ISO/FDIS 30414

Foreword

ISO (the International OrganisationOrganization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organisationsorganizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity, or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade <a href="https://documents.org/colored-nature-nat

This document was prepared by Technical Committee ISO/TC 260, *Human resource management*.

This second edition cancels and replaces the first edition (ISO 30414:2018), which has been technically revised.

The main changes are as follows:

- —reallocation of metrics into two categories requirements and recommendations;
- enhanced alignment with sustainability reporting;
- more explicit consideration of materiality including factors related to AI;
- guidance on productivity and performance disclosures in for-profit, not-for-profit, and non-profit sectors;
- reorganisation of human capital areas (HCAs) to align contexts, prioritize impact and workflow;
- recommended disclosure reporting format [based on Task Force on Climate-Related Financial Disclosures (TCFD) governance, strategy, risk, and opportunities, and metrics framework];
- addition of metrics on human rights, labour relations, productivity, ethics and well-being;
- —enhanced guidance on responsibilities regarding data collection, privacy and security;

ISO/DISFDIS 30414:20242025(en)

- updated guidance on business acumen for human capital reporting and disclosure in <u>Annex BAnnex</u>
 B;
- enhanced guidance on recommendations for small and medium-sized enterprises in Annex CAnnex C;
- expanded examples of human capital reports with combination metrics in <u>Annex D</u>,
- <u>added</u> an example of a human capital disclosure report for a large <u>organisation</u> organization in <u>Annex EAnnex E.</u>

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

ISO/FDIS 30414

Introduction

Human capital (HC) includes the cumulative knowledge, skills and abilities of an <u>organisation's organization's</u> people and the impact on an <u>organisation's organization's</u> long-term performance, as well as competitive advantage through optimizing <u>organisational organizational</u> outcomes.

The measurement and reporting of human capital facilitate the ability of an organisation organization to manage the risks or opportunities associated with one of its most critical resources, people. Research shows that an organisation's organization's intangible assets, of which human capital is the primary driver, can represent over 90% of an organisation's organization's value value Research also shows that organisations that do not proactively manage their human capital can damage their organisation's organization's capability to generate long-term, sustainable value

The introduction of regulations by major governance agencies requiring <u>organisationsorganizations</u> to disclose essential workforce metrics has the effect of reclassifying human capital as an intangible asset investment rather than an <u>organisational organizational</u> expense. The effective measurement, management and reporting of these investments have become vital for gauging their material impact on an <u>organisation'sorganization's</u> outcomes and sustainability.

This document is guided by the principles of human rights at work [3,[31]], human governance (ISO 30408[44])] and materiality, distinguishing between required and recommended metrics. This document also offers guidelines for human capital data privacy, collection, measurement, analysis and consistency in reporting and disclosure.

The metrics and disclosure format outlined in this document consider a wide variety of sources, such as research organizations [5 organisations, [5]], expert knowledge [6, [6]], advisory groups [7, [7]], forums [8, [8]], industry coalitions [9, [9]], and related frameworks or standards [e.g. Global Reporting Initiative (GRI) [110], [110], Integrated Reporting Initiative [11], [111], Sustainability Accounting Standards Board (SASB) [12], [12], European Sustainability Reporting Standard (ESRS) S1 [13, [13]], International Financial Reporting Standards (IFRS/ISSB) S1 [14, [14]], Securities and Exchange Commission (SEC) [15] [15] and Task Force for Climate-Related Financial Disclosures (TFCD) [16] [16],

The domain of human capital is not limited to human resources (HR). Historically, HR excels in qualitative workforce relations, while finance excels in quantitative reporting for stakeholders. Yet, for human capital analysis and reporting to be effective, a collaborative, interdisciplinary approach is essential.

The benefits of a standardized approach to human capital reporting and disclosure (HCRD) include:

- quantifying the sustainable drivers of <u>organisation</u> organization value creation using generally accepted metrics in a manner that is both internally and externally comparable and consistent with governance expectations;
- —superior insights to workforce management processes that enable positive and constructive workforce relations;
- enhanced transparency of the most impactful human capital drivers of sustainable organization performance;
- superior insight on the correlation between investments in a workforce and sustainability (financial and non-financial) of selected performance indicators;
- enhanced financial performance, <u>organisational organizational</u> culture, workforce well-being and stakeholder value creation.

