Foreword

ISO (the International Organization for Standardization) ~~is a~~ and IEC (the International Electrotechnical Commission) ~~form the specialized system for worldwide federation of national standards~~ standardization. National bodies ~~(that are members of ISO member bodies). The work~~ or IEC participate in the development of ~~preparing~~ International Standards ~~is normally carried out~~ through ISO technical committees. Each member body interested in a subject for which a technical committee has been established ~~has the right to be represented on that committee. International~~ by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO ~~and IEC~~, also take part in the work. ~~ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.~~

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ~~ISO documents~~ document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 ~~(see www.iso.org/directives 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs)).~~

~~Attention is drawn~~ ISO and IEC draw attention to the possibility that ~~some of the elements~~ implementation of this document may ~~be involve~~ the ~~subject~~ use of (a) patent rights. ISO (s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights. ~~Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).~~

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), ~~see www.iso.org/iso/foreword.html~~ see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC-1, *Information technology*, Subcommittee SC 35, *User interfaces*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html ~~www.iso.org/members.html~~ and www.iec.ch/national-committees.

Introduction

For a serviced office that is defined as a part of third workplace, there are a variety of service forms and usage patterns. Consistency between the service form and the mode of use of its user and the service form and the mode of use provided is highly important. This document investigates and reports the current situation of serviced offices by using use cases to develop an international standard that defines icons intended for use on search sites.

Information technology — User interfaces — Use cases of serviced offices

1 Scope

This document illustrates the use cases of serviced offices among the third workplaces used for flexible working hours and places.

2 Normative references

There are no normative references in this document.

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminology databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <https://www.electropedia.org/>

3.1

telework

remote work

working outside the *main office* (3.5) using information and communications technology (ICT)

3.2

workplace

place where intellectual production activities, production and office work are carried out

3.3

third workplace

workplace (3.2) other than the primary place of work (*main office* (3.5)) and the secondary place of work (home)

3.4

serviced office

office managed by a facility management entity, where services are provided to users based on a contract of use

Note 1 to entry: A serviced office can be paid for or free of charge.

3.5

main office

workplace (3.2) to which the worker belongs

3.6

satellite office

workplace (3.2) located outside the *main office* (3.5)

Note 1 to entry: A satellite office is a place that fulfils the same role as the *main office* (3.5) of the company or the group and is set up for the exclusive use of the company or the group.

3.7

cyber office

virtual office

workplace (3.2) located in virtual space that is implemented with ICT

3.8

partitioned type office

serviced office (3.4) with individual workspaces divided by separators

3.9

box type office

serviced office (3.4) with enclosed workspaces divided by walls and ceilings

Note_1 to entry: A box type office is shaped like a telephone booth.

3.10

room type office

serviced office (3.4) as a closed work area that can be used exclusively

3.11

open type office

serviced office (3.4) as an open work area that is not separated by walls or other barriers

3.12

shared office

workplace (3.2) where multiple companies share the same space rather than only one company using it as its own space

3.13

co-working place

workplace (3.2) that intends to promote people-to-people exchanges, where a worker shares facilities and equipment with people who do not belong to the same organization such as a company

Note_1 to entry: A worker can work independently.

3.14

workcation

activities that utilise telework and provide opportunities to stay in a *third workplace* (3.3) for leisure and experience things other than work, while continuing to work in the *main office* (3.5)

4 The third workplace

4.1 Overview

Figure_1 shows relation among telework, third workplace and serviced office in terms of working place. The third workplace is defined as a workplace other than the primary place of work (main office) and the secondary place of work (home), and therefore it also includes the satellite offices. However, this document concentrates the on serviced offices, which are workplaces managed by a facility management entity and where services are provided to users based on a contract of use, among third workplaces.

