This amendment A1 modifies the European Standard EN 60154-2:1997; it was approved by CENELEC on 1997-07-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this amendment the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This amendment exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

The text of document 46B/218/FDIS, future amendment 1 to IEC 60154-2:1980, prepared by SC 46B, Waveguides and their accessories, of IEC TC 46, Cables, wires, waveguides, R.F. connectors, and accessories for communication and signalling, was submitted to the IEC-CENELEC parallel vote and was approved by CENELEC as amendment A1 to EN 60154-2:1997 on 1997-07-01.

The following dates were fixed:

- latest date by which the amendment has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 1998-06-01
- latest date by which the national standards conflicting with the amendment have to be withdrawn (dow) 1998-06-01

Endorsement notice

The text of amendment 1:1997 to the International Standard IEC 60154-2:1980 was approved by CENELEC as an amendment to the European Standard without any modification.

FOREWORD

This amendment has been prepared by subcommittee 46B: Waveguides and their accessories, of IEC technical committee 46: Cables, wires, waveguides, R.F. connectors and accessories for communication and signalling.

The text of this amendment is based on the following documents:

FDIS	Report on voting
46B/218/FDIS	46B/226/RVD

Full information on the voting for the approval of this amendment can be found in the report on voting indicated in the above table.

INTRODUCTION

This amendment gives the values of surface finish to be applied to the contact face of flanges.

Two sets of values are shown, one being the arithmetic mean and the other peak to peak. They both refer to the same level of finish. This is explained in ISO 468¹⁾.

Arithmetic mean:		SIST EN 60154-2:1999/A1:1998
For flanges size down to R 320		0,8 µm
For flanges size below R 320		0,4 µm
Peak to peak:		
For flanges size down to R 320		6,3 µm
For flanges size below R 320		3,2 µm

¹⁾ ISO 468: 1982, *Surface roughness – Parameters, their values and general rules for specifying requirements*

40,59	47,24	10,29	12,70	12,57	19,05	44,45	25,40	50,80	0,43	

1) Ces valeurs sont les valeurs nominales de la section droite extérieure des guides d'ondes conformément à la CEI 60153. Elles doivent être considérées comme les valeurs nominales de l'ouverture de la bride citées en 2.3.2 de la CEI 60154-1 et ne sont applicables qu'aux brides séparées.

Pour les brides à manchon, les limites de tolérances actuelles dépendent de la méthode d'assemblage et devront donc être déterminées par accord entre le client et le fabricant.

Pour les types à douille, l'ouverture frontale devra avoir les dimensions comprises dans les tolérances spécifiées pour la section droite interne du modèle approprié de guide d'ondes. (Voir aussi 2.3.2 de la CEI 60154-1).

1) These values are the basic values of the outside cross-section of the waveguide according to IEC 60153. They should be regarded as basic values for the aperture according to 2.3.2 of IEC 60154-1 that apply to unmounted flanges only.

For through flanges, the actual range or deviations for the mounting aperture depends on the assembling method and should therefore be agreed between customer and manufacturer.

For socket (butt) flanges, the front-aperture should have dimensions within the deviations specified for the inside cross-section of the appropriate size of waveguide. (See also 2.3.2 of IEC 60154-1.)