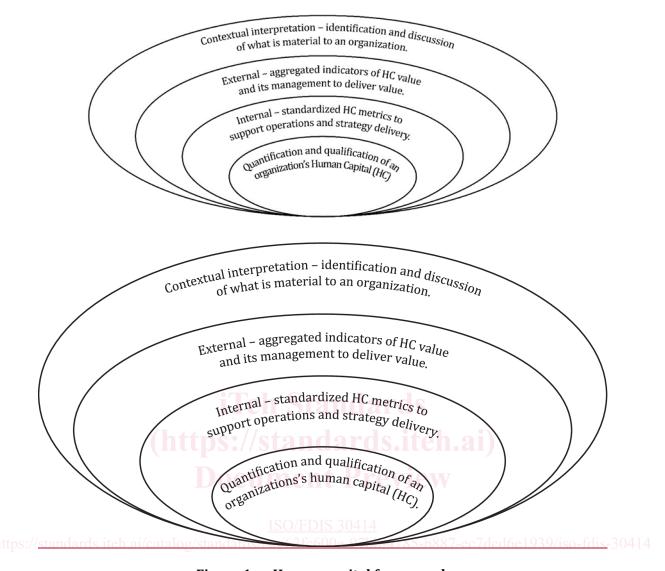

Figure 1 — Human capital framework

Figure 1 Figure 1 illustrates an outcomes-focused view of HCRD's purpose, its layered application and use case relationships. This document does not prescribe a fixed interpretation of materiality, rather it provides guidance to HCRD producers on how to determine human capital materiality based on the report's intended audience, the organisation's organization's sustainability objectives and the jurisdiction of application.

ISO/FDIS 30414

Human resource management — Requirements and recommendations for human capital reporting and disclosure

1 Scope

This document provides requirements and recommendations for human capital reporting and disclosure (HCRD). This document outlines a baseline for global and comprehensive internal and external HCRD applicable across <u>organisations</u> or all sizes and sectors, focusing on measuring factors that are within an <u>organisation'sorganization's</u> control.

This document provides requirement and recommendations on the following core human capital reporting areas (HCAs):

 — workforce composition;
— diversity;
— costs;
- —productivity; iTeh Standards
— health, safety, and well-being; https://standards.iteh.ai
 — leadership, culture and engagement;
 —compliance, ethics, and workforce relations;
 recruitment; https://standards.iteh.ai/catalog/standards/iso/63fc600e-97bb-4185-b887-ec7dcd6e1939/iso-fdis-30414 mobility and succession planning;
— workforce turnover;
— skills, capabilities, and development.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 30400 and the following apply.

ISO and IEC maintain terminology databases for use in standardization at the following addresses:

- —ISO Online browsing platform: available at https://www.iso.org/obp
- ——IEC Electropedia: available at https://www.electropedia.org/

3.1 **3.1**

critical position

job role that has a direct and significant impact on organisational organizational outcomes

Note 1 to entry: A critical position has a material impact on organisational outcomes representing roles that are essential for operational continuity, strategic direction and financial stability. The importance of these positions can vary depending on the sector, size and specific needs of the organisation organization.

Note 2 to entry: A position which is difficult to fill is not inherently critical.

[SOURCE: See ISO 30400:2022, 3.4.17, modified — The original notes to entry have been replaced by 2 new ones.]

3.2 3.2

disclosure area

category (i.e. governance, strategy, risk or opportunity, metrics, targets and narrative) of reporting that represents a complete human capital report.

3.2.1s://standards.iteh.ai/catalog/standards/iso/63fc600e-97bb-4185-b887-ec7dcd6e1939/iso-fdis-30414

3.2.1

disclosure topic

defined area of human capital focus regarding the <u>organisation's organization's</u> strategies, policies, activities and outcomes related to the management, development and productive well-being of its workforce.

Note 1 to entry: <u>disclosure Disclosure</u> topics are the specific *human capital areas (HCAs)* <u>(3.6)</u> which an <u>organisation</u> organization has assessed and deemed material for the purpose of disclosure.

3.3 **3.4**

executive

most senior level of employee or manager in an organisation organization

Note 1 to entry: For the purposes of this document, executive is synonymous with a role of leadership and governance; excluding non-executive directors of a board (see 4.4.34.4.3).

3.4 **3.5**

formal training

structured activity designed to develop workers' skills, knowledge or behaviours

Note 1 to entry: Formal training is usually instigated by **Organisations**organizations.

Note 2 to entry: Training is most commonly associated with an activity whereby learning is an outcome.

ISO/**DISFDIS** 30414:20242025(en)

3.5 3.6

human capital area

HCA

universal, industry or sector work issue category that enables standardized comparisons of human capital issues across <u>organisations</u> organizations, highlighting the domains of human capital with a significant impact on performance and sustainability

$3.6 \frac{3.7}{}$

independent contractor

self-employed individual or entity contracted and paid to perform work for, or provide services to, another entity as a non-employee or contingent worker

EXAMPLE :-Consultant, external advisor, self-employed, freelancer, tradesperson, gig-worker.