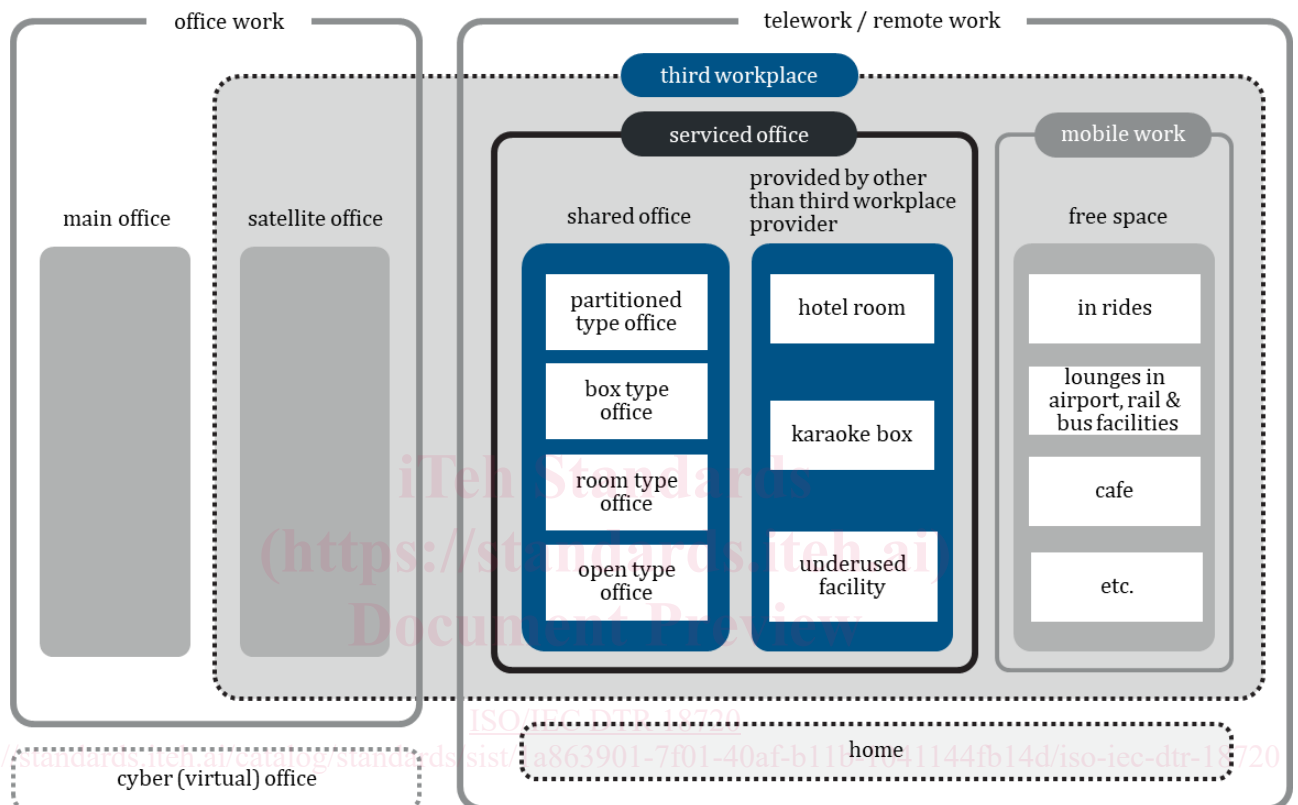

Figure 1 — Relation among telework, third workplaces and serviced offices

Alternative text of Figure-1

Figure_1 shows that there are two types of works: Office work and telework+remote work. The Officeoffice works includes main office and satellite office. The telework+remote work includes serviced office, mobile office, and home. ThirdThe third workplace consists of the satellite office, the serviced office, and the mobile office. The serviced office includes shared office and the spaces that are not provided by other than third workplace provider. The shared office includes partitioned type office, box type office, room type office, and open type office. The spaces that are not provided by other than third workplace provider includes hotel room, karaoke box, and underused facility. The mobile work includeincludes free space such as in-rides, lounges in airport, rail & bus facilities, cafe, etc.

