	216
H.4.2 Query Available Time Slots Business Objective	216
H.4.2.1 Start State	216
H.4.2.2 Initiating Business Activity: Query Available Time Slots	217
H.4.2.3 Requesting Information Bundle: Available Time Slots Query	217
H.4.2.4 Responding Business Activity: Process Available Time Slot Query	219
H.4.2.5 Responding Information Bundle: Available Time Slots Response	219
H.4.3 Offer Available Time Slots Commercial Transaction Definition	221
H.4.3.1 Offer Availability Time Slots Commercial Activity Diagram	221
H.4.3.2 Business Activity Objective	224
H.4.3.3 Business Activity Start State	224
H.4.3.5 Requesting Information Bundle: Time Slot Offer	224
H.4.3.6 Responding Business Activity: Process Time Slot Offer	225
H.4.3.7 Responding Information Bundle: Time Slot Offer Response	226
H.4.4 Request for Timeslot reservation Activity Diagram	227
H.4.5 Business Objective	227
H.4.5.1 Start State	227
H.4.5.2 Initiating Business Activity: Request Time Slot Reservation	228
H.4.5.3 Requesting Information Bundle: Time Slot Reservation Request	228
H.4.5.4 Responding Business Activity: Process Time Slot Reservation	229
H.4.5.5 Responding Information Bundle: Time Slot Reservation Confirmation	230
Annex I (informative) Abstracts of ISO/IEC 15944-1	232
I.1 English Abstract	232
I.2 French Abstract	232
Annex J (informative) List of parts of the ISO/IEC 15944 series	234

Bibliography	236
List of Figures	Page
Figure 1 — Open-edi environment	xiii
Figure 2 — Aspects of ISO/IEC 15944	xv
Figure 3 — Integrated View — Business operational requirements focus	xvii
Figure 4 — Illustration of technical components as end users of information exchange(s) in IT Standards – FSV perspective	19
Figure 5 — Illustration of Persons as end users in commitment exchange in business transactions based on existing commercial and legal frameworks – BOV perspective	20
Figure 6 — Integrated View — commercial/legal and IT perspectives of Persons as “end users” in an electronic business transaction through technical components – incorporating BOV and FSV perspectives	22
Figure 7 — Business Transaction Model — Fundamental components (Graphic Illustration)	25
Figure 8 — Business Transaction Model: Classes of constraints	27
Figure 9 — Links of a Person to its persona(e) in the context of different business transactions and their governing rules	29
Figure 10 — Illustration of links of a Person to persona(e) to identifier(s) issued through identification schemata applicable to the contexts of different business transactions	31
Figure 11 — Illustration of relationships of links of a Person to (its) persona(e) to identification schemas and resulting identifiers to associated Person signatures — in the context of different business transactions and governing rules	33
Figure 12 — Illustration of range of links between Person and Person identity(ies)	34
Figure 13 — Illustration of two basic options for the establishment of a recognized Person identity based on a Person identity for use in a business transaction	35
Figure 14 — Illustration of buyer-seller interaction with buyer using an agent	37
Figure 15 — Illustration of buyer and seller with a third party	38
Figure 16 — Integrated business transaction perspective of Person: Minimum external constraints	39
Figure 17 — Illustration of commitment exchange versus information exchange for organization, organization part(s) and organization Person(s)	41
Figure 18 — Business Transaction Model: Basic aspects of Person as players and roles - Public administration external constraints	42
Figure 19 — Relation of “information”, recorded information” and “medium” in business transactions — Legal, commercial and Open-edi requirements	49
Figure 20 — Relation of “recorded information”, “data” and “computer system” in electronic business transactions / Open-edi	50
Figure 21 — Relations “data” and “data elements” in electronic business transactions / Open-edi	50
Figure 22 — Focus of BOV Open-edi standardization work from data element perspective — Predefined and structured data elements	51
Figure 23 — Illustration of operation of Open-edi from the point of view of an autonomous organization in terms of the operation of rules, constraints and scenario components	66