[SOURCE: See—ISO 30400:2022, 3.13.3, modified — Original The original definition has been modified to singular; emphasis enhanced emphasis—on self-employment and type of contingent worker; examples expanded.]

3.7 3.8

leadership succession pool

individuals within an <u>organisationorganization</u> who are formally identified as candidates (successors) to fill positions formally identified as roles of leadership

Note 1 to entry: High potentials are people identified as having a propensity for exceptional performance, which can include succession to a role of leadership, but should not be assumed.

3.8 3.9

materiality

measure of the significance of an element to an organisation's organization's results

Note 1 to entry: The words material and materiality may be used interchangeably depending on the context.

Note 2 to entry: Interpretations and applications of materiality can vary by jurisdiction, regulatory authority, scope and end user. For the purposes of this document, at a minimum, materiality should be interpreted and applied based on considerations relating to the reporting entity's country of domicile, sustainability strategy and intended end user.

Note 3 to entry: Dimensions of materiality can typically be financial, environmental, social, governance, legal and ethical.

[SOURCE: ISO 30400: 2022 3.1.16, modified — Notes to entry have been added.]

3.9 **3.10**

own metrics

metrics created and used by an <u>organisation</u>organization which are not included in this document, not generally used or, by definition, only applicable to the reporting <u>organisation</u>organization itself

3.10 3.11

protected category

group of workers who are legally protected from discrimination by laws and regulations (anti-discrimination) in their jurisdiction of work or, extraterritorially, by citizenship

Note 1 to entry: Protected groups have legal rights against discrimination, while underrepresented groups refer to workforce disparities between groups that may not necessarily be covered by law.

3.11 3.12

small and medium-sized enterprise

organisation of a small or medium size, as defined by the recognized authority within the country or region

Note 1 to entry: <u>Organisation Organization</u> size is determined by multiple dimensions including number of employees, budget, revenue or financial turnover, balance sheet assets, <u>organisational organizational</u> resources, size of economy.

Note 2 to entry: In many countries, <u>organisationsorganizations</u> that employ 250 or fewer individuals are deemed small-to-medium-sized enterprises (SMEs).

Note 3 to entry: Thresholds for <u>organisation</u> organization size, based on budget, revenue or financial turnover, should account for major price changes, such as inflation, to prevent unfairly categorizing SMEs as large <u>organisations</u> due to financial fluctuations alone.

[SOURCE: ISO/IEC Guide 17:2016, 3.1, modified — "micro" has been removed from the term and the definition; "as well as self-employed persons" has been removed; the original note 1 to entry has been replaced by 3 new ones.]

3.12 **3.13**

sustainability reporting

form of <u>organisation</u> disclosure which emphasizes non-financial considerations over an extended period of time (i.e. short, medium, and longer term)

Note 1 to entry: Sustainability reporting is often positioned as a complement to traditional financial reporting.

Note 2 to entry: For the purpose of this document, human capital is considered one critical dimension (such as Value Reporting Foundation's 6 capitals of integrated reporting) of the broader notion of sustainability reporting.

4 Human capital reporting and disclosure process

4.1 General

In the context of an <u>organisation's organization's</u> strategy, values, leadership and business or operating model, the following HCRD guidelines should be considered.

a) a) Principles. 4.24.2 outlines the qualitative principles which guide the measurement, analysis, and reporting process associated with HCRD.

NOTE +See ISO 30408:2016, 6.1.

- b) b)—Stakeholder relevance. 4.34.3 identifies relevant interested parties, with an emphasis on differentiating between internal and external stakeholders.
- c) e)—HCRD framework, systems, and unit of workload. 4.44.4 outlines a high-level HCRD framework demonstrating the relationship between organisational objectives, quantitative and qualitative measures, internal and external materiality, organisational organizational systems, levels, and the recommended unit of workload.
- d) Data collection tools and procedures. 4.54.5 outlines legal and ethical considerations, roles of producers and users, data collection responsibilities, comparability, consolidated reporting considerations, human resource information system (HRIS), digital taxonomy, quality control, and the intersection of artificial intelligence (AI) and HCRD.

