ISO 7010:2019/PRF Amd 7 https://standards.iteh.ai/catalog/standards/sist/4da4a79f-6903-41c3-bcb0-6687b9ced7c8/iso-7010-2019-prf-amd-7

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawnISO draws attention to the possibility that some of the elements implementation of this document may be involve the subjectuse of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents... ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 145, *Graphical symbols*, Subcommittee SC 2, *Safety identification, signs, shapes, symbols and colours*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Graphical symbols — Safety colours and safety signs — Registered safety signs — Amendment

AMENDMENT 7

IMPORTANT — The colours represented in the electronic file of this document can be neither viewed on screen nor printed as true representations. For the purposes of colour matching see ISO 3864-4, which provides colorimetric and photometric properties together with, as a guideline, references from colour order systems.

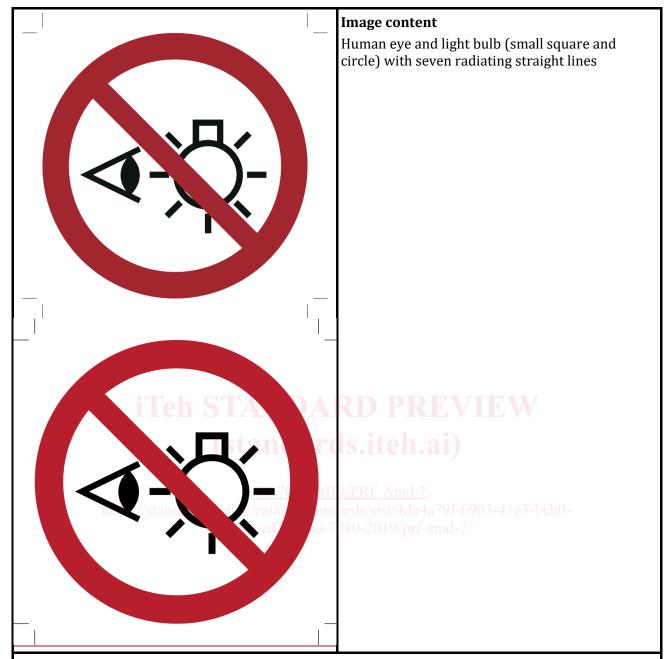

Add the following safety signs:

- P075: Do not stare at light source,
- W079: Warning; Hot content,
- W080: Warning; Hot steam.

All safety signs are available on the ISO Online browsing platform at https://www.iso.org/obp/ui.

Safety sign P075: Do not stare at light source

(standard	Reference No.
	ISO 7010-P075
	<u>9/PRF Amd 7</u>
https://standards.iteh.ai/catalog/stand	Referent No. 2019-prf-amd-7
	Do not stare at light source
	Function
	To prohibit staring at a light source

Hazard

Injury to eyes after exposure to optical radiation

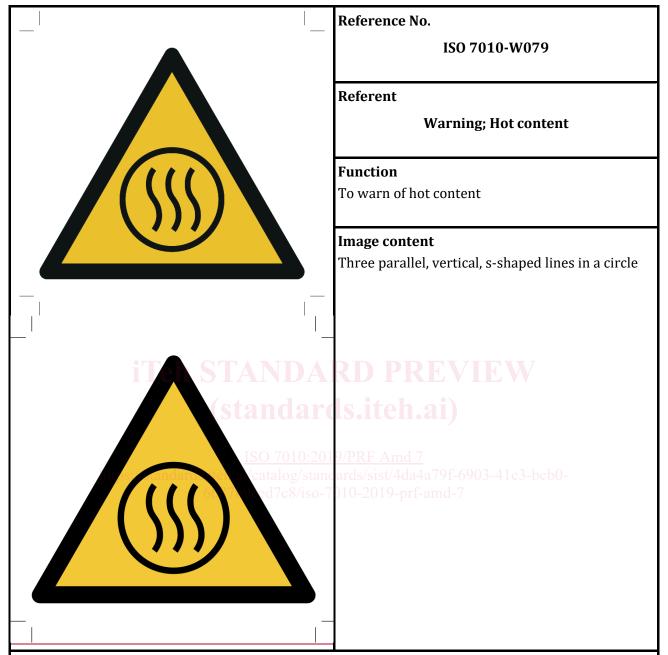

Human behaviour that is intended to be caused after understanding the safety sign's meaning Not staring at the light source

Additional information

The graphical symbol is standardized and registered as IEC 60417-6159-1 "Do not stare at light source".

Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.

Safety sign W079: Warning; Hot content

Hazard

Burn or scald if the contents are released, for example in an accident or during maintenance

Human behaviour that is intended to be caused after understanding the safety sign's meaning

Being aware of the high temperature of the content (e.g. liquid, gas or other media) and taking care to avoid contact if the content is released (e.g. from a pipe or container)

Additional information

Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.

If necessary, a supplementary sign shall be used to indicate the type of content and its temperature.
