## Foreword

ISO (the International Organization for Standardization) ~~is a~~ and IEC (the International Electrotechnical Commission) form the specialized system for worldwide ~~federation of national standards~~ standardization. National bodies ~~(that are members of ISO member bodies)~~. The work ~~or IEC participate in the development of preparing~~ International Standards ~~is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International~~ by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO ~~and IEC~~, also take part in the work. ~~ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.~~

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ~~ISO documents~~ document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 ~~(see [www.iso.org/directives](http://www.iso.org/directives) 2 (see [www.iso.org/directives](http://www.iso.org/directives) or [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs))).~~

~~Attention is drawn~~ ISO and IEC draw attention to the possibility that ~~some of the elements~~ implementation of this document may ~~be involve~~ the ~~subject use~~ of (a) patent ~~rights~~. ISO(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents) and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights. ~~Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).~~

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

<https://standards.iteh.ai/catalog/standards/iso/42e0bb09-7569-4305-b102-d7640ece3631/iso-iec-dts-17012>

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), ~~see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html)~~ see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html). In the IEC, see [www.iec.ch/understanding-standards](http://www.iec.ch/understanding-standards).

This document was prepared by the ISO Committee on Conformity Assessment (CASCO).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at ~~[www.iso.org/members.html](http://www.iso.org/members.html)~~ [www.iso.org/members.html](http://www.iso.org/members.html) and ~~[www.iec.ch/national-committees](http://www.iec.ch/national-committees)~~ [www.iec.ch/national-committees](http://www.iec.ch/national-committees).

## Introduction

This ~~guidance~~ document was developed in response to developing technology and changes in working practices based upon a variety of experiences, including those from the coronavirus pandemic. ~~Applying~~Implementing remote auditing methods can bring a variety of benefits for both the auditor and the auditee. ~~The~~This document provides guidance to ensure the audit is effectively conducted and the audit objectives are achieved when remote auditing methods are used.

Remote auditing methods can improve the efficiency of an audit by reducing travel-time and expense and achieving an improvement in the overall carbon footprint, as well as avoiding travel to risky areas, ~~allowing~~enabling virtual access to more sites. A further benefit is facilitating diversity of participation in the audit and the increased involvement of technical experts within the audit.

This includes cross-border activities that can improve the overall efficiency of the audit, whilst maintaining business continuity, especially in challenging situations and conditions.

The objective of this ~~guidance~~document is to provide assurance that remote auditing methods represent an additional sustainable and flexible way to conduct audits of ~~Management Systems~~management systems and provide confidence to customers, regulators, scheme owners and other interested parties.

This document includes guidance on risk-based methodology ~~is~~ to be ~~applied~~followed for planning and implementing the remote auditing methods ~~which~~that are applicable to all types and sizes of organizations ~~with different sizes (see tables, Table 1 and Table 2 in clause 5.2.3 for provide~~ examples of risks and opportunities). ~~In addition, this,~~

This document can be used to support an on-site, a remote or a combined approach to ~~audits of auditing~~ management systems ~~(see table 1 of,~~

NOTE ~~ISO-19011 for:2018, Table 1 gives examples of different types of audits).~~ ~~The guidance in this,~~

This document ~~might~~can also be used to support other conformity assessment activities, such as in accreditation assessment, product certification or peer assessment ~~or similar activities.~~

This document supports the continued integrity of management system certification to ensure that the certification process is carried out in a competent, thorough, and transparent manner ~~and~~. It provides ~~an~~ additional guidance to the implementation of ISO-19011;2018 and ISO/IEC-17021-1. ~~The guidance in this~~

This document highlights the importance ~~to ensure of ensuring~~ that the output of any audit process ~~needs to fulfil~~fulfils the objectives of the audit programme. This document does not take precedence over any requirements of other standards/schemes.

This document ~~uses~~follows the same ~~clauses and headings~~structure as ISO 19011:2018 in order to ~~show~~facilitate use of the ~~link between the guidance in this document and the guidance in ISO 19011, two documents together.~~