ISO/**DISFDIS** 30414:20242025(en)

- e) Disclosure format, frequency, and location. <u>Table 1 Table 1</u> provides a recommended disclosure format for documenting and communicating HCRD areas using a governance, strategy, risks or opportunities, and metrics framework.
- f) Disclosure topics. <u>Table 2 Table 2</u> provides a list HCAs including examples for assessing the materiality of the risks or opportunities associated with each disclosure area.
- g) g)—Metric categories and names. Table 3 Table 3 outlines HCAs and required metrics including associated references. Table 4 Table 4 outlines HCAs and recommended metrics including guidance for reporting by organisation size (large or SME) and internal or external application. Explanations for each metric's formulation and application are provided in Annex Annex A.

4.2 Guiding principles

Collectively, the following principles are fundamental to implementing this document. HCRD areas, metrics and disclosures should be:

- a) a) strategic prioritizing human capital issues aligned with organisational organizational strategy and values:
- b) ethical showing commitment to fairness, transparency and equal opportunities through cooperative, participative trust-building among workers, stakeholders, social partners and the broader society such as the UN Sustainable Development Goals (UNSDGs);
- c) evidence-based using valid, impactful, data-driven metrics coupled with due diligence to align the objectives of the organisation organization with stakeholder values;
- d) material using metrics in HCRD relevant to the extent that their omission would impact the quality of decisions made by the HCRD's intended audience of decision-makers;
- e) e) quantified using numerical values for metrics to ensure objectivity and comparability;
- f) qualified articulating risks or opportunities for stakeholders based on context and materiality (see 4.64.6);):
- g) aligned ensuring approaches used are consistent with the organisation's organization's operating model and external context, including proportionality (cost-benefit) and, where appropriate, situational analysis:
- h) hpractical approaching HCRD based on realistic expectations for sustainability activities, strategies, and reporting;
- i) i) proportional acknowledging, internally and externally, SMEs' resource limitations for reporting relative to large organisations organizations;
- j) j)—comparable facilitating comparability of metrics through common benchmarks, trends and synchronized time-based analysis;
- k) transparent ensuring clear and objective reporting of human capital risks or opportunities;
- l) -compliant prioritizing data protection and human rights when collecting, utilizing or disclosing workers' information.

It is useful and advisable to uphold established good practices in information exchange, communication and consultation between management and workforce representatives during HCRD and any related changes.

NOTE +Additional guidance on involvement of employee representatives is given in ISO 45001:2018, 5.4-[18].

4.3 Target groups and stakeholder relevance

4.3.1 General

HCRD has value to a multitude of stakeholders including the following.

- Organisations. Organizations. Human capital is typically a major expense and a unique intangible asset that contributes to an organisation's organization's competitive advantage.
- Workers. Well-managed human capital leads to a sustainable workforce characterized by purpose, collaboration, wellness and well-being, engagement, productivity, longevity and performance.
- ——Investors. Comparable human capital metrics offer insights into governance, strategy, and risk and opportunities, highlighting the value and contribution of this intangible asset[19][20[19][20].]
- Governments and regulators. Standardized HCRD enhances sustainability reporting and promotes social responsibility, in compliance with disclosure requirements.
- —Communities. Effective workforce management contributes to sustainable living standards through better social and governance practices[21][22[21][22],].
- Ratings agencies. Human capital management insights aid third parties (banks, credit agencies) in assessing an organisation's organization's sustainability, efficiency, and risk profile.
- Human capital leaders. Globally recognized benchmarks allow leaders to objectively demonstrate their effective management of human capital.

4.3.14.3.2 Internal and external stakeholders

Risks or opportunities vary depending on different stakeholder groups. Insights from human capital metrics and reports are enhanced when the distinction is made between internal and external stakeholders.

- a) a)—Internal stakeholders include the workforce, their representatives, and governance bodies (such as top management, supervisory boards, board members). Internal HCRD provides an overview of key human capital aspects to an organisation's organization's people, management and, where applicable, workforce representation (such as unions or work councils).
- b) External stakeholders include job seekers, the organization local and supply chain communities, customers, potential financiers, investors, governments, regulators, and ratings agencies. Investors are especially keen to know strategic human capital metrics to assess the impact of human capital investments on the organization financial and non-financial success.

Required HCRD metrics (Table 3(Table 3)) are universally applicable across all organisations organizations, irrespective of sector or size. Recommended HCRD metrics (Table 4(Table 4)) are categorize by size of organisation and whether the metrics are intended for internal use or external reporting and disclosure. Internal use does not imply that these metrics should be communicated or disclosed to the workforce or other stakeholders, rather that internal metrics provide deeper insights into an organisation's commitment to its workforce, the sustainability of its value proposition, strategic growth, and coherence amongst governance, strategy and risk management.