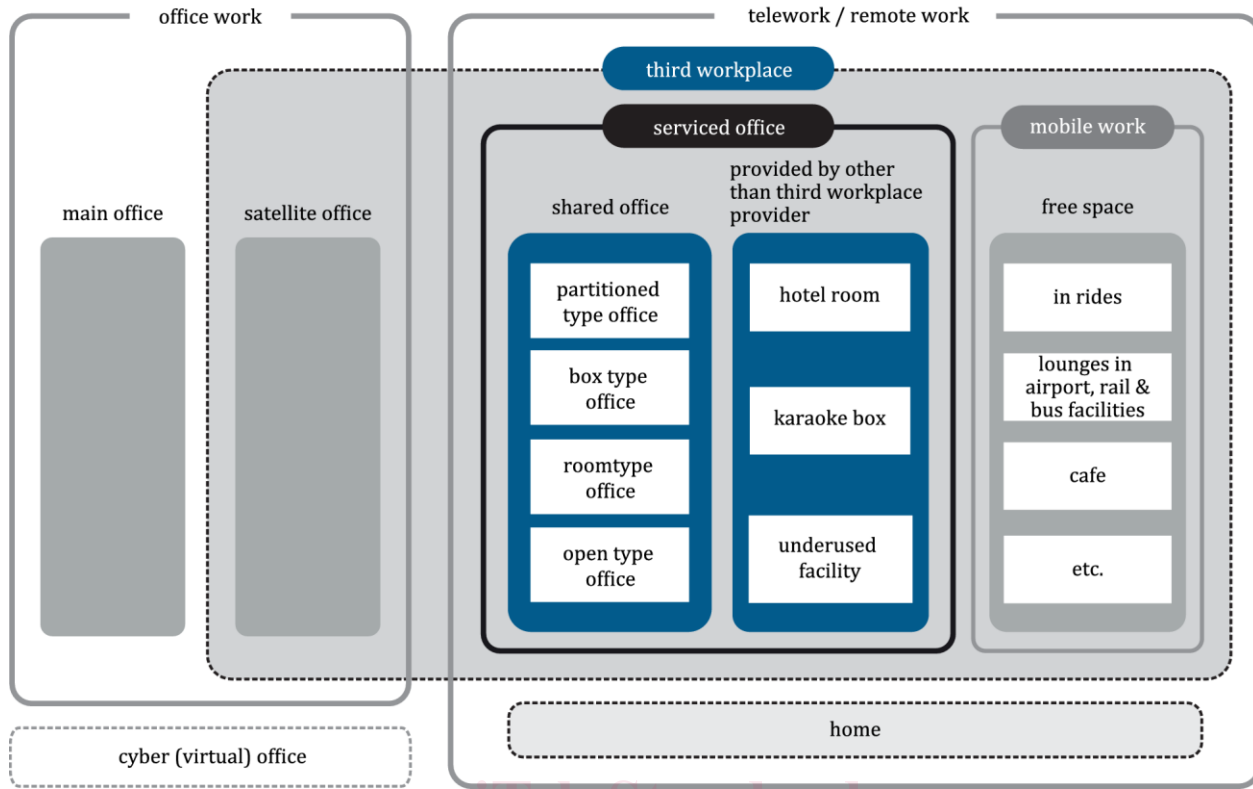

Figure 1 — Relation among telework, third workplaces and serviced offices

A concept of the use of ~~serviced~~ serviced offices is also shown in Figure-2. From the perspective of using the serviced offices, users include not only people in general, but also specific people such as the elderly, persons with disabilities and persons working with children, and the use cases include daily work, touch down work or collaborative work. The shared offices are equipped with a variety of facilities such as partitioned type office, box type office, room type office and open type office, which are selected according to the use cases of daily work, touch down work and collaborative work.
