2022-06

AMENDMENT 1  
2023-11

---

---

**Heat recovery ventilators and energy  
recovery ventilators — Method of test  
for performance —**

Part 1:

**Development of metrics for evaluation  
of energy related performance**

**AMENDMENT 1**

*Ventilateurs-récupérateurs de chaleur et ventilateurs-récupérateurs  
d'énergie — Méthode d'essai des performances —*

*Partie 1: Développement de paramètres pour l'évaluation des  
performances énergétiques*

AMENDEMENT 1

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents). ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 86, *Refrigeration and air-conditioning*, Subcommittee SC 6, *Testing and rating of air-conditioners and heat pumps*.

A list of all parts of the ISO 16494 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).

# Heat recovery ventilators and energy recovery ventilators — Method of test for performance —

## Part 1: Development of metrics for evaluation of energy related performance

### AMENDMENT 1

#### 3.6

Replace Note 1 to entry with the following:

Note 1 to entry: Indicated in Figure 1 as key 3.

#### 3.7

Replace Note 1 to entry with the following:

Note 1 to entry: Indicated in Figure 1 as key 1.

Figure 1

Replace Figure 1 with the following:

#### Key

- |   |  |   |              |
|---|--|---|--------------|
| 1 | entering supply air (OA) and/or station 1  | 5 | ventilator   |
| 2 | leaving supply air (SA) and/or station 2   | 6 | indoor side  |
| 3 | entering exhaust air (RA) and/or station 3 | 7 | outdoor side |
| 4 | leaving exhaust air (EA) and/or station 4  |   |              |

Figure 1 — Schematic numbering of airflows for heat and energy recovery ventilators

3.14

Replace Note 1 to entry with the following:

Note 1 to entry: Indicated in Figure 1 as key 4.

3.15

Replace Note 1 to entry with the following:

Note 1 to entry: Indicated in Figure 1 as key 2.

3.26

Replace Note 1 to entry with the following:

Note 1 to entry: Indicated in Figure 1 as keys 1, 2, 3 and 4.

8.2, Table 1

Replace Table 1 with the following:

**Table 1 — Conditions of test for coefficient of energy and effective work test (cooling)**

Parameter		Standard test conditions				
		T1	T2	T3	T4	T8
Temperature of entering supply air (°C)	dry bulb	35				
	wet bulb	23	24	31	24	24
Temperature of entering exhaust air (°C)	dry bulb	21	24	27	27	25
	wet bulb	15	17	20	19	18
NOTE 1 Allowable variation of readings are given in Table F.2.						
NOTE 2 T8 is new condition.						

Annex A, Figure A.1

Replace Figure A.1 with the following:
